## **INTRODUCTION**

The Public Financial Management Reform 2016-2020 (hereinafter the "Program") was adopted by the Government of the Republic of Serbia on 28 November 2015 and amended in December 2015.

The aim of the Program is to provide a comprehensive framework for planning, coordination, implementation and monitoring of progress in the activities of public finances, in order to improve macroeconomic stability, ensure efficient and practical use of public resources and improve the quality of services provided by the state administration in the Republic of Serbia, while improving transparency and the overall functionality of the public finance management and the fulfillment of the preconditions for EU accession.

Over the past decade the connection and sequence of implementation of reform activities in the various subsystems of public finance management have not been coordinated, which led to uneven progress in several key areas. Therefore, it was decided to prepare a comprehensive program of reform of public financial management, which will serve as the main guideline for the period from 2016 to 2020 to strengthen the legal and institutional framework and system for the management of public finances in line with EU requirements and international standards.

The Program itself is based on a draft Report on the repeat public expenditure and financial accountability assessment (PEFA) from 2015, the Report of the SIGMA program on the management of public finances for 2015 and the Report of the Fiscal Affairs Department of the IMF (FAD) in March 2015, the Memorandum of economic and financial policies (MEFP) concluded in the framework of the Stand-by arrangement (SBA) with the IMF, reports on the progress of the Republic of Serbia published by the European Commission as well as the requirements of the process of accession negotiations. Funds have been provided from the budget of the Republic of Serbia for the implementation of the Program, as well as from donors (EU, WB, IMF, OECD, USAid, UNDP and the governments of Germany, Switzerland, Sweden and the UK) and others.

The program has been prepared during 2015 by the Working Group for drafting and monitoring the implementation of the Program. Technical assistance provided by the European Commission and SIGMA was crucial to the formulation and evaluation of the costs of measures, results and activities. The draft of the program was presented by the Minister of Finance dr Dusan Vujović to the representatives of civil society, as well as to a donor community at a special meeting in October 2015.

## **II RELATIONSHIP WITH STRATEGIC DOCUMENTS**

The Public Financial Management Reform Program 2016-2020 takes into account all the relevant documents in the field of European integration, starting from the Stabilisation and Association Agreement between the European Communities and their Member States, on the one hand, and the Republic of Serbia, on the other hand (hereinafter: SAA), as well as all relevant national strategic documents in this area. The program is in compliance with all the commitments taken over by the Government of the Republic of Serbia during the process of EU accession negotiations.

The Government of the Republic of Serbia signed a Memorandum of Economic and Financial Policies (MEFP) with the IMF in early 2015, in which it presented the economic policies that the Government of the Republic of Serbia intends to implement in the context of stand-by precautionary arrangement (SBA) in the period from 2015 to 2017 in order to face the economic challenges. MEFP determines the foundations and provides the framework within which the implementation of the reform of public finances in the medium term will take place, as part of the overall reforms of public administration, but at the same time it contains some of the key themes and elements that occur in all the sub-systems of public finance management.

Reform of public finances is one of the key pillars of the Public Administration Reform (PAR), and as such is embedded in the PAR Strategy and Action Plan for the implementation of the PAR Strategy for the period 2015-2017. Key activities in the areas of planning and budget preparation, financial control and public procurement are further defined in the third specific objective of the Action Plan for the implementation of PAR, which was adopted in March 2015. The current Program complements the PAR strategy with objectives described in detail and activities defined under the six pillars. It also defines a strategic framework for more detailed strategies in specific sub-areas of public finance, such as the strategy of internal financial controls in the public sector.

The Public Financial Management Reform Program is, in most areas, supported by detailed strategies made by the appropriate authorities, such as the Tax Administration transformation program, Strategy for the resolution and prevention of arrears, the National Anti-Corruption Strategy, Public Procurement Development Strategy in the Republic of Serbia for the period from 2014 to 2018, and so on. In addition, the government's reform strategy is complemented by the strategy, according to the constitution of an independent State Audit Institution, for harmonization of the work of these institutions with *INTOSAI* standards.

In addition, the importance of public financial management is emphasized in the European Commission Guidelines for the development of the Economic Reform Program - ERP for the period from 2016 to 2018, and for the period 2017-2019,. In addition to the topic of public finances being present in the first three chapters of the *ERP* document, one of the priority areas within the framework of Chapter 4 - structural reform priorities for the period 2016-2018 -

relates to the area of public finance management. In *ERP* 2016-2018, in this area two priority structural reforms have been selected, which are directly derived from the Public Financial Management Reform Program 2016-2018, as follows: 1. Transformation of Tax Administration and 2. Improvement of capital investments. The Joint conclusions of the economic and financial dialogue between the EU and the Western Balkans and Turkey, the EU Council for Economic and Financial Affairs of 12 May 2016, it is recommended that Serbia continue to strengthen the management of public finances by improving the budget process and capacity building of the Tax Administration. The preparation of a new *ERP* document for the period 2017-2019 is underway, in which this area will again be in the focus, and the foregoing recommendations will be taken into account.

Special Group on Public Administration Reform, co-chaired by the European Commission and the Ministry of State Administration and Local Self-Government of the Republic of Serbia, will continue to serve as an appropriate instrument of communication, coordination and reporting on public financial management reform in the Republic of Serbia. The third meeting of the Special Group on public administration reform, as a special supervisory body to monitor the implementation of the Stabilisation and Association Agreement with the primary task of monitoring the implementation of the Public Administration Reform Strategy and the accompanying Action Plan was held on 10 March 2016 in Belgrade. At this meeting the realization of the Program of Public Financial Management from 2016 to 2020 was presented. The public financial management reform was discussed with the European Commission and within the framework of the meeting of the Committee for the implementation of the Stabilisation and Association Agreement on 12 April 2016 in Brussels. This area is regularly reported to the European Commission in the Annexes to the Progress Report. Certain areas of the Program will also be further processed in the framework of appropriate negotiation chapters. This type of cooperation will be continued in the future.

### **III COORDINATION MECHANISM FOR THE IMPLEMENTATION OF THE PROGRAM**

The Program Steering Committee, the Working Group and the Government monitor the implementation of the Program, and all relevant stakeholders will be regularly informed on the progress of its implementation. The preparation of reports on the implementation of the Program are planned twice a year.

The Working Group, which was officially formed in February 2015 and chaired by the Minister of Finance, consists of representatives of the following relevant institutions: Ministry of Finance (*including the Department for Macroeconomic and Fiscal Analyses and Projections, the Budget Department, the Department for International Cooperation and European Integration, the Fiscal*

*System Department, Department for Customs System and Policy, Department for Internal Control and Internal Audit, Department for control of public funds, Department for Management of EU Funds, Tax Administration, the Treasury Administration, Public Debt Administration and Customs Administration*), the National Assembly Committee on Finance, State Budget and Control of Public Spending, State Audit Institution, Ministry of State Administration and Local Self-Government, Public Policy Secretariat of the Republic of Serbia, Public Procurement Office, Audit Authority Office of EU Funds and the European Integration Office of the Republic of Serbia. The Working Group was formed as a key technical body whose role is to define the scope and specific reform measures and activities, and to coordinate their implementation within the framework of relevant institutions involved in the implementation, monitors progress in the implementation of the objectives of the Program and report to the Steering Committee of the Program.

