# CURRENT MACROECONOMIC AND FISCAL DEVELOPMENTS

### 1. Current macroeconomic developments

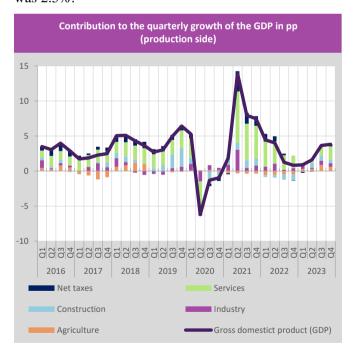

#### 1.1. Economic activity

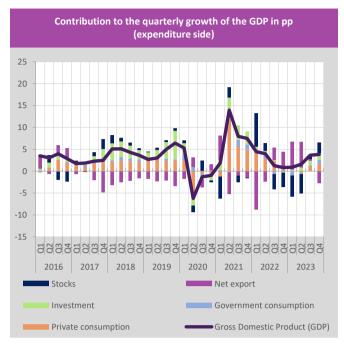

*Gross domestic products.* In the fourth quarter of 2023, gross domestic product (GDP) recorded a real year-on year growth of 3.8%, which is unchanged from the flash estimate.

Observed from the production side, in the fourth quarter, the most significant positive impact comes from service activities, namely the wholesale and retail trade and repair of motor vehicles, transportation and storage and accommodation and food services section (0.6 pp), public administration and defence, compulsory social security, education and human health and social work activities (0.5 pp), as well as information and communication (0.3 pp).

Observed by expenditure aggregates, private consumption was the dominant driver of growth in the fourth quarter with a contribution of 1.7 pp as well as investment with a contribution of 1.5 pp. On the other hand, net export recorded negative contribution (-2,8 pp) due to the faster growth of imports than exports.

In the fourth quarter of 2023, seasonally adjusted GDP increased by 0.9% in comparison with the previous quarter. In 2023, compared to 2022, real GDP growth was 2.5%.

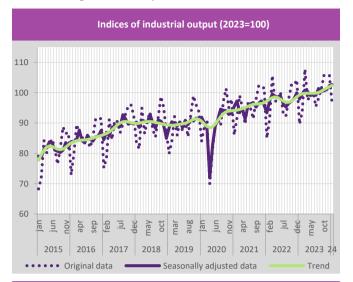

Industrial production. According to the Statistical Office of the Republic of Serbia (SORS) data, industrial production in January 2024 has increased annually by 6.9%, while compared to the average industrial production in 2023 decreased by 4.1%. The largest influence on industrial production growth in January 2024 compared to January 2023 had the divisions of: electricity, gas, steam and air conditioning supply, manufacture of food products, manufacture of basic metals, manufacture of computer, electronic and optical products, as well as manufacture of other transport equipment.

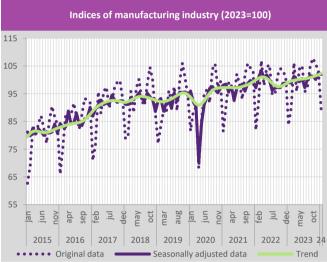

Observed by NACE Rev. 2, in January 2024, annual increase was recorded in electricity, gas, steam and air conditioning supply (11.7%) and manufacturing (6.7%), while a decrease was recorded in production in mining and quarrying of 1.1%. The largest increase in production was recorded in manufacture of computer, electronic and optical products (83.5%), while manufacture of machinery and equipment n.e.c. has decreased the most (-24.3%).

The industrial production volume in January 2024, in comparison to the same month in 2023, recorded an increase within 20 divisions, which accounts for 73% of the total industrial production, while a decrease in 9 divisions, which accounts for 27% of the total industrial production.

Observed by (Main industrial groupings) MIGs, the main contribution to the y-o-y increase of industrial production of 6.9% came from the production of intermediate goods except energy of 11.1% as a result of the growth of manufacture of basic metals. The production of non-durable consumer goods recorded growth of 7.0%, mostly due to the increase in the production of food products. The production of energy recorded a growth of 4.9%, as the result of the growth of electricity, gas, steam and air conditioning supply. The production of capital goods

increased by 6.9%, mostly due to the increase in production of computer, electronic and optical products, manufacture of other transport equipment, as well as manufacture of motor vehicles, trailers and semi-trailers. On the other hand, the production of durable consumer goods recorded a decline in production by 16.3%.

The seasonal adjustment of the industrial production index for January 2024, compared to December 2023, indicates an increase of 0.1% of the overall industrial production, and a decrease of 1.3% of manufacturing.

According to the SORS data, in January 2024 stocks decreased by 0.7% compared to January 2023. The largest growth was in the stocks of manufacture of computer, electronic and optical products (84.3%), while the largest annual decrease in stocks in January was recorded in the stocks of mining of metal ores (-29.5%).

**Retail trade turnover.** Retail trade turnover in January 2024 increased by 9.9% in nominal terms, while in real terms turnover registered an increase of 4.1% in comparison with January 2023. Compared to the average monthly retail trade turnover in 2023, the retail trade turnover in January 2024 decreased by 8.7% in real terms. Compared with the previous month, retail turnover in real terms registered a decrease of 20.3%.

