# CURRENT MACROECONOMIC AND FISCAL DEVELOPMENTS

## 1. Current macroeconomic developments

### 1.1. Economic activity

**Gross domestic products.** According to the flash estimate of the Statistical Office of the Republic of Serbia (SORS), in the second quarter of 2022, real GDP increased by 4.0% in comparison to the corresponding period of the previous year.

**Industrial production.** According to the Statistical Office of the Republic of Serbia (SORS) data, industrial production in June 2022 has increased annually by 3.7%, while compared to the average industrial production in 2021 increased by 4.5%. The largest influence on industrial production growth in June 2022 compared to June 2021 had the divisions of: mining of metal ores, manufacture of coke and refined petroleum products, manufacture of food products, manufacture of fabricated metal products, except machinery and equipment, as well as manufacture of basic pharmaceutical products and pharmaceutical preparations.

Observed by NACE Rev. 2, in June 2022, annual increase was recorded in mining and quarrying of 21.6% and manufacturing of 3.2%, while a decrease was recorded in electricity, gas, steam and air conditioning supply of 4.1%. The largest increase in production was recorded in manufacture of computer, electronic and optical products (47.9%), while manufacture of basic metals has decreased the most (-22.9%).

The industrial production volume in June 2022, in comparison to the same month in 2021, recorded an increase within 18 divisions, which accounts for 60% of the total industrial production, while a decrease in 11 divisions, which accounts for 40% of the total industrial production.

Observed by the Main industrial groupings (MIGs), in June 2022, compared to June 2021, an increase in the production was recorded in capital goods (9.1%), non-durable consumer goods (5.3%), energy (3.9%) and intermediate goods, except energy (1.4%), while a decrease was recorded in the production of durable consumer goods (-4.9%).

In the first six months it was recorded an increase of industrial production of 3.3% y-o-y. Observed by MIGs, the main contribution to the increase of industrial production came from the production of intermediate goods except energy of 9.7%, primarily as the result of the growth of mining of metal ores. The food and pharmaceutical industries had the most significant contribution to the growth of non-durable consumer

goods of 4.2%. The production of capital goods increased by 8.6%, mostly due to the increase in the production of machinery and equipment n.e.c. and manufacture of other transport equipment. On the other hand, the decline in energy production of 4.9% was mostly due to the decline in production of electricity, gas, steam and air conditioning supply. Also, the production of durable consumer goods decreased by 8.0%, mostly due to the decline in manufacture of electrical equipment.

The seasonal adjustment of the industrial production index for June 2022, compared to May 2022, indicates a decrease of 0.1% of the overall industrial production and a decrease of 2.4% of manufacturing.

According to the SORS data, in June 2022 stocks increased by 1.0% compared to June 2021. The largest annual decrease in stocks in June was recorded in the

stocks of mining of metal ores (-63.5%), while the largest growth was in the stocks of manufacture of basic metals (66.0%).

**Retail trade turnover.** The retail trade turnover in June 2022 increased by 21.7% in nominal and increased by 4.8% in real terms, compared to June 2021. Also, in June, turnover in real terms, increased by 8.4% compared to the average monthly retail trade turnover in 2021, while compared to the previous month, increased by 2.6%.

Annual growth of the category food, beverages and tobacco was 19.6% in nominal terms, while in real terms increased by 2.5%. Category non-food products, except automotive fuel increased in nominal and real terms by 13.1% and 3.1%, respectively. Motor fuel's turnover increased by 42.8% in nominal terms and increased by 12.3% in real terms.

Increase in the retail trade turnover in nominal terms was observed in all the regions: Srbija – Jug by 28.6%, Region Vojvodine by 22.2% and Srbija – Sever by 17.3%, y-o-y. Observed in real terms, growth in the turnover was registered in all the regions, and the biggest increase of 10.1% y-o-y was recorded in the Srbija – Jug.

In the period January–June 2022, compared with the same period of 2021, the retail trade turnover increased by 22.2% in nominal and by 8.1% in real terms.

**Tourism.** Annual growth in the number of tourists' visits was registered in June 2022 (42.6%). At the same time, the number of overnight stays increased by 24.0% compared to the same month of the previous year. The number of domestic tourists' visits increased by 19.6%, while the number of their overnight stays increased by 11.5%, compared to the same month in 2021. Also, the number of foreign tourists' visits increased by 84.6% and the number of their overnight stays increased by 48.3%. Share of the foreign tourists' visits and their overnight stays was 45.9% and 40.4%, respectively.

Most of the tourists in June 2022 originated from Bosnia and Herzegovina, other non-European countries, Turkey, Germany and Russia (34.3% of the total number of foreign tourists' visits and 41.0% of their total overnight stays). In June, city of Belgrade had the largest number of tourist arrivals and overnight stays (29.2% of the total number of arrivals and 26.2% of the total number of overnight stays). A higher number of domestic tourists compared to foreign tourists was recorded in spas and mountain resorts, while in other places most of the tourists were foreigners with share of 61.3% in the total number of arrivals (of which, foreign tourists share in the city of Belgrade was 83.6%).