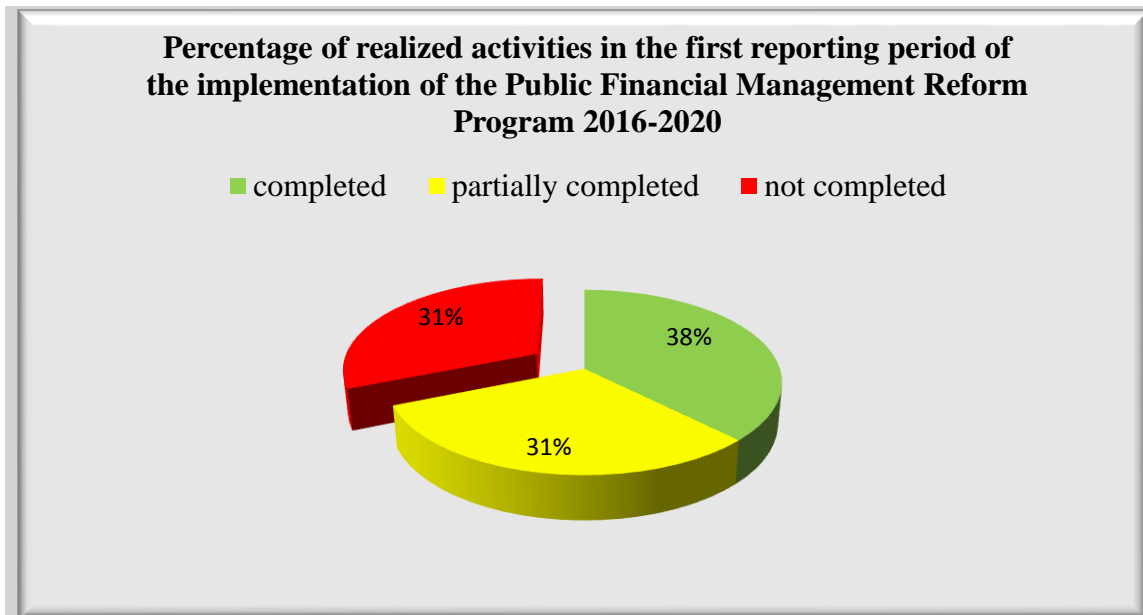

The Program Steering Committee has the task of political coordination at a high level under the chairmanship of the Minister of Finance. A pillar coordinator is responsible for each pillar of the Program - two state secretaries of the Ministry of Finance responsible for certain areas, as well as the President of the State Audit Institution and President of the National Assembly Committee on Finance, State Budget and Control of Public Spending (excluding results of 18.2) for the pillar of external control of public finance.

Technical Secretariat of the Program is in the International Cooperation and European Integration Sector of the Ministry of Finance. The degree of implementation is monitored through regular communication between the Technical Secretariat and members of the Working Group. The Technical Secretariat is responsible, inter alia, for preparing semi-annual and annual reports on the implementation of the Program.

The first semi-annual report on the implementation of the Program provides an overview of the activities planned for the period from 1 December 2015 to 30 June 2016. The methodology used for the preparation of reports is based on the methodology used for monitoring the implementation of the Public Administration Reform Strategy Action Plan. Activity status is shown in corresponding colors - green for realized activities; yellow for activities that are partially executed, explaining the reason for the delay and specifying a time limit by which the activity will be carried out; red for the activities that have not been carried out on time, mandatory stating of the reasons for the delay, envisaged steps and defining a time frame for their implementation.

In the period from 1 December 2015 to 30 June 2016, in accordance with the Action Plan which is an integral part of the Public Financial Management Reform Program 2016-2020, the implementation of 16 activities grouped under nine results, ie seven measures is planned. **Out of the 16 planned activities, six were completed within the stipulated period, five were partially implemented, while five activities were not realized.**

*Chart 1 – Graphic representation of realized activities from December 2015- June 2016*

#### **IV PROGRAM FINANCING**

Funds for the implementation of the activities envisaged in the Action Plan of the Program shall be provided mainly from the budget of the Republic of Serbia, as well as donors and loans.

Significant EU support from IPA 2015 is planned, through sector budget support (SBS) for the Public Administration Reform Sector. An integral part of this sector is the area of public finance reform, so that a significant portion of the funds will be committed to the support for this area. Through the SBS program, provision of 80 million budgetary aids is planned for the Public Administration Reform Sector (70 million euros of direct budget support and 10 million euros for technical assistance). Within the framework of technical assistance funds, the allocation of funds in the amount of three million euros is planned for technical assistance in the implementation of the Public Financial Management Reform Program from 2016 to 2020. The signing of the financing agreement for this SBS is expected by the end of 2016. SBS funds will be withdrawn from 2016 to 2019, in the form of fixed and variable tranches, and for a withdrawal of variable tranches, it is necessary to implement the relevant indicators that have been agreed with the European Commission.

German Corporation for International Cooperation (GIZ) through the project "Public Finance Reform" provides continuous and significant support in different areas of the program, and the main areas in which support will be concentrated in the future refer to Tax Administration, Budget Inspection Department, Budget Sector as well as support to capacity building of the Fiscal System Sector, Sector of Macroeconomic and Fiscal Analyses and Projections and Customs Administration. Great support during the preparation and implementation of the Program, in addition to the European Commission (IPA, TAIEH) is also provided by the World Bank, the International Monetary Fund, the OECD and SIGMA. The Fiscal Affairs Department of the IMF has prepared a number of reports in this area in the 2015/2016 on budget preparation and reporting, the Law on the budget system and management of public investment. Regional advisor for public finance reform (IMF/SECO) and residential advisor for public finance reform (IMF/EU) are at the disposal of the Ministry of Finance. In addition, support from TAIEX, as well as UNDP will also be provided. Also, significant support in the reform of this area will be provided by the USAid, the Government of Sweden, Switzerland, Great Britain, and others. Most support from the donor community in the future will be necessary for specialized technical assistance in key areas and IT support (equipment and software).

Overview of funds from all sources that are designed to reform the public finances are also shown in the form of a pilot project of the sector document Medium Term Expenditure Framework (MTEF) for the public administration reform sector, which was prepared within a package of documents for sector budget support (SBS) EU from IPA2015.

## **V IMPLEMENTATION OF THE PROGRAM ACTION PLAN**

### **Measure 1 - TO IMPROVE THE CREDIBILITY OF MACROECONOMIC FORECASTING**

As part of this measure, implementation of the activity within the **result 1.1. *Strengthened capacities of the Ministry of Finance for improved macroeconomic forecasting and improved methodological approach*** was initiated, in part referring to strengthening the capacities for carrying out macro-fiscal sustainability analyses. Trainings concerning fiscal sustainability have been organized (the first training was in May while the second was in June 2016). Special attention was paid to topics such as medium term objectives, fiscal framework and ageing of population. Data were collected for the Republic of Serbia and Medium Term Objective – MTO calculated, as well as costs of ageing of population, in accordance with projections of demographic trends in the Republic of Serbia.