Annual growth of the category food, beverages and tobacco in January was 12.0% in nominal terms, while in real terms is registered an increase of 4.7%. Category non-food products, except automotive fuel increased in nominal terms by 10.0% and increased by 4.7% in real terms. Motor fuel's turnover increased by 4.3% in nominal terms and increased by 1.2% in real terms.

Year-on-year increase in the retail trade turnover in January 2024 in nominal terms was observed in all the regions: Srbija – Jug by 11.6% and Srbija – Sever by 8.7% (Region Vojvodina by 12.4%). Observed in real terms, an increase in the retail trade turnover was registered in all regions and the highest real increase was observed in Region Vojvodina by 7.0%.

**Tourism.** Annual growth in the number of tourists' visits was registered at 8.3% in January 2024. In the same time, the number of overnight stays increased by 3.9% compared to the same month of the previous year. The number of foreign tourists' visits increased by 10.5%, while the number of their overnight stays increased by 1.2%. Share of the foreign tourists' visits and their overnight stays is 49.4% and 46.8%, respectively. The number of domestic tourists' visits increased by 6.3%. Also, the number of domestic tourists' overnight stays increased by 6.4%, compared to the same month in 2023.

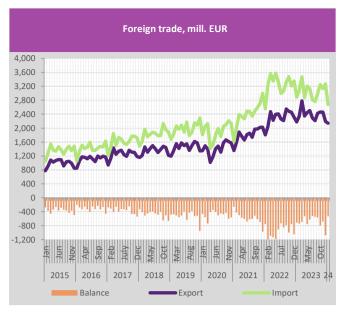

Most of the tourists in January 2024 originated from North Macedonia, Russia, Bosnia and Herzegovina, Montenegro and Türkiye (45.2% of the total number of foreign tourists' visits and 47.3% of their total overnight stays). In January, city of Belgrade had the largest number of tourist arrivals (30.3% of the total number of arrivals). A higher number of domestic tourists compared to number of foreign tourists was recorded in spas and mountain resorts, whereas in the other places most of the tourists were foreigners with share of 66.4% in the total number of arrivals (of which, foreign tourists share in the city of Belgrade was 83.1%).

#### 1.2. External Trade and Balance of Payments

*External trade.* In January 2024, it was exported EUR 2,142.3 million of goods, which is lower by 1.6% compared to the January 2023. The negative contribution to exports came from lower exports of the electricity and mining, while a positive contribution was recorded in manufacturing industry and agriculture. Import of goods amounted to EUR 2,675.0 mill., which is lower by 7.5% compared to the same month in previous year.

Foreign trade deficit amounted to EUR 532.7 million, which is lower by 25.3% compared to the same month in previous year, while 80.1% of the imports was covered by the exports.

Seasonally adjusted series shows that in January 2024 in comparison to the previous month, export decreased by 0.3%, while import decreased by 7.7%.

According to the SITC sections, in January 2024, the largest share in the exports came from the export of electrical machinery and apparatus (13.6%). Significant share in the exports also came from power engines and motors, non-ferrous metals, metal ores and residues, rubber products, n.e.c., which including electrical machinery amounted for 34.9% of total exports. In observed period, 28.9% of total imports came from oil and oil derivatives, electrical machines and apparatus, natural gas, medical and pharmaceutical products and road vehicles.

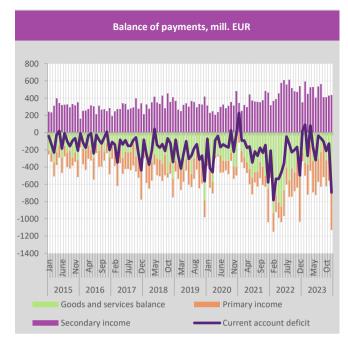

In observed month, positive trade balance (EUR 316.8 million) was achieved by the following sectors: miscellaneous manufactured articles, manufactured goods classified chiefly by material, machinery and transport equipment, crude materials, food and live animals, beverages and tobacco and animal and vegetable oils.

In January 2024, the largest external trade partners were EU countries on which related 67.9% of total exports and 56.7% of the total imports. In observed period, 38.5% of the total exports were related to the trade with: Germany, Italy, Hungary, Bosnia and Herzegovina and Czech Republic. Imports from Germany, China, Hungary, Italy and Russia accounted for 41.6% of the total imports. Surplus of EUR 365.5 million was achieved in external trade with Bosnia and Herzegovina, Montenegro, North Macedonia, Bulgaria, Finland, Croatia, Czech Republic, Slovakia, Sweden, Germany, Greece, USA, United Kingdom, Romania and France. The largest deficit was achieved in external trade with China (due to imports of telephones for network stations and laptops), Russian and Türkiye.