In the period January–June 2022, the number of tourists and their overnight stays totalled 1.624,081 and 4.992,483, respectively. The number of tourists' visits increased by 65.4%, while the number of their overnight stays increased by 43.1%, compared to the same period of 2021. Also, the number of domestic tourists' visits

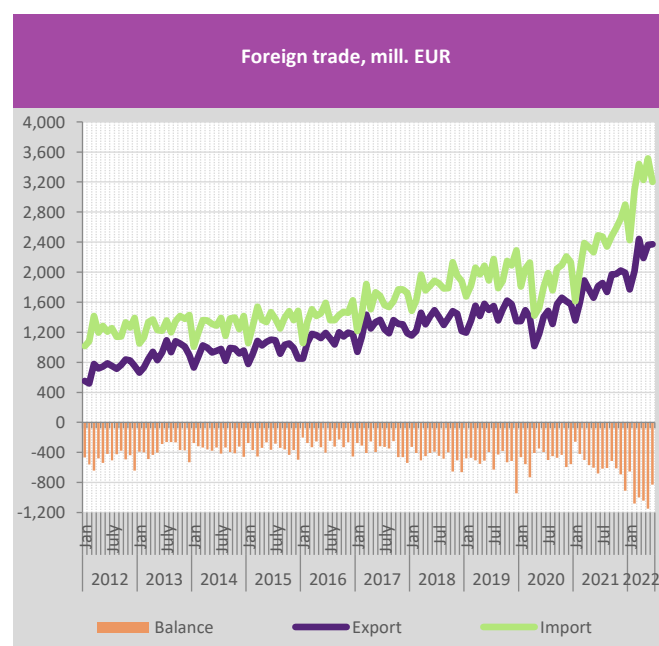

increased by 35.8%, while their overnight stays increased by 23.8%. At the same time, the number of foreign tourists' visits increased by 135.7%, while their overnight stays increased by 84.6%.

## 1.2. External Trade and Balance of Payments

**External trade.** In June 2022, it was exported EUR 2,372.1 million of goods, which is higher by 30.8% compared to the June 2021. The biggest contribution to the growth of exports came from the exports of metal ores (6.4 pp), manufacture of food products and manufacture of electrical equipment with the same contribution (2.6 pp). Import of goods amounted to EUR 3,202.8 mill, which is higher by 28.6% compared to the same month in previous year.

Foreign trade deficit amounted to EUR 830.7 million, which is higher by 22.5% compared to the same month in previous year, while 74.1% of the imports was covered by the exports.

Seasonally adjusted series shows that in June 2022 in comparison to the previous month, export decreased by 7.8%, while import decreased by 10.1%.

In the period January–June of 2022, exports amounted to EUR 13,147.3 million, which is higher by 30.5%, while imports amounted to EUR 18,902.0 million, which is higher by 44.2%, compared to the same period of previous year. During the observed period, trade deficit amounted to EUR 5,754.7 million, which is higher by 89.9%, compared to the same period of previous year.

According to the SITC sections, in the first six months of 2022, the largest share in the exports came from the export of electrical machinery and apparatus (11.2%). Significant share in the exports also came from metalliferous ores and metal scrap, iron and steel, power-generating machinery and equipment, vegetables and fruit, which including electrical machinery amounted for 32.6% of total exports. In observed year, 28.0% of total imports came from petroleum and petroleum products, import of gas, natural and

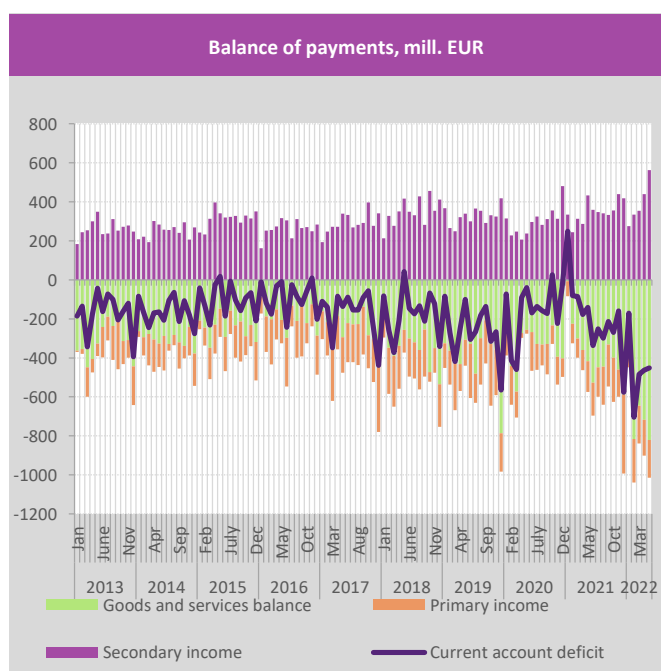

manufactured, electrical machinery and apparatus, medicinal and pharmaceutical products and general industrial machinery and equipment.