Within this measure, in part referring to the **result 1.2** – *Ensured administrative and technical capacities of managing the EU own resources*, one work position for coordination and management of EU own resources system was filled within the Department for Macroeconomic and Fiscal Analyses and Forecasts, which is the unit responsible for implementation of this activity, as it was foreseen for the beginning of process of establishing coordinating body for management of EU own resources system. In May 2016 GIZ project was organized a seminar where colleagues from the Ministry of Finance of the Republic of Croatia (coordinating body and representative of the Customs Administration of the Republic of Croatia) presented the EU own resources system management. Department for Macroeconomic and Fiscal Analyses and Forecasts participated, within its jurisdiction, in drafting Negotiation Position for Negotiation chapter 33 – Financial and Budgetary Provisions.

As part of this measure, the Customs Administration of the Ministry of Finance is one of the partner institutions for the implementation of **result 1.2** - *Ensured administrative and technical capacities of managing the EU own resources*. The deadline for achieving the set objective is the second quarter of 2017. Strengthening the capacity of the Customs Administration for participation in preparing negotiating position for Chapter 33 - Financial and budgetary legislation has been carried out through the organization of *TAIEX* workshop<sup>1</sup> and through participation in the workshops of the Ministry of Finance which were organized by GIZ project. In this way, from the aspect of the Customs Administration, implementation of the corresponding activity for this result has started.

### **Measure 3 – TO FURTHER IMPLEMENT MULTI-ANNUAL PROGRAM BUDGETING ACROSS ALL LEVELS OF GOVERNMENT**

The Budget Department of the Ministry of Finance is in charge of the implementation of this measure. From a total of five planned activities of the Program Action Plan, four were planned to be implemented in the first half of 2016, one of which has been fully implemented, two have been partially implemented, while one activity has not been realized.

In the context of the **result 3.1**, the **third activity** - *Process analysis, monitoring and control of program budgeting and defining recommendations for improvement* has been realized within the deadline.

Within the said result, the **fourth activity** - *Improving the methodology of the program budget and the preparation of new guidelines in accordance with the recommendations* has not been

---

<sup>1</sup>A *TAIEX* workshop was organized entitled "Establishing a system of traditional own resources"

implemented in the second quarter of 2016, but the deadline for realization has been moved to the third quarter of 2016. The reason for deviation from the plan is the need for additional consultations to create modules for reporting on the program budget. A key step towards improving the methodology of program budgeting, which would contribute to achieving the goal, is the newly created module for reporting.

The delay in the implementation of activities is reflected in the process of implementing the following activities under result 3.1., which leads to a shift of deadlines for the implementation to the third quarter of 2016.

**The fifth activity** of result 3.1, which relates to *Conducting training for civil servants to improve the program budget*, can not be achieved on schedule, given that the improved methodology of program budgeting has not yet been adopted.

**For the sixth activity - Implementation of the budget cycle for 2017 in line with an improved methodology**, the Budget Sector states that the spring part of the budget cycle has not been implemented according to the updated methodology. It is expected that the autumn budget cycle be implemented under the new methodology.

#### **Measure 5 - TO IMPROVE BUDGET PLANNING**

Under this measure, the Public Policy Secretariat of the Republic of Serbia (PPS), in addition to Budget Department of the Ministry of Finance, is responsible for result 5.3 and the activity which refers to – *Improved coordination and alignment of budget planning and execution of budget beneficiaries through compliance and alignment with the Methodology for Mid-Term Institutional Planning*, provided by the PFM Action Plan, to be implemented in late 2018. This activity has been partially realized in terms of drafting the legislation package consisting of the working version of the Law on the planning system in the Republic of Serbia and two accompanying decrees - Decree on mid-term planning and Decree on methodology of management of public policies, analyzing the effects of public policies and regulations and the content of individual policy documents, which will regulate the planning system in the Republic of Serbia and management of public policies<sup>2</sup>. Consultations with relevant institutions are in progress, and the working versions of the acts are continuously being improved. It is planned that the new Government, formed on August 11<sup>th</sup> 2016, will initiate a public hearings of prepared acts package, and that immediately after the adoption of the comments - the final drafts will be forwarded to the Government for consideration and adoption.

---

<sup>2</sup><http://www.rsjp.gov.rs/pripremljen--paket-propisa-o-planiranu-i-upravljanu-javnim-politikama/t>

## **Measure 6 - TO IMPROVE OPERATIONAL CAPACITIES FOR PUBLIC INVESTMENT COORDINATION AND BUDGET PLANNING**

For results within this measure is the responsibility of the Budget Department of the Ministry of Finance. From a total of two planned activities, one is planned to be realized in this reporting period, but this did not happen for justifiable reasons.

The reason for the deviation, i.e. that the following activity has not been realized within the framework of the **result 6.1 - *Implement an institutional strengthening process of the Budget Department, and increasing its staff to increase its operational capacity and performance on budget preparation and coordination, on monitoring budget execution and in compiling detailed budget execution reports*** is the fact that the fiscal consolidation measures, wage bill restrictions and prohibitions of employment have been introduced. It is necessary to announce competitions to fill the jobs which would strengthen the administrative capacity of the relevant sector.

In the context of the **result 6.2, the activity - *Implement an institutional strengthening process of public administration bodies (ministries and their departments/administrations/inspectorates, special organizations and governmental services) for conducting necessary analysis, planning and budgeting by introduction of analytical and planning units***, it is envisaged to be implemented at the end 2017. The PPS is a partner institution responsible for implementation of the aforementioned activity. In the past, PPS has worked on the construction of its own and analytical capacities of other bodies of state administration with the aim of planning, preparation, implementation and monitoring of the implementation of public policies based on evidence and relevant data. All trainings that were held by the employees of SPP in cooperation with the Human Resources Management Service (HRMS) were also aimed at, inter alia, improving the analytical capacity of the state administration bodies, as well as the skills of civil servants in terms of better planning. In cooperation with HRMS, training programs for the preparation and execution of the budget, medium-term planning and monitoring of the implementation, evaluation and reporting in the management of public policies have been prepared, as part of the Program of general continuous professional development of civil servants for 2016<sup>3</sup>. Bearing in mind that PPS is continuously working on promoting the importance of the establishment of analytical capacity within the state

---

<sup>3</sup>[http://suk.gov.rs/sr/strucno\\_usavrsavanje/arhiva2016/](http://suk.gov.rs/sr/strucno_usavrsavanje/arhiva2016/) (trainings related to the management of public policies that are precisely designed for civil servants who carry out analytical affairs and planning in state administration bodies, regulatory impact assessment, the role of managers in strategic and financial management and coordination of public policies in public administration, management of the legislative process, as well as a mentoring program for managers from different state administration bodies on the subject of the management of public policies)

administration, PPS will, in the coming period, in cooperation with the HRMS, implement additional training and carry out all necessary activities that will improve analytical capacity in the state administration bodies. Once adopted, the legislation package mentioned at the activities within result 5.3, training programs, "mentoring" and "coaching" will be further improved in order to fully reflect the solutions provided by the adopted laws, and civil servants adequately prepared to apply and implement the adopted the decisions and provisions. It is planned to carry out the activity in early 2017, instead of until the end of the fourth quarter of 2017.

### **Measure 7 – TO IMPROVE REVENUE COLLECTION**

The Tax Administration is responsible for the implementation of measure 7, except for the result 7.3 whose implementation is the responsibility of the competent Customs Administration.