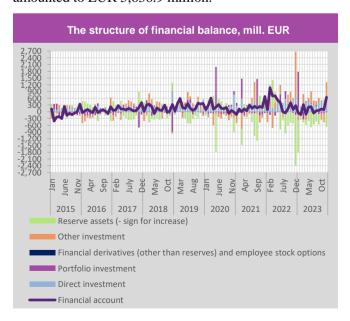

**Balance of payments**<sup>1</sup>. In December 2023, the current account recorded a deficit of EUR 695.4 million. Compared to December of the previous year, current account deficit is higher by EUR 199.5 million. The goods account recorded a deficit, which is higher by

11.5% compared to the same month of previous year, while the services account recorded a surplus, which amounted to EUR 267.8 million.

In December 2023, net inflow of foreign direct investments amounted to EUR 305.4 million. The total inflow based on FDI amounted to EUR 293.4 million.

During 2023, the balance of payments position of the country improved. The current account deficit in this year amounted to EUR 1,810.1 million and it was lower by EUR 2,352.1 million compared to the previous year, due to a significant reduction in the deficit on the goods and services account. The trade deficit is lower by EUR 2,760.0 million, while surplus in the services account increased by EUR 703.1 million and amounted to EUR 3,017.3 million. In the observed period, the primary income deficit increased by EUR 859.1 million or 28.6% year on year, while the surplus of secondary income amounted to EUR 5,636.9 million.

<sup>&</sup>lt;sup>1</sup> Since April 2014, Balance of Payments of the Republic of Serbia is being presented according to the Balance of Payments Manual and international investment position, VI edition of the International Monetary Fund (BPM6).

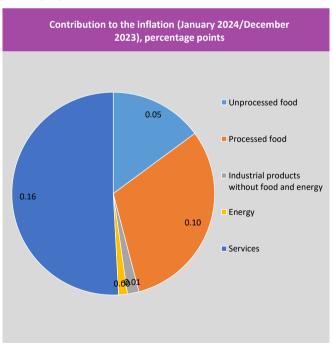

In the observed year, the net inflow of foreign direct investments amounted to EUR 4,219.7 million, which represents a decrease of 2.5% compared to the same period of the previous year. Also, at the same time, a net inflow of portfolio investments was recorded in the amount of EUR 917.8 million.

#### 1.3. Inflation

In January 2024, the growth of consumer prices continued to slow down, so it amounted to 6.4% year on year.

On the monthly basis, consumer prices increased in January by 0.3%.

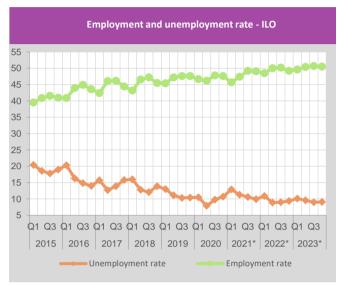

At the same time, core inflation was significantly lower and amounted to 5.9% y-o-y, which was significantly influenced by the preserved stability of the exchange rate and by inflation expectations of the financial sector within the target.

#### 1.4. Labour market

Looking into the data from the CROSO registry average number of formally employed in January 2024 increased by 0.8%, y-o-y, which is primarily the result of growth in employment in the private sector. At the same time, most significant growth in employment was recorded in scientific and technical activities and health care.

According to data from the Labour Force Survey in the fourth quarter of 2023, there was a year-on-year increase in the employment rate by 1.3 pp to 50.5%, while the unemployment rate decreased by 0.3 pp and totalled 9.1%, while at the same time the rate of the population outside the labour force decreased by 1.3 pp.

\* ILO data from 2021 are provided according to the new methodology.

According to the National employment agency data at the end of January, number of unemployed persons actively seeking employment totalled 393.1 thousand, which is a decline compared to the same month of the previous year by 8.8%.

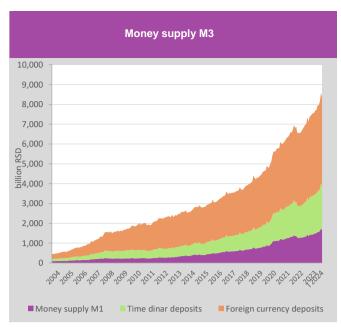

*Salaries.* In December 2023, the average net salary increased by 4.9%, y-o-y, in real terms. Observed by activities, the most significant real wage growth was recorded in manufacturing, trade, state administration and defence and education.

**Pensions.** Average paid pension in January 2024 increased compared to the same month of previous year by 13.7%, in real terms, and amounted to RSD 45,742.

#### 1.5. Monetary developments

In January 2024, NBS kept its key interest rate at the level of 6.50%.

Through January, banks as largest single investors in state treasury bills increased their invested funds on that basis by RSD 5.1 billion. Compared to the same month in the previous year, banks increased their invested funds by RSD 54.6 billion.

At the end of January 2024, compared to same month of the previous year, bank loans to economy registered decrease of 0.5%, while loans to households increased by 1.4%. At the same time, bank deposits registered growth of 13.2%. In structure of loans to economy by destination, biggest share had loans for current assets and investment loans (44.2% and 40.2%, respectively), with yearly decrease of loans for current assets by 1.9% and increase of investment loans by 2.6%. At the same time at loans landed to households, biggest share had cash loans (44.4%) with yearly growth of 4.0% and housing loans (39.0%), which decreased by 1.4% yearly.