In observed period, positive trade balance (EUR 1,730.7 million) was achieved by the following sectors: crude materials, food and livestock, miscellaneous manufactured products, beverages and tobacco and animal and vegetable oil.

In the first six months in 2022, largest external trade partners were EU countries on which related 64.4% of total exports and 54.9% of the total imports. In observed period, 38.6% of the total exports were related to the trade with: Germany, Italy, Bosnia and Herzegovina, China and Hungary. Imports from China, Germany, Russia, Hungary and Italy accounted for 45.1% of the total imports. Surplus of EUR 1,686.8 million was achieved in external trade with Bosnia and Herzegovina, Montenegro, North Macedonia, Romania, Slovakia, Croatia, United Kingdom, Sweden, Bulgaria and Spain. The largest deficit was achieved in external trade with China (due to imports of telephones for network stations and laptops), Russia and Turkey.

**Balance of payments<sup>1</sup>.** In May 2022, the current account recorded a deficit of EUR 452.2 million, which is higher by EUR 310.3 million, compared to the same month of previous year. Higher current account deficit was due to higher deficit on goods and services account and primary income deficit. The goods deficit is higher by EUR 412.4 million, while the services account recorded a surplus, which amounted to EUR 120.7 million.

In May 2022, net inflow of foreign direct investments amounted to EUR 346.1 million. The total inflow based on FDI amounted to EUR 386.7 million.

In the first five months of 2022, the current account deficit amounted to EUR 2,275.4 million, due to higher deficit on goods and services account, but also due to higher primary income deficit. The trade deficit increased by EUR 2,074.7 million, while surplus in the services account increased by EUR 39.4 million and amounted to EUR 722.1 million. In the observed period primary income deficit increased by EUR 360.3 million, mainly due to higher outflows of investment income. The secondary income surplus is higher by EUR 355.7 million, compared to the same period of previous year and amounted to EUR 1,967.0 million.

In the observed period, net inflow of foreign direct investments amounted to EUR 1,026.6 million, which is lower by 19.9%, compared to the same period of previous year. Also, at the same time, other and portfolio investments recorded net outflow of EUR 1,011.6 mill and EUR 386.4 mill, respectively.

### 1.3. Inflation

Inflation has been at a higher level since the middle of 2021 compared to the previous period. This inflation trend was influenced by the growth of world prices of oil, primary agricultural products and industrial raw materials, delays in global supply chains, increased transport costs, but also its low base value. Thus, in June 2022, the growth of consumer prices was above the upper limit of the allowed deviation from the inflation target, so it amounted to 11.9% year on year. In this period, around three quarters of inflation was determined by the increase in prices of food and non-alcoholic beverages, petroleum products and fruits and vegetables.

<sup>1</sup> Since April 2014, Balance of Payments of the Republic of Serbia is being presented according to the Balance of Payments Manual and international investment position, VI edition of the International Monetary Fund (BPM6).

On the monthly basis, consumer prices increased in June by 1.6%.

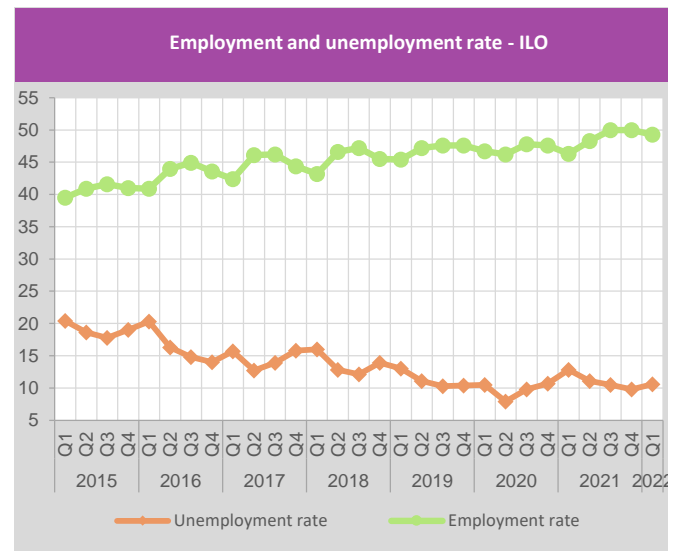

At the same time, core inflation was significantly lower and amounted to 6.7% y-o-y, which was significantly influenced by the preserved stability of the exchange rate and overall macroeconomic stability, as well as inflation expectations of the financial sector and the economy within the target.

#### 1.4. Labour market

Looking into the data from the CROSO registry average number of formally employed in June 2022 increased by 1.6%, y-o-y, which is primarily the result of growth in employment in the private sector of 1.9%, while in the public sector the number of employees increased by 0.8%. At the same time, most significant growth in employment was recorded in ICT, administrative and service activities, scientific and technical activities and health sector.