In order to implement **result 7.1. - I Tax Administration Transformation Strategy implemented**, the activity of ***strengthening management and the basic Tax Administration functions, improving organizational structure and business processes, improving services to tax payers*** was partially carried out, given that it was intended to be completed by the end of 2020. So far, the competent administration of the Ministry of Finance has proposed a new organizational structure, the further development of electronic services has been enabled, the Strategy of provision of services to taxpayers and establishment of the appropriate organizational unit is being created; a project is underway to improve the function of collection and establish the automatization process of regular and coercive collection; design of the new tax accounting; initiatives to redesign the system of human and material resource management have been started; the construction project *Data Warehouse – DWH* has been proposed, which is a unique database which would be funded from *IPA2014* unallocated funds.

In order to realize **result 7.2 – Voluntary compliance with tax legislation, guidelines, and procedures improved** and the implementation of the activity ***Perform an analysis of (i) the legislation, including criminal legislation, guidelines, and administrative/operational procedures; (ii) information to assess tax liabilities; and (iii) impediments to contest administrative ruling on tax liability which need to be clarified.*** , the Ministry of Finance established two working groups consists of representatives from the Ministry of Finance and the Tax Administration in March 2016:

1. Working Group for the analysis of legal solutions in the area of tax procedure and tax administration, whose task is to analyze and propose amendments or the new Law on tax procedure and tax administration;

2. Working group for the analysis of legal solutions in the field of personal income tax, whose task is to analyze and propose amendments to the Law on personal income tax.<sup>4</sup>

A tax police sector has proposed the amendments to the following regulations and directives: Article 229 of Tax evasion - CC RS, Article 229a Avoidance of withholding tax - CC FRS, Art. 173a Unfounded disclosure of the amount for tax refund and tax credit - LTPTA, Article 162 of the CPL, Article 4 of the draft Law on organization and jurisdiction of state bodies in combating organized crime and corruption, as well as the creation of the new Code of Conduct of the Tax Police. Proposed legislative changes were not planned, but they are rather derived from the perceived problems in operational treatment of Tax Police inspectors. The deadline for the implementation of these activities under the Program Action Plan is the fourth quarter of 2017.

The revision of the Methodological guidelines for recording traffic through fiscal cash registers is underway. This provides for the partial realization of the second activity within **result 7.2**, which is the *review the Tax Auditors' workflow and standard operating procedures to verify if their functions and prerogatives are clear in order to minimize discretionary decisions.*

The third activity of the mentioned result, relating to *Improve clarity and usefulness of tax liabilities information by establishing a dedicated taxpayer services Department/unit within the STA*, began with the establishment of a Working Group within the Tax Administration, whose task is the introduction new and the improvement of existing services to taxpayers, the establishment of organizational units for the provision of services to taxpayers, increasing the functionality of the contact center, development of programs for newly registered taxpayers and other work on improving services to taxpayers. The deadline for the implementation of the activity is the fourth quarter of 2017.

Within measure 7, the Customs Administration is responsible for the **result 7.3 – The Customs system improved and modernized**. Within this result, there are three activities for which the deadline is the fourth quarter of 2018. For the third activity entitled *Modernizing the Customs Laboratory*, the first draft of the proposal of the project "Creating conditions for strengthening the capacity of the laboratory of the Customs Administration of the Republic of Serbia" has been prepared, which was approved from the funds of unallocated IPA2013 and the Customs Administration in budget for 2016 provided funds for the co-financing of this project.

Within **result 7.4 - The appeals mechanisms are improved**, the receipt and outcome of resolving complaints in second instance proceedings are monitored through regular monthly reporting of

---

<sup>4</sup>Published checklists at: <http://www.purs.gov.rs/aktuelnosti/Ostalo/3525/inspekcijski-nadzor---kontrolne-liste.html> .

regional departments for second instance proceedings (Belgrade, Novi Sad, Niš and Kragujevac) and the Department for second instance proceedings and administrative practice. These organizational units submit their monthly reports by the 10th of the month for the previous month to the Sector for tax legal affairs and coordination.

In order to improve efficiency in the work and uniformity in treatment in 2016, meetings are organized with regional departments for second instance proceedings. The distribution of cases in the departments for second instance proceedings is carried out taking into account the date of filing of appeals, the number and size of the case. The target value of the indicator "Percentage of adopted appeals in relation to the total number of resolved appeals" for the year 2015 is determined in the amount of 36.2% and the said indicator in 2015 amounted to 36.6%. The target value of the indicator "Percentage of adopted appeals in relation to the total number of resolved appeals" for the year 2016 is determined for 35.5% and the said indicator in the first quarter of 2016 amounts to 33.92% in the second quarter of 2016 amounted to 31.61%. The target value of the indicator "Percentage of adopted appeals in relation to the total number of resolved appeals" in the second quarter of 2016 amounts to 31.61%.

A one-stop shop system of business registration has been fully established with the Business Registers Agency, and there is a possibility of filing a registration form for the VAT and applying for lump sum taxation in the case of a newly established business entity, which means that the first activity has been partially implemented under **result 7.5 - *The appropriate links between different databases within Tax Administration and between the Tax Registration System and other registration systems established.*** The assessment of the need for data exchange and the possibility of connecting the Tax Administration with other databases and sectors of the Ministry of Finance are underway.

The second activity related to the ***Assessment of internal procedures at Tax Administration to control and ensure that the Tax Registry is regularly updated,*** has been partially realized within the reporting period, given that the Single register of taxpayers is updated on the basis of data taken from the BRA, within the framework of the one-stop shop system, and for taxpayers who do not register through the BRA, the update procedure is manual. Electronic services for the exchange of data with other registration authorities (Commercial Court, chambers, ministries, etc.) have not been established.

With regard to the third activity – ***Establishment of IT facilities (ESI) in connection to the process of EU integration (requests of Chapter 16)*** the proposal was forwarded to **DG TAXUD** the topic within the IT mission, which will be implemented in the coming period, is Technical assistance in the development of the Strategy implementation of interoperability and interconnectivity of the Tax Administration of the Republic of Serbia based on the best practices in project management, which would include general and specific strategic objectives, with the

establishment of lists, priorities and organization of projects relating to the construction of European Information Systems, as well as defining the roles and responsibilities of the participants, with an assessment of the timing and the necessary budget.

Activities under **result 7.7 - *Improved risk management practices*** have been partially realized by the development of the risk analysis criteria for the VAT and the development of risk analysis for the control of tax income. Since 2010, the Sector for Control prepares an annual plan of tax control. Choosing payers by sectors and branches of activities is performed by applying the criteria of risk analysis. The emphasis is on fiscally generous taxpayers. The monitoring of the implementation of operational (monthly) plans is done on a daily or monthly basis, based on recorded control in the Application of field control. The deadline for the implementation of activities is the fourth quarter of 2017.

Based on the Annual control plan, operational (monthly) control plans are made, applying the criteria of risk analysis. The realization of plans in the form of actual effects of control, consumed effective hours of work of inspectors carrying out the controls and the extent of the realization of the plan shall be monitored through the application of field control. Justification of the following criteria is evaluated based on control, through entered irregularities and observations during the controls.

In order to implement **result 7.8 - *Improved tax arrears and control information systems and oversight***, the implementation of a collection system is underway in the framework of the Integrated Tax Administration information system, which should be completed by 31 December 2016 and applied from 1 January 2017. This system will allow, among other things, faster and more efficient implementation of regular and enforced collection of tax debt by OUTA, as well as other activities of collection and tax accounting, what will certainly have an impact on reducing the tax debt. The activity has been partially implemented, given that the deadline is the first quarter of 2018.