In structure of bank sources of funds, dominant share had borrowed sources. At the end of January 2024, in total fund sources borrowed sources share was 89.4%, which is an increase of 0.4 pp y-o-y, while in comparison to the previous month increased by 2.0%. In currency structure of funds, foreign currency sources share was 49.0%, and compared to the same month of previous year decreased by 2.4 pp, while compared to the previous month increased by 0.9 pp.

NBS foreign exchange reserves increased by EUR 127.8 million compared to previous month, while compared to the same month of previous year increased by EUR 4.1 billion and totalled EUR 25.0 billion at the end of January 2024. The increase in FX reserves reflects primarily net allocations of bank FX required reserves, FX reserves management, grants and other sources. Level of NBS foreign exchange reserves was sufficient for coverage of 177.4% of M1 monetary aggregate and for coverage of around 6.8 months of imports of goods and services.

Household foreign currency savings at the end of January 2024 compared to previous month increased by EUR 234.7 million and totalled EUR 14.7 billion. Compared to same month of the previous year foreign currency savings increased by EUR 0.9 billion.

Developments on the foreign exchange market in January 2024 compared to previous month were characterized by real appreciation of dinar against Euro of 0.7%, while in nominal terms remained unchanged. In comparison to the same month of the previous year, foreign exchange rate recorded nominal and real appreciation of 0.1% and 3,6%, respectively. In order to mitigate extensive daily oscillations of exchange rate, NBS throughout January intervened on the foreign exchange market by net selling EUR 45 million.

#### 1.6. Financial markets

In January 2024 Belgrade stock exchange registered total turnover of securities in amount of RSD 2,401.5 million, from which turnover of shares and Republic of Serbia bonds (RS bonds) totalled RSD 235.4 million and RSD 2,166.1 million, respectively. In comparison to the same month of previous year, total turnover increased by 24.7%. Total number of transactions decreased from 1,426 in January 2023 to 1,261 in the same month of 2024.

Total market capitalization at the end of January 2024 amounted to RSD 425.7 billion and increased by 0.2% compared to previous month, while compared to same month of previous year increased by 1.2%.

In January 2024 foreign investors share in total turnover accounted for 0.84% and decreased by 1.74 pp in comparison to same month of the previous year. Share of foreign investors in turnover of shares increased by 7.40 pp and amounted to 8.59%, while there was no turnover of foreign investors in RS bonds, which represents a decrease of 2.67 pp compared to same month in the previous year.

During January 2024 on Belgrade stock exchange index BELEXline registered increase in value of 0.7% and totalled 1,927.70 index points, while the value of BELEX15 index increased by 0.2% and totalled 877.28 index points. Compared to the same month of the previous year, index BELEXline increased by 9.2% and index BELEX15 increased by 2.0%.

#### 1.7. International environment

According to the Eurostat's estimation, GDP growth in Q4 2023 in the euro area and the EU27 increased by 0.1% and 0.2%, respectively, compared to the same quarter 2022, while comparing to the previous quarter, both stagnated. According to the Winter EC outlook, the projected growth will amount to 0.8% in 2024, with mild growth increase to 1.5% in 2025, while the average yearly inflation will slow from 5.4% in 2023 to 2.2% in 2025. Uncertainty and risks to the projection are still pronounced and related to the further course of the conflict in Ukraine and the Middle East, the potential disruption of supply chains and persistent price pressures, as well as climate change.

Average prices of agriculture products have increased by 1.9% in January 2024 compared to the previous month, while food prices increased by 0.9%. Base metal prices decreased by 0.6%, compared to the previous month, while the price of iron ore decreased by 0.7%, cooper prices also decreased by 0.7%. According to the World Steel Association, world production of steel

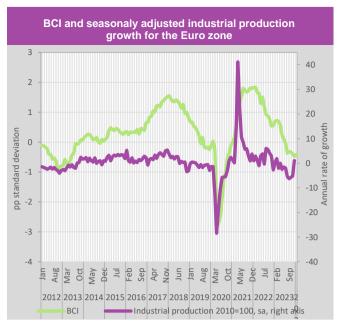

decreased by 1.6% y-o-y, while in China decreased by 6.9% y-o-y (which is somewhat more than a half of World production). In the group of precious metals, the price of gold remained unchanged, while the price of silver decreased by 4.4%.

Value of the Composite PMI index in January amounted to 47.9 ip (up by 0.3 ip compared to previous month), due to the mildly positive developments of services sector output. Economic Sentiment Indicator (ESI) stagnated in the EU27 (95.8 ip), while in the euro area decreased by 0.3 ip (96.1 ip), compared to previous month.

At the end of January 2024, the unemployment rate in the euro area and EU27 amounted to 6.4% and 6.0%, respectively. At the same time, unemployment rate in Germany and Italy was 3.1% and 7.2%, respectively. At the same time, according to the data of the Russian Statistical Office, in the Russian Federation the unemployment rate was 2.9%.

Trend of inflation during January slightly decelerated, when inflation of 2.8% was registered in the euro area, while inflation of 3.1% was recorded in the EU27. At the same time, inflation of 3.1% and 0.9% was registered in Germany and Italy, respectively. Observed by categories the increase in the prices was recorded in services, food, alcohol and tobacco and non-energy industrial goods, while energy recorded decrease in prices. In Russia, the annual inflation reached 7.4%.