According to the National employment agency data (NEA) at the end of June, number of unemployed persons actively seeking employment totalled 444 thousands, which is a decline compared to the same month of the previous year by 17.9%.

**Salaries.** In May 2022, the average net salary increased by 3.4%, y-o-y, in real terms, which was entirely driven by the increase of salaries in private sector. Observed by activities, the most significant increase in salaries was recorded in the ICT, manufacturing industry, trade and scientific and technical activities.

**Pensions.** Average paid pension in June 2022 decreased in real terms compared to the same month of previous year by 5.8% and amounted to RSD 30,974.

#### 1.5. Monetary developments

In June 2022, NBS increased its key interest rate by 0.5 pp to the level of 2.50%.

Through June, banks as largest single investors in state treasury bills increased their invested funds on that basis by RSD 11.9 billion. Compared to the same month in the previous year, banks decreased their invested funds by RSD 110.9 billion.

At the end of June 2022, compared to same month of the previous year, bank loans to economy registered increase of 15.7%, while loans to households increased by 9.6%. At the same time, bank deposits registered growth of 5.1%. In structure of loans to economy by destination biggest share had loans for current assets and investment loans (45.6% and 37.5%, respectively), with yearly increase of loans for current assets by 23.7% and increase of investment loans by 6.1%. At the same time at loans landed to households, biggest share had cash loans (43.9%) with yearly growth of 9.2% and housing loans (38.9%), with yearly growth of 14.2%.

In structure of bank sources of funds dominant share had borrowed sources. At the end of June 2022, in total fund sources borrowed sources share was 87.5%, which is an increase of 0.8 pp y-o-y, while in comparison to the previous month decreased by 0.1 pp. In currency structure of funds, foreign currency sources share was 53.0%, and compared to previous month increased by 3.0 pp, while compared to the same month of previous year increased by 0.3 pp.

NBS foreign exchange reserves increased by EUR 872.1 million compared to previous month, while compared to the same month of previous year increased by EUR 683.9 million and totalled EUR 14.8 billion at the end of June 2022. The increase reflects primarily NBS activities in the domestic FX market, as well as the net sale of government securities in the domestic financial market, FX reserves management, grants and other sources. Level of NBS foreign exchange reserves was sufficient for coverage of 136% of M1 monetary aggregate and for coverage of around five months of imports of goods and services.

Household foreign currency savings at the end of June 2022 compared to previous month increased by EUR 193.0 million and totalled EUR 13.2 billion. Compared to same month of previous year foreign currency savings increased by EUR 1.1 billion.

Developments on the foreign exchange market in June 2022 compared to previous month were characterized by real and nominal appreciation of dinar against Euro by 0.9% and 0.1%, respectively. In comparison to the same month of the previous year, foreign exchange rate recorded nominal and real appreciation of 0.1% and 3.2%, respectively. In order to mitigate extensive daily oscillations of exchange rate, NBS throughout June intervened on the foreign exchange market by net buying EUR 405 million.

## 1.6. Financial markets

In June 2022 Belgrade stock exchange registered total turnover of securities in amount of RSD 2,277.6 million, from which turnover of shares and Republic of Serbia bonds (RS bonds) totalled RSD 393.6 million and RSD 1,884.0 million, respectively. In comparison to the same month of previous year, total turnover decreased by 46.9%. Total number of transactions

increased from 1,770 in June 2021 to 2,299 in the same month of 2022.

Total market capitalization at the end of June 2022 amounted to RSD 489.7 billion and decreased by 5.3% compared to previous month, while compared to same month of previous year decreased by 6.8%.

In June 2022 foreign investors share in total turnover accounted for 2.71% and increased by 2.40 pp in comparison to same month of the previous year. Share of foreign investors in turnover of shares increased by 0.70 pp and amounted to 2.13%, while the share of foreign investors in turnover of RS bonds amounted to 2.83%, which represents an increase of 2.75 pp compared to same month in the previous year.

During June 2022 on Belgrade stock exchange index BELEXline registered increase in value of 1.2% and totalled 1,690.07 index points, while the value of BELEX15 index increased by 1.0% and totalled 839.62 index points. Compared to same month of the previous year, index BELEXline increased by 2.2% and index BELEX15 also increased by 7.7%.

## 1.7. International environment

According to the Eurostat's flash estimation, GDP growth in Q2 2022 in the euro area and the EU increased by 3.9% and 4.0%, respectively, compared to Q2 2021, while comparing to the previous quarter increased by 0.6% each. According to the ECB outlook, the projected growth will amount to 2.8% in 2022, and it will continue to grow somewhat mildly in 2023 and 2024 to 2.1% each year, while the average yearly inflation will slow from 6.8% in 2022 to 2.1% in 2024. The growth projection gives a transitory character to current price shocks, but also takes into consideration uncertainties caused by developments in the Ukraine, as well as following downside risks and global uncertainties.