In June 2016, Minister responsible for finance formed the Working Group for preparation of amended text of the draft Law on fiscal cash registers and related by-laws.

Namely, based on detailed analysis of the implementation of the Law on fiscal cash registers in practice, the main identified shortcomings of the current legal solutions are set out.

Given that the circumstances regulating the specified area have changed considerably since the adoption of this law, which is applicable from 1 January 2005, it is necessary to revise the mentioned area through legislative changes in order to create conditions for reducing the gray economy and increase the inflow of funds in the State Budget by returning money in legal flows, needs for more legal security in the sense that the activities for which there is no obligation to

register individually achieved turnover should be legally regulated, and especially taking into account the development of technology.

### **Measure 9 – TO IMPROVE CAPACITIES FOR PUBLIC DEBT MANAGEMENT**

This measure is the responsibility of the Public Debt Administration (PDA), but is not included in the reporting period of the implementation of the Program Action Plan. Regardless of the set deadlines, the competent institution is working intensively on the implementation of all seven goals in the context of the said measure.

For **result 9.1**, activity - *Procurement, design, customization and implementation of software for the public debt management including an appropriate model to improve public debt risk management, scenario analyses, stress tests and other relevant analyses*, which is planned to be realized early next year, PDA is to start with the development of an information system for public debt management at the end of the year. The contractor was selected in a tender conducted by the United Nations Development Program - *UNDP*, and the project is being implemented thanks to the financing of the Swedish International Development Cooperation Agency (*SIDA*) under the supervision of *UNDP*. Its implementation will enable the biggest operational problem in the work of PDA to be overcome. Implementation of the project will be followed by the *USAID* project consultants.

Date of implementation of **result 9.2** and the activity - *Development and implementation of methodology for carrying out long term public debt sustainability analyses*, has been moved from the first to the fourth quarter of 2017, given that the necessary resources for the start of the activity have not been provided. Negotiations are underway of the PDA with the *World Bank Treasury* and *SECO*, as potential funders for the realization of the set goal.

In the context of **result 9.3**, the implementation of activity - *Creating and implementing the new organization of Government securities primary market by introducing the primary dealers system*, is being worked on intensively by the PDA, developing markets and creating "benchmark" emissions of government bonds as a precondition for the introduction of primary dealers. The deadline for the completion is the first quarter of 2018.

In order to achieve **result 9.4** and activity - *Preparation of documentation and implementation of the legal framework for financial derivatives transactions*, the mission of the World Bank and the Swedish Debt Office has been carried out within the stipulated time, (June 2016). In collaboration with these two institutions, the framework for the creation of bylaws or a decree has been established.

The initial step towards the implementation of activities under **result 9.5 - *Strengthening capacity and preparation of legislation related to the asset under management***, is the appointment of a Committee for the management of public debt and financial assets of RS funds, which are under management<sup>5</sup>. Rulebook on the tasks, functioning and organization of the Committee has been submitted to the Minister of Finance for an opinion.

For **result 9.6** and the activity - ***Monitoring of project loans – establishing of a new system***, intended to be implemented in the first quarter of 2017, it is necessary to also improve the monitoring of implementation of projects financed from project loans and coordination of activities in this field, at the level of the Ministry Finance.

In the context of the **result 9.7, activity** that relates to ***Conducting training for civil servants to improve the human capacity of the Public Debt Administration***, has been partially implemented in the form of PDA staff training, in cooperation with the Swedish Debt Office, while training has been carried out in the area of operations with financial derivatives in cooperation with the World Bank. Also, employees participate in training sessions organized by SIC.

#### **Measure 11 - TO IMPROVE STRATEGIC AND LEGISLATIVE FRAMEWORK FOR IMPLEMENTING PUBLIC INTERNAL FINANCIAL CONTROL**

Within **result 11.1**, whose activities are the responsibility of the Department for internal control and internal audit, the deadline for the implementation of the second activity: ***Reviewing the SIGMA Assessment on the Legal Framework and Organizational and Institutional Capacities for Consolidating the system for Financial Management and Control and Indirect Management of EU Funds under IPA II, establishing a Working Group for the preparation of a Road Map for the consolidation of FMC and the Management and Control System under indirect Management for IPA II***, is the second quarter of 2016. The draft Development Strategy of Internal financial control in the public sector 2016 – 2020 has been prepared, which is the basis for the development of the road map. It is expected that these activities will be implemented by the end of the fourth quarter 2016.

---

<sup>5</sup>Pursuant to Art. 11, paragraph 4 of the Law on Public Debt and the decision of the RS Government, a decision on has been adopted on the formation of a Committee for the management of public debt and RS financial assets which are under management: <http://www.slglasnik.info/sr/28-15-03-2016a/33352-odluka-o-imenovanju-komiteta-za-upravljanje-javnim-dugom-i-sredstvima-finansijske-imovine-republike-srbije-pod-upravljanjem.html>

## **Measure 12 – TO ENHANCE THE IMPLEMENTATION OF FINANCIAL MANAGEMENT AND CONTROL**

For **result 12.2**, whose activities are the responsibility of the Department for internal control and internal audit, a cycle of five-day basic training in financial management and control was carried out for 76 participants who are users of public funds in April 2016. In April 2016, the following training sessions were also carried out: one-day training with the support of PLAC project entitled "Establishment of risk management processes" for 26 participants from the Ministry of Finance and its administrations; one-day training with the support of PLAC on the topic "The role of internal audit in the establishment of risk management processes" for 32 participants from the Ministry. Central Harmonization Unit (CHU) has conducted a two-day training and workshop with the support of the United Nations Development Program (UNDP) funded by the Swiss Agency for Development and Cooperation (SDC) on the topic: Guidelines for risk management for 40 participants from ministries and organizations of mandatory social insurance from 19 May to 20 May 2016. The manual "Guidelines for Risk Management" was published. Through training and workshops, practical examples for the establishment and development of financial management and control systems and procedures for risk management were given, which will lead to improvements in the quality of FMC at PFU. Progress is monitored through annual reports on the state of FMC in public funds users to be provided in March of the current year for the previous year.

## **Measure 14 - TO FURTHER STRENGTHEN THE LEGISLATIVE FRAMEWORK, INSTITUTIONAL AND OPERATIONAL CAPACITIES OF AUDIT AUTHORITY OFFICE OF EU FUNDS**

Within the set rates, the competent institution for the implementation is the Audit Authority Office of EU Funds. Of the three planned activities, two have been partially implemented, while one activity is foreseen to be completed in the second quarter of 2016.

The reason for moving the deadlines for implementing result **14.1** and the first activity - *Prepare and adopt the optimal legislative acts for the (re)institutionalization of the Audit Authority Office of EU funds*, are the recent parliamentary elections in the RS and the existence of Technical Government that is not empowered to issue or to adopt legislation and bylaws. The Office has prepared the legal framework for reinstitutionalization and submitted it to the Ministry of State Administration and Local Self-Government in January 2016, so that it can submit it to the Government for approval as a proponent.