In January, ECB decided to keep the interest rate at the level of 4.50%. Also, in the second half of the year, PEPP and APP programmes will be gradually reduced and monitoring of refinancing operation of banks will be continued to assess their contribution to monetary policy stance. In January, FED kept key interest rate to an interval of 5.25% to 5.50%.

According to the OPEC data, the price of oil type Urals has amounted to 62.36 \$/barrel in January, which is 4,0% higher compared to the previous month. In January 2024, the price increased by 40.5%, compared to the same month in 2023.

1 From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. 2 Including turnover generated by legal entities and entrepreneurs. 3 Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products. 4 Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. 5 Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. 6 Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. 7 GFS-1986 methodology. 8 Data on foreign currency savings since December 2012 according to new methodology of NBS. 9 SORS changed data for employment. Without registered individual agricultural workers. 40 Population aged 15 and above. 41 New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. 12 Since 2012 with professional army servicemen.

\* Preliminary annual data. \*\* SORS estimation. ¹ MoF estimation. ² From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. 3 Including turnover generated by legal entities and entrepreneurs. 4 From 2022, data on tourist traffic (number of tourist arrivals and overnight stays) and accommodation capacities are published on the basis of statistical processing of data taken from the administrative source, the Central Information System in Catering trade and Tourism (eTourist). 5 Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products. <sup>6</sup> Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. <sup>7</sup> Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. <sup>9</sup> GFS-1986 methodology. <sup>10</sup> Data on foreign currency savings since December 2012 according to new methodology of NBS. <sup>11</sup> SORS changed data for employment. Without registered individual agricultural workers. <sup>12</sup> Data from 2010, given according to the new methodology, which has been in use since 2021, refers to the population aged 15 and over. <sup>13</sup> New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. <sup>14</sup> Since 2012 with professional army servicemen. <sup>15</sup> Data was calculated on the basis of demographic estimates for 2022, according to 2022 Population Census, and are not comparable with previous data.

<sup>&</sup>lt;sup>1</sup> New methodology for salaries, which is applied from 2009 as SORS extended coverage of observation units. In calculation of average salaries, beside salaries paid to employees in enterprises, institutions and organizations, into account are taken also salaries paid to entrepreneurs, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. <sup>2</sup> Every year in Health and social work section half of salary is paid in December and another half in January. <sup>3</sup> Since 2012 with professional army servicemen.

<sup>\*\*</sup> not including activated guarantees for PE Roads of Serbia, which are included in debt repayment to foreign creditors

\*\* 16.9 billion RSD of 39.5 billion RSD on domestic borrowing in July 2009 belongs to PE "Serbian Roads" used for repayment of debt to creditors

\*\*\* including repayments of Old foreign currency savings and Loan for economic recovery (Rehabilitation loan)

\*\*\*\* subsidies incl. RSD 23.4 bill for PE Srbijagas debt and RSD 10.1 bin for subsidies in agriculture. Social assistance incl. RSD 10 bin for military pensions. Total sum included under domestic borrowing

\*\*\*\*\* Subsidies incl. RSD 13 bin for Petrohemija debt assumption

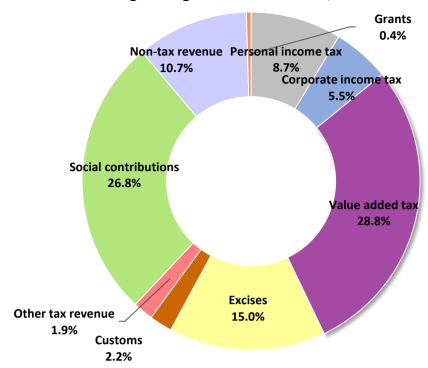

Note: The Budget System Law envisages the dynamics of the inclusion of entities in order to achieve a comprehensive coverage of the general government sector, in accordance with international standards. According to the predicted dynamics, beneficiaries of the funds of the Republic Fund for Healthin Insurance, with all sources of financing, are included in the reporting from January 1st, 2023. According to the above, the data for the general government sector in 2022 and 2023 contain both revenues and expenditures from own and other sources of financing (except those from the Health Fund) of health institutions, while the comparability of the series for the years before 2022 will be provided in the following period.

<sup>\*</sup> Adjusted contracted amounts include changes that occurred during the implementation of financed projects, determined by the final calculation at the handover of the performed works, due to deficiencies in relation to the contracted quantities of works and realized savings, etc. Also, deviations may occur by automatic cancellation of unused funds when the loan availability period expires or at the request of the borrower. The adjusted contractual amounts represent the principal to be repaid.

<sup>\*\*</sup>For the purpose of protection against foreign exchange and interest rate risk, a hedging transaction (interest rate and currency swap) was realized, by which the liabilities of the Republic of Serbia on the basis of a ten-year bond issued in the amount of USD 1.2 billion at a coupon rate of 2.125% were converted and presented in euros, at a significantly lower interest rate of 1.066%.