Average prices of agriculture products have decreased by 2.4% in June 2022 compared to the previous month, while food prices decreased by 3.7%. Base metal prices decreased by 3.8%, while the price of iron ore stagnated, cooper prices decreased by 3.5%. According to the World Steel Association, world production of steel in June 2022 decreased annually by 5.9%, while in China also decreased by 3.3% y-o-y (which is somewhat more than a half of World production). In the group of precious metals, the price of gold decreased by 0.7%, while the price of silver decreased by 2.2%.

Value of the Composite PMI index in June amounted to 52.0 ip (down by 2.8 ip compared to previous month), due to the slowdown of manufacturing and services sector output. Economic Sentiment Indicator (ESI) decreased by 1.8 pp in the EU27 (101.8 ip), while in the euro area decreased by 1.1 ip (103.8 ip), compared to previous month.

At the end of June 2022, the unemployment rate in the euro area and EU27 amounted to 6.6% and 6.0%, respectively. At the same time, unemployment rate in Germany and Italy was 2.8% and 8.1%, respectively. At the same time, according to the data of the Russian Statistical Office, in the Russian Federation the unemployment rate was 3.9%.

Trend of inflation during June accelerated, when inflation of 8.6% was registered in the euro area, while inflation of 9.6% was recorded in the EU27. At the same time, inflation of 8.2% and 8.5% was registered in Germany and Italy, respectively. Observed by categories the largest increase was in the prices of: energy, food, alcohol and tobacco, services and non-energy industrial goods. In Russia, the annual inflation reached 15.9%.

In June, ECB decided to keep the interest rate at record low level of 0%. Additional longer-term refinancing operations (LTROs) under favourable terms will be step-by-step reduced, in order to adjust monetary policy toward inflation stabilisation. In June, FED increased key interest rate to an interval of 1.50% to 1.75%.

According to the OPEC data, the price of oil type Urals has amounted to 91.61 \$/barrel in June (up by 12.8% compared to the previous month). Since the beginning of 2022, the price increased by 35.6% compared to the same period 2021, to 86.65 \$/barrel.

\* Preliminary annual data. \*\* SORS estimate, data obtained from quarterly calculations. \*\*\* MoF estimation. <sup>1</sup> The data refers to the period January–March 2022 (the same period of the previous year=100). <sup>2</sup> From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. <sup>3</sup> Including turnover generated by legal entities and entrepreneurs. <sup>4</sup> From 2022, data on tourist traffic (number of tourist arrivals and overnight stays) and accommodation capacities are published on the basis of statistical processing of data taken from the administrative source, the Central Information System in Catering trade and Tourism (eTourist). <sup>5</sup> Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products. <sup>6</sup> Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. <sup>7</sup> Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. <sup>8</sup> Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. <sup>9</sup> GFS-1986 methodology. <sup>10</sup> Data on foreign currency savings since December 2012 according to new methodology of NBS. <sup>11</sup> SORS changed data for employment. Without registered individual agricultural workers. <sup>12</sup> Data from 2010, given according to the new methodology, which has been in use since 2021, refers to the population aged 15 and over. <sup>13</sup> New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. <sup>14</sup> Since 2012 with professional army servicemen. <sup>15</sup> Data refers to period January–March. <sup>16</sup> Data refers to period January–May.

<sup>1</sup> Since September 2010 methodology for the external debt statistics has been changed so that the external public debt includes obligations under the IMF SDR allocation, which was used in December 2009, as well as capitalized interest to Paris Club creditors, while the loans concluded before December 20, 2000, under which the payments have not been effected, are excluded from the external debt of the private sector. <sup>2</sup> NBS has revised the data to the external debt since 2009. <sup>3</sup> According to the methodology of GDP - ESA 2010.

<sup>1</sup> New methodology for salaries, which is applied from 2009 as SORS extended coverage of observation units. In calculation of average salaries, beside salaries paid to employees in enterprises, institutions and organizations, into account are taken also salaries paid to entrepreneurs, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. <sup>2</sup> Every year in Health and social work section half of salary is paid in December and another half in January. <sup>3</sup> Since 2012 with professional army servicemen.

\* Adjusted contracted amounts include changes that occurred during the implementation of financed projects, determined by the final calculation at the handover of the performed works, due to deficiencies in relation to the contracted quantities of works and realized savings, etc. Also, deviations may occur by automatic cancellation of unused funds when the loan availability period expires or at the request of the borrower. The adjusted contractual amounts represent the principal to be repaid.

\*\*For the purpose of protection against foreign exchange and interest rate risk, a hedging transaction (interest rate and currency swap) was realized, by which the liabilities of the Republic of Serbia on the basis of a ten-year bond issued in the amount of USD 1.2 billion at a coupon rate of 2.125% were converted and presented in euros, at a significantly lower interest rate of 1.066%.