In the context of **result 14.1**, the third activity – *Ensure the appropriate number of competent staff for executing the scope of responsibility of the Audit Authority Office of EU fund in line with an updated Workload Analysis*, expected to be realized in the third quarter of 2017, is

carried out continuously. By February 2016, the Office filled 80% of jobs. Four employees received the status of certified internal auditors in the public sector, which contributes not only to the strengthening of administrative capacity, but also to the existence of well-organized and efficient Office. A project of technical assistance (TA) "Capacity Building Support AA" has also been prepared.

### **Measure 15 – TO IMPROVE IRREGULARITY MANAGEMENT, ANTI-FRAUD COORDINATION AND COOPERATION AND PROTECTION OF FINANCIAL INTERESTS OF THE EUROPEAN UNION**

The Department for control of public funds of the Ministry of Finance is responsible for the implementation of measure 15. Three out of four activities within the measure 15 have not been implemented during this reporting period, although they were planned in the Program Action Plan.

In the context of the **result 15.1**, the activity - *Conduct an assessment of the current legislative framework for the Budget Inspection in order to identify and plug the gaps to ensure full functionality of the Budget Inspection in line with the EU requirements and SIGMA recommendations*, has not been implemented in due time, but it has been postponed for the fourth quarter of 2016, due to the fact that recommendations of the European Commission and SIGMA representatives have not been submitted to the Budget Inspection yet.

Budget inspection started achieving the set objective within **result 15.2 - *Ensure the appropriate number of competent staff for executing Inspection Services***, by hiring one inspector, in accordance with the number of classified jobs, while training in this field is conducted at scheduled intervals.

**Result 15.3**, the second planned activity - *Increase the number of employees at AFCOS*, which is the responsibility of the Group for combating irregularities and fraud in dealing with EU funds of the Ministry of Finance (AFCOS) was implemented on time, in accordance with the Rulebook on internal organization and job classification of the Ministry. The third activity within the specified results - *Preparation and endorsement of an Administrative Cooperation Arrangement (ACA) between the Ministry of Finance and OLAF* has been partially realized. The fulfillment of the set target is expected by the end of 2016, and the reason for the delay is further harmonization of final version of the Agreement with representatives of OLAF.

Activity within **result 15.4 - *Preparation, consultation and adoption of a national Anti-Fraud Strategy in line with the accession requirements under Chapter 32*** has not been implemented within the prescribed period. Realization of this activity has been postponed for IV quarter of

2016 by when it is expected that the final version of the Strategy will be harmonized with representatives of OLAF and submitted to the Government for opinion and adoption.

### **Measure 16 – TO IMPROVE COVERAGE AND QUALITY OF BUDGET EXECUTION REPORTING**

The Treasury Administration, as an administrative body within the Ministry of Finance responsible for the management of public funds of the Republic of Serbia, has a lead role for the implementation of two activities under **result 16.3**, which were realized in due time.

The first activity was conducted by sending a letter to all users who need to record their obligations into the *RINO* system, in accordance with the law.

The third activity within **result 16.3** was realized within the deadline. In accordance with the Law on terms of settlement of financial obligations in commercial transactions<sup>6</sup>, the *RINO* system has been extended, so that it applies to transactions between public sector entities as of 1 January 2016. Supervision over the implementation of the Law is carried out by the Sector for Budget Inspection.

Also, the activity *Extend the coverage of the FMIS system on a step-by-step basis to IBBs, including them in the accounting and reporting framework as they are brought into the system.*, within the framework of **result 16.1**, has been partially realized through the involvement of judicial authorities (courts and public prosecutor's offices) in the *FMIS* system as of 1 January 2016, and the deadline for implementation of activities is the first quarter of 2018. In order to fully implement the activity, the necessary preparatory activities are being carried out for the planned indirect involvement in *FMIS* from 1 January 2017.

### **Measure 17 - MOVING GRADUALLY AND SYSTEMATICALLY TOWARDS ACCRUAL BASIS ACCOUNTING**

**Result 17.1, *Completeness and coverage of accounting information improved through the implementation of Accrual Accounting based on IPSAS standards***, has set 15 activities, and provides for the realization of three activities in the first half of 2016. The Treasury has carried out two activities in full, while one has been partially realized. The fifth activity was realized before the planned date.

---

<sup>6</sup>Official Gazette of the RS, no. 119/2012 and 68/2015

The first activity - *Establish a government sector accounting standard setting council*, was partially implemented due to technical mandate of the Government of RS. The Responsible Management has prepared a draft decision on the establishment of the Committee (Council) for the introduction of international accounting standards for the public sector as well as the draft text of amendments to the Law on the budget system as the basis for the establishment of the Committee. Decisions on the composition and establishment of the Committee and adoption of amendments to the text of the Law on the budget system are expected in late 2016 or early 2017.

Another activity of the mentioned result – *Develop a gap analysis between current accounting practices and accrual IPSAS* has been realized within the deadline, due to the fact that the mentioned mismatch analysis was prepared in the context of reports of technical assistance of the IMF.

The third activity - *Preparing a realistic road map towards full accrual accounting in the government sector*, was also implemented on schedule, with technical assistance from the IMF. The report of technical assistance of the IMF in July 2016 recommended that the RS Government formally adopt the road map for the transition to accrual accounting. Adoption is expected in the fourth quarter of 2016.

A pro forma financial statement was prepared for the Republic budget for 2015, in accordance with the IPSAS standards for the central government. The document was drafted before the scheduled deadline, i.e. the second quarter of 2019.

### **Measure 18 – TO STRENGTHEN COVERAGE AND QUALITY OF EXTERNAL AUDITS**

Within measure 18, the State Audit Institution (SAI) is responsible for **three results**, namely: **18.1** The State Audit Institution (SAI) carries out financial, compliance and performance audits as mandated by the Law and in line with the ISSAIs standards; **18.3** Internal quality control and quality assurance function within the SAI fully developed and operational; **18.4** Systemic follow-up of implementation of audit recommendations improved. Deadlines for the implementation of these results are set in the period from the fourth quarter of 2017 to the end of 2020.

SAI has already taken specific actions for the said results, which means that they have already been partially realized at the moment.

For **result 18.1**, whose deadline is the fourth quarter of 2020, SAI adopted an Audit Program for 2016 on 28 December 2015 and the realization of audit started. The list of subjects where the audits began based on the Program can be found on the official website of the SAI. Amendments to the Audit Program were adopted at the 6th session of the Institution Council on 8 July 2016.

The Audit Program was amended by adding an entity – transport company "Lasta AD Belgrade" to the Sector for audit of public enterprises, companies and other legal persons founded by users of public funds or in whose capital or management the users of public funds are involved, and specifying the topic for audit of expediency "The efficiency and cost-efficiency of applying the negotiated procedure without publication of a call for proposals" at the Sector for the expediency of business.

In addition to the audit manual adopted in April 2015, during the 2016 SAI has also made:

- Guidelines for post-audit procedure;
- Guidelines for assessing forms of violations of the obligation of good business of audit entities;
- Instructions the for preparation of reports on the audit of financial statements and regularity of operations;
- Checklists for quality control of audit of financial statements and regularity of operations.

In order to ensure the continued implementation of audits in accordance with the law, ISSAI standards and audit manuals, SAI has, through internal instructions and guidelines, further regulated the post-audit procedure and through the adoption of appropriate forms and instructions, it has directed the staff in conducting audits.

In March 2016, SAI organized a three-day internal training for practical application of the audit manual for all (new) employees.