<sup>\*\*\*</sup>Hedging transaction (interest rate and currency swap) was realized \_ original loan currency is shown in EUR

# **METHODOLOGICAL EXPLANATIONS**

# ECONOMIC, FISCAL AND PUBLIC DEBT STATISTICS

1. Economic statistics (tables in Chapter I, Macroeconomic Developments) are based primarily on the statistical methodology and data provided by the Statistics Office of the Republic of Serbia, National Bank of Serbia, National Employment Agency, Privatization Agency, Belgrade Stock Exchange, Pension and Disability Insurance Fund of the Republic of Serbia etc

Economic Statistics contained in the Chapter I includes: main indicators of macroeconomic developments in the annual and monthly dynamics for the current year; gross domestic product (GDP) in constant prices and its growth rates by quarters and usage of GDP; trends in physical volume of industrial production in monthly dynamics (total, by sections and economic purpose); consumer prices trends in annual and monthly dynamics; developments of overall consumer prices (in total and by components) in monthly dynamics for current year; producer prices of industrial products for domestic market and for export in annual and monthly dynamics; developments of exports in monthly dynamics; prices of external trade in annual, quarterly and monthly dynamics; developments in Foreign direct investments in quarterly dynamics; external debt in annual dynamics and in last month of current year; balance of payments in annual and monthly dynamics; monetary survey by years; main monetary indicators, household savings and foreign exchange reserves, total number of employed and unemployed and average net salaries and pension benefits (in dinars and annual real growth rates) in annual and monthly dynamics; an overview of privatization results in annual dynamics and for a specific period of the current year for which there are available data; an overview of trends of indices; market capitalization and foreign investors participation in total turnover on Belgrade Stock Exchange; an overview of turnover of securities on the Belgrade Stock Exchange; an overview of auctions of Republic of Serbia treasury bills in annual dynamics and on daily basis.

2. Fiscal statistics (tables in Chapter II Fiscal Developments) is based on the GFS methodology and data of the Ministry of Finance, Treasury Administration and Public Debt Administration.

Starting from Memorandum on the Budget and Economic and Fiscal Policy for 2009 with projections for 2010 and 2011, IMF methodology - Government Finance Statistics is used to present and create projections for fiscal aggregates. All data in this bulletin have been computed by using the same methodology basis.

The main objectives of alignment with methodology of Government Finance Statistics is the possibility to perceive macroeconomic implications of fiscal policy. It is particularly important to perceive the influence of fiscal policy on domestic demand, hence every item of revenues and expenditures is considered from its aspect, regardless of its classification in accounting.

Here is a comparative overview of the previous and the new methodology of government finance statistics.

- The level of observation is consolidated 1. government sector that comprises the following levels of government: the central government – budget of the Republic of Serbia and Social Security Organizations; local government – budget of the Autonomous Province of Vojvodina and budgets of municipalities and towns; public road company Putevi Srbije and Koridori Srbije Ltd.
- Coverage of data: beside budget resources, application of this methodology in computation of fiscal aggregates includes other sources of financing – a part of own resources of government bodies, donations, loans and privatization receipts. The previous coverage included only budget resources and expenditure financed from budget resources.
- The method of computation of results: The deficit or surplus of consolidated government sector is the difference between revenues and overall expense plus net budget borrowing. The category of net landing is treated as an expense in cases when the purpose of the spending is implementation of a government policy, while if expense is made in order to manage liquidity, it becomes a financing item, without any influence on the government's result.
- The difference in accounting and statistical coverage of particular items of expenditure: in view of the primary objective – gaining insight into macroeconomic implications of the fiscal policy, particular items of the expenditure, e.g. repayment of debt to pensioners, which is treated in accounting as a part of repayment of debt – without influence on the result, statistically is treated as transfer to citizens and on ground influences increase in domestic demand. Mobile telephony license, treated in accounting as current non-tax revenue, in view of its one-time character is now treated as part of financing.

With advancement of accounting base - i.e. with transition to accrual basis in recording government transactions – conditions will be created for further enhancement of government finance statistics methodology and for alignment with the EU (ESA 95). The Ministry of Finance is responsible for collection and processing of fiscal data. Fiscal statistics includes: consolidated balance of the general government sector and particular balances, i.e. budget of the Republic of Serbia (central government), budget of AP Vojvodina, budget of local authorities, financial plans of social security organizations and off-budget users. Public road companany Putevi Srbije and Koridori Srbije Ltd. have been involved in reports since their foundation, and as of 2024, other extrabudgetary units such public agencies and institutes have been included, whose list is publicly available on the website of the Treasury Administration.

General government. General government sector comprises all the levels of government in the country. Subsectors that form general government include: central government – budget of the Republic of Serbia, provincial government - AP Vojvodina, local government – municipalities, towns, social security funds, public road company Putevi Srbije and Koridori Srbije Ltd. Fiscal statistics, with regard to the individual state subsectors, is especially significant for the understanding of interrelation between different governmental levels, separation of functions as well as division of revenues. It is important to determine the amounts and the flow of transfers between governmental levels, which is achievable only owing to the individual and separate balances of all governmental levels. However, only the data presenting the entire general government may provide the information concerning the amount of fiscal operations of the state, consumption of the state and its aggregate demand influence macroeconomic stability, reallocation of collected funds originating from other economic sectors, burden of taxation of the economy, tax structure etc.