\*\*\*Hedging transaction (interest rate and currency swap) was realized \_ original loan currency is shown in EUR

# METHODOLOGICAL EXPLANATIONS

# ECONOMIC, FISCAL AND PUBLIC DEBT STATISTICS

**1. Economic statistics** (tables in Chapter I, Macroeconomic Developments) are based primarily on the statistical methodology and data provided by the Statistics Office of the Republic of Serbia, National Bank of Serbia, National Employment Agency, Privatization Agency, Belgrade Stock Exchange, Pension and Disability Insurance Fund of the Republic of Serbia etc.

Economic Statistics contained in the Chapter I includes: main indicators of macroeconomic developments in the annual and monthly dynamics for the current year; gross domestic product (GDP) in constant prices and its growth rates by quarters and usage of GDP; trends in physical volume of industrial production in monthly dynamics (total, by sections and economic purpose); consumer prices trends in annual and monthly dynamics; developments of overall consumer prices (in total and by components) in monthly dynamics for current year; producer prices of industrial products for domestic market and for export in annual and monthly dynamics; developments of exports in monthly dynamics; prices of external trade in annual, quarterly and monthly dynamics; developments in Foreign direct investments in quarterly dynamics; external debt in annual dynamics and in last month of current year; balance of payments in annual and monthly dynamics; monetary survey by years; main monetary indicators, household savings and foreign exchange reserves, total number of employed and unemployed and average net salaries and pension benefits (in dinars and annual real growth rates) in annual and monthly dynamics; an overview of privatization results in annual dynamics and for a specific period of the current year for which there are available data; an overview of trends of indices; market capitalization and foreign investors participation in total turnover on Belgrade Stock Exchange; an overview of turnover of securities on the Belgrade Stock Exchange; an overview of auctions of Republic of Serbia treasury bills in annual dynamics and on daily basis.

**2. Fiscal statistics** (tables in Chapter II Fiscal Developments) is based on the GFS methodology and data of the Ministry of Finance, Treasury Administration and Public Debt Administration.

Starting from Memorandum on the Budget and Economic and Fiscal Policy for 2009 with projections for 2010 and 2011, IMF methodology – Government

Finance Statistics is used to present and create projections for fiscal aggregates. All data in this bulletin have been computed by using the same methodology basis.

The main objectives of alignment with methodology of Government Finance Statistics is the possibility to perceive macroeconomic implications of fiscal policy. It is particularly important to perceive the influence of fiscal policy on domestic demand, hence every item of revenues and expenditures is considered from its aspect, regardless of its classification in accounting.

Here is a comparative overview of the previous and the new methodology of government finance statistics.

**1. The level of observation** is consolidated government sector that comprises the following levels of government: the central government – budget of the Republic of Serbia and Social Security Organizations; local government – budget of the Autonomous Province of Vojvodina and budgets of municipalities and towns; public road company Putevi Srbije and Koridori Srbije Ltd.

**2. Coverage of data:** beside budget resources, application of this methodology in computation of fiscal aggregates includes other sources of financing – a part of own resources of government bodies, donations, loans and privatization receipts. The previous coverage included only budget resources and expenditure financed from budget resources.

**3. The method of computation of results:** The deficit or surplus of consolidated government sector is the difference between revenues and overall expense plus net budget borrowing. The category of net landing is treated as an expense in cases when the purpose of the spending is implementation of a government policy, while if expense is made in order to manage liquidity, it becomes a financing item, without any influence on the government's result.

**4. The difference in accounting and statistical coverage of particular items of expenditure:** in view of the primary objective – gaining insight into macroeconomic implications of the fiscal policy, particular items of the expenditure, e.g. repayment of debt to pensioners, which is treated in accounting as a part of repayment of debt – without influence on the result, statistically is treated as transfer to citizens and

on ground influences increase in domestic demand. Mobile telephony license, treated in accounting as current non-tax revenue, in view of its one-time character is now treated as part of financing.

With advancement of accounting base – i.e. with transition to accrual basis in recording government transactions – conditions will be created for further enhancement of government finance statistics methodology and for alignment with the EU (ESA 95).

The Ministry of Finance is responsible for collection and processing of fiscal data. Fiscal statistics includes: consolidated balance of the general government sector and particular balances, i.e. budget of the Republic of Serbia (central government), budget of AP Vojvodina, budget of local authorities, financial plans of social security organizations, public road company Putevi Srbije and Koridori Srbije Ltd.

**General government.** General government sector comprises all the levels of government in the country. Subsectors that form general government include: central government – budget of the Republic of Serbia, provincial government – AP Vojvodina, local government – municipalities, towns, social security funds, public road company Putevi Srbije and Koridori Srbije Ltd. Fiscal statistics, with regard to the individual state subsectors, is especially significant for the understanding of interrelation between different governmental levels, separation of functions as well as division of revenues. It is important to determine the amounts and the flow of transfers between governmental levels, which is achievable only owing to the individual and separate balances of all governmental levels. However, only the data presenting the entire general government may provide the information concerning the amount of fiscal operations of the state, consumption of the state and its influence on aggregate demand and total macroeconomic stability, reallocation of collected funds originating from other economic sectors, burden of taxation of the economy, tax structure etc.