In April 2016, SAI hosted and participated in regional workshops on audit opinions, organized within the activities of the Network of Supreme Audit Institutions of the candidate countries and potential candidates.

In April 2016, employees of the Sector for audit of expediency and the Sector for methodology and quality control, successfully attended training for trainers in the field of expediency audit.

In June 2016, a three-day internal training of SAI on materiality, risk assessment and sampling was organized for the state and authorized state auditors. In September and October 2016, two more advanced training on issues of materiality, risk assessment and sampling are planned, which will be held by external experts and representatives of the European Court of Auditors.

The institution is actively involved in the Second project of parallel expediency audit, conducted by the Network of Supreme Audit Institutions of candidate countries and potential candidates. In February and June 2016, the first and second workshop within the framework of this project were held.

The European Court of Auditors organizes five-month internships each year for auditors from the supreme audit institutions of the candidate countries for EU membership. This type of organization has existed since 1999 and is considered an important instrument for access to the audit of EU funds for auditors from the Supreme Audit Institutions of future Member States. SAI regularly participates in five months internship program at the European Court of Auditors.

In addition to membership in INTOSAI and EUROSAI, SAI is a member of EUROSAI Working Group on Audit and Ethics, the Working Group on IT and the Working Group for the revision of accidents and disasters and actively participates in their work.

**For activity 18.2**, which is not under direct jurisdiction of SAI, whose deadline is the fourth quarter of 2017, SAI submitted the comment on the Draft report on the mission to the Technical Mission of the IMF in October 2015, for amendments to the Budget System Law. The comment contained a proposal for the movement of the deadline for submission of the Draft Law on the execution of the budget of RS to an earlier date in the year, in order to provide input for the audit at an earlier stage of the budget process, in order to extend the time that SAI has at its disposal to carry out the audit of the Draft Law on the execution of the budget of the Republic of Serbia (Article 78). The comment reads: "so that SAI would be able to comply with the requirement that the execution of the budget includes the external audit report, the deadline for formal submission of financial statements SAI should be 30 April and the deadline for submission of financial statements, with the report on the revision, to the National Assembly should be 30 September. In analogy with this, we should consider changes and deadlines for submission of financial statements at the level of local authorities. The deadline for formal submission of financial statements of local authorities SAI should be 31 March and the deadline for submission of financial statements, with the report on the audit, to local government councils should be 15 August."

**For activity 18.3**, with the implementation deadline at the end of 2017, in April 2016 supreme state auditor was appointed in the Sector for audit methodology and quality control. This sector, which currently has three employees, has passed all SAI organized internal trainings.

**For activity 18.4**, with the implementation deadline of third quarter 2018, SAI has, in order to monitor the audit, set up a database in which data is entered on the audits performed. To enable the use of this database for the establishment of a database on the recommendations contained in the audit, the existing database is filled with audit data from previous years and the current audit and the analysis of its functioning for future improvements.

## **Measure 19 – TO STRENGTHEN PARLIAMENTARY SUPERVISION OVER PUBLIC FINANCES**

Within measure 19, **result 19.1**, the first activity - *Making the necessary organizational arrangements to deliberate external audit work and establishing clear written procedures for deliberation of audit reports with deadlines for deliberation and taking action for Committee for Finance, Budget and Control Over Use of Public Resources of the National Assembly*, the realization was started by the National Assembly, in the form of carrying out the necessary organizational preparations for the consideration of external audit and the establishment of clear written procedures for the consideration of the report on the audit with deadlines for examination and treatment of the Committee. In the future, a subcommittee for the consideration of the reports of the audits performed by the SAI<sup>7</sup> will prepare a draft decision that will define a clear procedure for the consideration of audit reports, the treatment of the Committee and the terms in which these reports will be considered. By mid-September, procedures will be made. The Committee on Finance, State Budget and Control of Public Spending of the National Assembly shall, in one of the sessions that will take place in early October, adopt the relevant decision, which will enable carrying out this activity within the deadline.

For the second activity within the aforementioned result - *Organize meetings of the Committee for Finance, State Budget and Control of Public Spending in the form of hearing for discussion of audit reports*, the beginning of implementation is conditioned by the adoption of clear written procedures for reviewing audit reports. According to the action plan of the Program, the deadline for the implementation of the activity is the third quarter of 2017. In consultation with representatives of SAI and USAID, the Committee on Finance, State Budget and Control of Public Spending of the National Assembly plans to organize the first meeting in the form of listening by the end of this year.

---

<sup>7</sup>The Committee on Finance, State Budget and Control of Public Spending of the National Assembly established the Subcommittee for considering the report of the audit activity of the SAI, as its working body at the meeting held on 21 July 2016.

## VI CONCLUSION

When considering the submitted contributions from the relevant institutions and organizational units, it is noted that significant steps have been taken towards the realization of planned activities and achievement of planned results. In addition, it is noted that there is a significant number of activities that have been partially or fully implemented before the planned deadlines. One of the key challenges in the realization of certain activities is the fact that, during one half of the reporting period, a technical mandate of the Government was in effect, which led to a short deviation, especially when it comes to the adoption of laws or bylaws.

The Report on the Implementation of the Public Financial Management Reform Program 2016 - 2020 is an important aspect of ensuring the successful implementation of the program and the planned reform steps, and as an important document for the approval of Sector Budget Support of the European Union from IPA funds for all areas and sectors in which it is provided or will be provided in the future, bearing in mind that developed public finances are one of basic conditions of sectoral allocation of EU budgetary support, apart from the macroeconomic situation. In the future, signing of a financing agreement is planned between the Government of the RS and the European Commission on the sectoral budgetary support for the Sector of public administration reform. On this occasion, this report shall represent a confirmation of commitment to public finance reform in the Republic of Serbia.

Tabulation of implementation of activities by institution/organization units can be found below.

<b>Institution/Organization unit</b>	<b>Completed</b>	<b>Partially completed</b>	<b>Not completed</b>
MoF, Budget Department	1	2	2
MoF, Treasury Administration	4	1	/
MoF, Department for control of Public funds	1	/	3
Audit Authority Office of EU Funds	/	1	/
MoF, Department for internal control and internal audit	/	1	/
<b>TOTAL:</b>	<b>6</b>	<b>5</b>	<b>5</b>

Table 1: Overview of the total number of activities and levels of realization by responsible institutions/organizational units

The next report on the implementation of the public financial management reform on an annual level (for 2016 as a whole) will be prepared in early 2017.

In the next reporting period, which will include activities whose deadline for realization is III and IV quarter of 2016, the plan is to implement 18 activities within 13 results, i.e. eight measures. The largest number of the activities mentioned relate to the improvement of the policy and legislative framework for the implementation of internal financial controls in the public sector; improvement of public procurement; improvement of the management of irregularities, coordination and cooperation on combating fraud and the protection of the financial interests of the European Union; improvement of the program budgeting process; establishment of a single platform for planning capital projects and methodologies for the analysis and planning of public investment; improved monitoring and reporting on due arrears; improved coverage and completeness of accounting information through the implementation of accrual accounting under IPSAS standards; and the strengthening of parliamentary supervision over public finances. In addition to the activities for which the deadlines are III and IV quarter of 2016 in the Public Financial Management Reform Program, the report will include activities from the previous period, which have been partially implemented or not implemented on time.