Central government – budget of the RoS. Central government comprises all the ministries, agencies, and other special organizations defined as direct or indirect republic budget beneficiaries.<sup>2</sup> The Government may define and achieve set goals concerning economic policy at the level of the entire country, primarily through the implementation of certain measures and programmes by the means of the budget of central government. Other governmental levels do not economic policies concerning the national level. The more centralized is the country, the more significant are the data related to this level of government<sup>3</sup>.

**AP** – **Vojvodina**. Budget of AP Vojvodina comprises all governmental authorities and other special organizations defined as AP Vojvodina budget beneficiaries.

**Local self-government**. Data concerning local self-government relate to the data collected in all cities and municipalities constituting the local self-government system. The coverage of data at the level of cities or municipalities relate to all direct or indirect budget beneficiaries of a city or a municipality. The budget beneficiary of a city or a municipality is an institution primarily financed from the funds originating from the local government. Local government controls its business activities and it performs certain functions through the institution<sup>4</sup>.

**Social security organizations.** Social security organizations include the Pension and Disability Insurance Fund, Republic Health Insurance Fund, Military Health Fund and National Employment Service.

Other extrabudgetary units. Other extrabudgetary units refer to institutions and other legal entities that are formally not part of any level of government, but are subjected to significant state involvement in management, control and financing.

**Public road company Putevi Srbije.** Revenues of Putevi Srbije have the character of public revenues (toll and transfers from republican budget), and repayment of a large part of the company's debt takes place from the Republic of Serbia budget, therefore the company is treated as a part of the general government sector.

**Koridori Srbije LTD.** are a Government owned company, responsible for investment in road infrastructure.

#### **BASIC FISCAL AGGREGATES**

Basic fiscal aggregates are total public revenues, total public expenditures, and the result of the difference between these two categories, which is defined as surplus or deficit in the consolidated balance of general government or balances of individual governmental levels.

92 Public Finance Bulletin, January 2024

Ministry of Finance

<sup>&</sup>lt;sup>2</sup> Indirect republic budget beneficiaries are primary and secondary schools, faculties, scientific institutes, social welfare institutions, cultural institutions and other institutions partly financed from the Republic budget.

<sup>&</sup>lt;sup>3</sup> The largest amount of tax revenues, apart from property taxes, pertains to the budget of the RS. Income tax is renounced in the legally defined percentage to the local self-government, whereas a part of the revenues collected from income taxes realised in the territory of Vojvodina pertains to the AP Vojvodina. This shows the importance of the central governmental level in the country.

<sup>&</sup>lt;sup>4</sup> Primary and secondary schools pertain to the central government as their financing is mostly provided from that level. A part of material expenses of schools is financed from local self-government funds but not in the extent sufficient for pertaining of these institutions to the local government. Pre-school institutions are local budget beneficiaries. When reviwing data regarding their revenues and expenditures, they are included in the local government level.

**Total public revenues** are divided into two basic categories: current revenues and yield on capital.

Current revenues are divided into tax and non-tax revenues.

The basic characteristics of **tax revenues** is their mandatory nature and non- existence of any direct reciprocal service for the payment of taxes. The state collects taxes finances certain state functions from collected funds. The benefits related to certain functions cannot be directly connected to an individual who paid the tax.

**Income tax** comprises wage tax, as well as taxes on other forms of earnings of individuals, beside the wages.

**Corporate income tax** comprises, in addition to corporate profit tax narrow meaning of the term, also tax on dividends paid to the residents and non-residents, as well as the tax on interests, royalties and capital incomes realized by non-residents.

**VAT** comprises national VAT, import VAT, and the arrears of turnover taxes from the previous years.

**Excise duties** present consumption taxes concerning specific products such as oil, tobacco, coffee, alcoholic beverages etc.

**Customs duties** and other import duties comprise revenues from duties paid for import of goods and services, with the exception of the VAT on imported goods that is included in VAT revenues.

Other tax revenues comprise taxes on use, ownership and carrying of goods, and other taxes. The property tax of local government is included in the category of other tax revenues in the general government consolidated balance.

Non-tax revenues are heterogenic category of revenues including property revenues (collected interest, rental fees) compensations, taxes, fines and other revenues that cannot be classified. As opposed to tax revenues, non-tax revenues imply the existence of reciprocal favour for the sum collected - e.g. the compensation for the usage of natural resources. However, there are revenues that may by their characteristics be classified as non-tax revenues, but without implying the reciprocal favour for the collection. Fines are a typical example of this sort of revenue.

**Capital revenues** comprise only revenues originating from the sale of capital goods, as well as the capital

transfers from non-governmental institutions. The sale of capital goods imply the sale of non-financial assets, buildings, inventories and state-owned land.

**Total expenditures** in the Bulletin of Public Finance are presented according to the economic classification emphasizing the type of expenses, i.e. its economic characteristics and influence of state consumption on the market of goods and services, financial market and reallocation of income. In addition to the economic classification of expenditure, there is also a functional classification emphasizing the function the state performs by using of funds for specific purposes<sup>5</sup>. The Bulletin of Public Finance does not contain expenditures classified in accordance with the functional classification.