**Central government – budget of the RoS.** Central government comprises all the ministries, agencies, and other special organizations defined as direct or indirect republic budget beneficiaries.<sup>2</sup> The Government may define and achieve set goals concerning economic policy at the level of the entire country, primarily through the implementation of certain measures and programmes by the means of the budget of central government. Other governmental levels do not economic policies

---

<sup>2</sup> Indirect republic budget beneficiaries are primary and secondary schools, faculties, scientific institutes, social welfare institutions, cultural institutions and other institutions partly financed from the Republic budget.

concerning the national level. The more centralized is the country, the more significant are the data related to this level of government<sup>3</sup>.

**AP – Vojvodina.** Budget of AP Vojvodina comprises all governmental authorities and other special organizations defined as AP Vojvodina budget beneficiaries.

**Local self-government.** Data concerning local self-government relate to the data collected in all cities and municipalities constituting the local self-government system. The coverage of data at the level of cities or municipalities relate to all direct or indirect budget beneficiaries of a city or a municipality. The budget beneficiary of a city or a municipality is an institution primarily financed from the funds originating from the local government. Local government controls its business activities and it performs certain functions through the institution<sup>4</sup>.

**Social security organizations.** Social security organizations include the Pension and Disability Insurance Fund, Republic Health Insurance Fund, Military Health Fund and National Employment Service.

**Public road company Putevi Srbije.** Revenues of Putevi Srbije have the character of public revenues (toll and transfers from republican budget), and repayment of a large part of the company's debt takes place from the Republic of Serbia budget, therefore the company is treated as a part of the general government sector.

**Koridori Srbije LTD.** are a Government owned company, responsible for investment in road infrastructure.

## BASIC FISCAL AGGREGATES

Basic fiscal aggregates are total public revenues, total public expenditures, and the result of the difference between these two categories, which is defined as surplus or deficit in the consolidated balance of general government or balances of individual governmental levels.

---

<sup>3</sup> The largest amount of tax revenues, apart from property taxes, pertains to the budget of the RS. Income tax is renounced in the legally defined percentage to the local self-government, whereas a part of the revenues collected from income taxes realised in the territory of Vojvodina pertains to the AP Vojvodina. This shows the importance of the central governmental level in the country.

<sup>4</sup> Primary and secondary schools pertain to the central government as their financing is mostly provided from that level. A part of material expenses of schools is financed from local self-government funds but not in the extent sufficient for pertaining of these institutions to the local government. Pre-school institutions are local budget beneficiaries. When reviewing data regarding their revenues and expenditures, they are included in the local government level.

**Total public revenues** are divided into two basic categories: current revenues and yield on capital.

**Current revenues** are divided into tax and non-tax revenues.

The basic characteristics of **tax revenues** is their mandatory nature and non-existence of any direct reciprocal service for the payment of taxes. The state collects taxes finances certain state functions from collected funds. The benefits related to certain functions cannot be directly connected to an individual who paid the tax.

**Income tax** comprises wage tax, as well as taxes on other forms of earnings of individuals, beside the wages.

**Corporate income tax** comprises, in addition to corporate profit tax narrow meaning of the term, also tax on dividends paid to the residents and non-residents, as well as the tax on interests, royalties and capital incomes realized by non-residents.

**VAT** comprises national VAT, import VAT, and the arrears of turnover taxes from the previous years.

**Excise duties** present consumption taxes concerning specific products such as oil, tobacco, coffee, alcoholic beverages etc.

**Customs duties** and other import duties comprise revenues from duties paid for import of goods and services, with the exception of the VAT on imported goods that is included in VAT revenues.

**Other tax revenues** comprise taxes on use, ownership and carrying of goods, and other taxes. The property tax of local government is included in the category of other tax revenues in the general government consolidated balance.

**Non-tax revenues** are heterogenic category of revenues including property revenues (collected interest, rental fees) compensations, taxes, fines and other revenues that cannot be classified. As opposed to tax revenues, non-tax revenues imply the existence of reciprocal favour for the sum collected - e.g. the compensation for the usage of natural resources. However, there are revenues that may by their characteristics be classified as non-tax revenues, but without implying the reciprocal favour for the collection. Fines are a typical example of this sort of revenue.

**Capital revenues** comprise only revenues originating from the sale of capital goods, as well as the capital transfers from non-governmental institutions. The sale of capital goods imply the sale of non-financial assets, buildings, inventories and state-owned land.

**Total expenditures** in the Bulletin of Public Finance are presented according to the economic classification emphasizing the type of expenses, i.e. its economic characteristics and influence of state consumption on the market of goods and services, financial market and reallocation of income. In addition to the economic classification of expenditure, there is also a functional classification emphasizing the function the state performs by using of funds for specific purposes<sup>5</sup>. The Bulletin of Public Finance does not contain expenditures classified in accordance with the functional classification.

Overall expenditure is divided into current expenses, capital expenses and net budget borrowing.

**Current expenses** present final budget outflows, and are not intended for the procurement of non-financial assets.

**Compensation of employees** comprise (net) salaries of employees including income tax and contributions paid by employees, contributions paid by employers, as well as other fringe benefits (transport allowance, sick leave allowance for the period up to 30 days etc.).

**Procurement of goods and services** comprise payments related with coverage of business expenses (electricity, phone bills etc.), business trips, services contracts, current maintenance and procurement of material.

**Repayment of interests** is divided into repayment of interests on domestic debt, interests on external debt, interests based on activated guarantees and accompanying borrowing expenses.

**Subsidies** comprise all the funds transferred to the economic sector (public enterprises, registered agricultural holdings etc.) for the coverage of running expenses or/and the grant intended for current business activities.

**Social insurance and social welfare expenses** include payments to person insured with social security organizations (pensions of beneficiaries of Pension and Disability Insurance Fund, sick leave benefits paid by the Republic Health Insurance Fund, unemployment benefits paid by the National Employment Service, Repayment of debt to pensioners, children and family benefits, benefits for war-disabled persons, pregnancy leave benefits,

---

<sup>5</sup> Division of expenditures according to the functional classification is the following: general public services, defence, internal security, economic affairs, environmental protection, housing construction and municipal services, healthcare, recreation, culture and religion, education and social welfare.

housing benefits, Military Health Fund expenditures etc.

**Other current expenses include** grants to non-governmental organizations, mandatory levies and penalties imposed by one governmental level to another, fines and penalties imposed by courts and judicial bodies, injury compensations or compensations for damages incurred by natural disasters, and damages incurred by the public bodies.

**Capital expenses** comprise all the payments intended for the procurement of non-financial assets, construction of buildings and infrastructure, procurement of equipment and inventories and the purchase of land.

**Net lending** are expenses for purchase of financial assets whose objective is implementation of a particular government policy.

**General government consolidated balance** contains consolidated revenues and consolidated expenditure.

**Consolidated revenues** are aggregate revenues of individual governmental levels, but in the consolidation procedure, transfers received from other governmental levels are excluded. In the consolidation procedure, benefits paid by general government in the function of employer are excluded from the revenues of mandatory social insurance organizations.

**Consolidated expenses** present aggregate expenditures of individual governmental levels, while in the consolidation procedure, transfers provided from one governmental level to another are excluded. In the consolidation procedure, expenditures paid by general government in the function of employer are excluded from the expenditures.

**Consolidated surplus / deficit** is a difference between consolidated revenues and consolidated expenditure.

**Balance surplus/ deficit of individual governmental levels** is a difference between total revenues and total expenditures, at a particular governmental level.

**Earnings** not included in the revenues of general government present earnings based on domestic and external borrowing and earnings based on the privatization of state-owned enterprises.

**Expenses** that are not included in general government expenses are those for repayment of principal of national and foreign debt and expenses for purchase of financial assets that cannot be classified as net lending.

**3. Public Debt Statistics** (Tables in Chapter III – Public Debt) is based on the data of the Republic of Serbia Treasury Administration. The public debt of the Republic of Serbia consists of direct liabilities (received loans) and indirect liabilities (issued guarantees).

### **Direct Liabilities**

Direct Liabilities of the RoS are those incurred on the basis of the loans taken. Direct liabilities, depending on the creditor, constitute the following: (1) domestic debt and (2) foreign debt.

**Domestic Debt** consists of liabilities carried over from the past, and liabilities stemming from short-term treasury notes. The largest share in the domestic debt is the one of the frozen foreign currency savings, which also constitutes the largest individual debt in the public debt of the RoS.

**Foreign Debt** consists of (1) rescheduled old debt and (2) new borrowing.

**The rescheduled debt** consists of: (1) the debt towards International Bank for Reconstruction and Development (IBRD, A, B, C), (2) debt towards the Paris Club of Creditors, (3) debt towards the London Club of Creditors, (4) debt towards Council of Europe Development Bank (CEB).

### **1. Indirect Liabilities**

Indirect liabilities of the RoS are those incurred on the basis of the issued guarantees. Due to the fact that the guarantees that have been issued up to date were related with loans taken from foreign creditors, total indirect liabilities fall under the category of foreign debt.

### **Public Debt to Gross Domestic Product Ratio**

Debt to GDP ratio is one of the most important indicators of the public debt sustainability and one of the convergence criteria for joining the EMU.

### **Structure of Interest Rates**

The ratio between the fixed and variable interest rates in the public debt of Serbia is distinctly favourable. High share of the fixed interest rates provides high level of predictability of future liabilities arising from the interest and thus the Republic of Serbia is not exposed to the interest rate risk.

### **The Public Debt Currency Structure**

The public debt consists of different currencies. The largest share, however, is the debt denominated in Euros and US Dollars.