Overall expenditure is divided into current expenses, capital expenses and net budget borrowing.

**Current expenses** present final budget outflows, and are not intended for the procurement of non-financial assets.

Compensation of employees comprise (net) salaries of employees including income tax and contributions paid by employees, contributions paid by employers, as well as other fringe benefits (transport allowance, sick leave allowance for the period up to 30 days etc.).

**Procurement of goods and services** comprise payments related with coverage of business expenses (electricity, phone bills etc.), business trips, services contracts, current maintenance and procurement of material.

**Repayment of interests** is divided into repayment of interests on domestic debt, interests on external debt, interests based on activated guarantees and accompanying borrowing expenses.

**Subsidies** comprise all the funds transferred to the economic sector (public enterprises, registered agricultural holdings etc.) for the coverage of running expenses or/and the grant intended for current business activities.

Social insurance and social welfare expenses include payments to person insured with social security organizations (pensions of beneficiaries of Pension and Disability Insurance Fund, sick leave benefits paid by the Republic Health Insurance Fund, unemployment benefits paid by the National Employment Service, Repayment of debt to pensioners, children and family benefits, benefits for war-disabled persons, pregnancy leave benefits,

Public Finance Bulletin, January 2024

Ministry of Finance

<sup>&</sup>lt;sup>5</sup> Division of expenditures according to the functional classification is the following: general public services, defence, internal security, economic affairs, environmental protection, housing construction and municipal services, healthcare, recreation, culture and religion, education and social welfare.

housing benefits, Military Health Fund expenditures etc.

Other current expenses include grants to non-governmental organizations, mandatory levies and penalties imposed by one governmental level to another, fines and penalties imposed by courts and judicial bodies, injury compensations or compensations for damages incurred by natural disasters, and damages incurred by the public bodies.

Capital expenses comprise all the payments intended for the procurement of non-financial assets, construction of buildings and infrastructure, procurement of equipment and inventories and the purchase of land.

**Net lending** are expenses for purchase of financial assets whose objective is implementation of a particular government policy.

General government consolidated balance contains consolidated revenues and consolidated expenditure.

Consolidated revenues are aggregate revenues of individual governmental levels, but in the consolidation procedure, transfers received from other governmental levels are excluded. In the consolidation procedure, benefits paid by general government in the function of employer are excluded from the revenues of mandatory social insurance organizations.

**Consolidated expenses** present aggregate expenditures of individual governmental levels, while in the consolidation procedure, transfers provided from one governmental level to another are excluded. In the consolidation procedure, expenditures paid by general government in the function of employer are excluded from the expenditures.

**Consolidated surplus / deficit** is a difference between consolidated revenues and consolidated expenditure.

Balance surplus/ deficit of individual governmental levels is a difference between total revenues and total expenditures, at a particular governmental level.

**Earnings** not included in the revenues of general government present earnings based on domestic and external borrowing and earnings based on the privatization of state-owned enterprises.

**Expenses** that are not included in general government expenses are those for repayment of principal of national and foreign debt and expenses for purchase of financial assets that cannot be classified as net lending.

**3. Public Debt Statistics** (Tables in Chapter III – Public Debt) is based on the data of the Republic of Serbia Treasury Administration. The public debt of the Republic of Serbia consists of direct liabilities (received loans) and indirect liabilities (issued guarantees).

#### 1. Direct Liabilities

Direct Liabilities of the RoS are those incurred on the basis of the loans taken. Direct liabilities, depending on the creditor, constitute the following: (1) domestic debt and (2) foreign debt.

**Domestic Debt** consists of liabilities carried over from the past, and liabilities stemming from short-term treasury notes. The largest share in the domestic debt is the one of the frozen foreign currency savings, which also constitutes the largest individual debt in the public debt of the RoS.

**Foreign Debt** consists of (1) rescheduled old debt and (2) new borrowing.

The rescheduled debt consists of: (1) the debt towards International Bank for Reconstruction and Development (IBRD, A, B, C), (2) debt towards the Paris Club of Creditors, (3) debt towards the London Club of Creditors, (4) debt towards Council of Europe Development Bank (CEB).

#### 2. Indirect Liabilities

Indirect liabilities of the RoS are those incurred on the basis of the issued guaranties. Due to the fact that the guarantees that have been issued up to date were related with loans taken from foreign creditors, total indirect liabilities fall under the category of foreign debt.

#### **Public Debt to Gross Domestic Product Ratio**

Debt to GDP ratio is one of the most important indicators of the public debt sustainability and one of the convergence criteria for joining the EMU.

#### **Structure of Interest Rates**

The ratio between the fixed and variable interest rates in the public debt of Serbia is distinctly favourable. High share of the fixed interest rates provides high level of predictability of future liabilities arising from the interest and thus the Republic of Serbia is not exposed to the interest rate risk.

#### The Public Debt Currency Structure

The public debt consists of different currencies. The largest share, however, is the debt denominated in Euros and US Dollars.