By the end of the year, a revision of the Program is planned in the area of costs and indicators of implementation, but also in order to harmonize the planned activities. The finalization of the vertical Functional analysis of the Ministry of Finance is underway, on the basis of which a corresponding action plan will be prepared for the implementation of recommendations, which will also be taken into account during the revision of the Program.

## VII TABLE OF IMPLEMENTATION OF THE ACTION PLAN

MEASURE 1 TO IMPROVE THE CREDIBILITY OF MACROECONOMIC FORECASTING										
RESULT	ACTIVITY	TIMEFRAME	INDICATORS	ACTIVITY STATUS	Achievement by the activity, along with a link to a document / attached document	IF THE ACTIVITY IS NOT COMPLETED IN PRESCRIBED TIMEFRAME, OR IT WAS STARTED			LEADING INSTITUTION	PARTNER INSTITUTION
				completed		The reasons of discrepancies from the plan	Key milestones to implement the activity, with the recommendation	Expected time of implementation of activities		
				partially completed						
				not completed						
1.1 Strengthened capacities of the Ministry of Finance for improved macroeconomic forecasting and improved methodological approach	Procurement, customization and implementation of the Bridge Model to improve GDP forecasting	1 <sup>st</sup> quarter 2017							<b>MoF/ Department for Macroeconomic and Fiscal Analyses and Projections</b>	
	Strengthened the capacity for carrying out long term fiscal sustainability analyses	4 <sup>th</sup> quarter 2017		Series of workshops was started (detailed in the narrative part)						

MEASURE 1	TO IMPROVE THE CREDIBILITY OF MACROECONOMIC FORECASTING									
RESULT	ACTIVITY	TIMEFRAME	INDICATORS	ACTIVITY STATUS	Achievement by the activity, along with a link to a document / attached document	IF THE ACTIVITY IS NOT COMPLETED IN PRESCRIBED TIMEFRAME, OR IT WAS STARTED			LEADING INSTITUTION	PARTNER INSTITUTION
				completed		The reasons of discrepancies from the plan	Key milestones to implement the activity, with the recommendation	Expected time of implementation of activities		
				partially completed						
				not completed						
1.2 Ensured administrative and technical capacities of managing the EU own source scheme	Strengthen the capacity of the coordinating body and all other institutions involved in revenue collection for correct calculation, accounting, forecasting, collection, payment and control of own resources	2 <sup>nd</sup> quarter 2017	Dedicated staff in the partner institutions appointed.  Methodology for calculation, accounting, forecasting, collection, payment and control of own resources adopted (2017)	One work position for coordination and management of EU own resources system was filled within the Department for Macroeconomic and Fiscal Analyses and Projections, and one seminar was organized on the relevant topic ( detailed in the narrative part)	Strengthening the capacity of the Customs Administration for participation in preparing Negotiating position for Chapter 33, has been carried out through the organization of TAIEX workshop and through participation in the workshops organized by MoF.				MoF/ Department for Macroeconomic and Fiscal Analyses and Projections	Tax Administration Customs Administration Treasury Administration

MEASURE 2										TO IMPROVE THE COVERAGE OF THE NATIONAL BUDGET									
RESULT	ACTIVITY	TIMEFRAME	INDICATORS	ACTIVITY STATUS	Achievement by the activity, along with a link to a document / attached document	IF THE ACTIVITY IS NOT COMPLETED IN PRESCRIBED TIMEFRAME, OR IT WAS STARTED			LEADING INSTITUTION	PARTNER INSTITUTION									
				completed		The reasons of discrepancies from the plan	Key milestones to implement the activity, with the recommendation	Expected time of implementation of activities											
				partially completed															
				not completed															
2.1 Institutional coverage of the national budget expanded	Gradual and systematic inclusion of own sources and budget beneficiaries into the national budget	4 <sup>th</sup> quarter 2020	Reliable financial plans of Indirect Budget Beneficiaries included in the national budget (2018) <i>IV: Courts, public prosecutors and judiciary institutions included (beg.2016)</i> <i>TV: Prisons, cultural institutions included (2017)</i> <i>TV: Social protection institutions included (2018)</i>							MoF/Budget Department	Indirect Budget Beneficiaries								

MEASURE 2												
TO IMPROVE THE COVERAGE OF THE NATIONAL BUDGET												
RESULT	ACTIVITY	TIMEFRAME	INDICATORS	ACTIVITY STATUS			Achievement by the activity, along with a link to a document / attached document	IF THE ACTIVITY IS NOT COMPLETED IN PRESCRIBED TIMEFRAME, OR IT WAS STARTED			LEADING INSTITUTION	PARTNER INSTITUTION
				completed	partially completed	not completed		The reasons of discrepancies from the plan	Key milestones to implement the activity, with the recommendation	Expected time of implementation of activities		
2.2 Expanded coverage of external sources of funding in the national budget	Gradual and systematic inclusion of donor assistance in the national budget and budget execution documentation	4th quarter 2020	Percentage of external funds included in the national budget and budget execution documentation 2018 compared to the baseline value in 2016								MoF/Budget Department	European Commission Bilateral Donors European Integration Office

MEASURE 3										TO FURTHER IMPLEMENT MULTI-ANNUAL PROGRAM BUDGETING ACROSS ALL LEVELS OF GOVERNMENT									
RESULT	ACTIVITY	TIMEFRAME	INDICATORS	ACTIVITY STATUS	Achievement by the activity, along with a link to a document / attached document	IF THE ACTIVITY IS NOT COMPLETED IN PRESCRIBED TIMEFRAME, OR IT WAS STARTED			LEADING INSTITUTION	PARTNER INSTITUTION									
				completed		The reasons of discrepancies from the plan	Key milestones to implement the activity, with the recommendation	Expected time of implementation of activities											
				partially completed															
				not completed															
3.1 Improved process of program budgeting	Procurement and customization of software for the management of public finances, which connects the planning, execution and control	4th quarter 2016	Percentage of compliance of program structures of budget users with Guidelines for the preparation of the Program Budget IV: % to be determined after adoption of Guidelines TV: To be determined						MoF/Budget Department	General Secretariat of the Government, Public Policy Secretariat of the Republic of Serbia, Human Resource Service of the Government									
	Customization of the software for the management of public finances in order to ensure the appropriate interface with the module for Public Policy Planning	2nd quarter 2017																	

MEASURE 3										
TO FURTHER IMPLEMENT MULTI-ANNUAL PROGRAM BUDGETING ACROSS ALL LEVELS OF GOVERNMENT										
RESULT	ACTIVITY	TIMEFRAME	INDICATORS	ACTIVITY STATUS	Achievement by the activity, along with a link to a document / attached document	IF THE ACTIVITY IS NOT COMPLETED IN PRESCRIBED TIMEFRAME, OR IT WAS STARTED			LEADING INSTITUTION	PARTNER INSTITUTION
				completed		The reasons of discrepancies from the plan	Key milestones to implement the activity, with the recommendation	Expected time of implementation of activities		
				partially completed						
				not completed						
Continuation 3.1 Improved process of program budgeting	Process analysis, monitoring and control of program budgeting and identify recommendations for improvement	1st quarter 2016	Percentage of compliance of program structures of budget users with Guidelines for the preparation of the Program Budget	completed					MoF/ Budget Department	General Secretariat of the Government, Public Policy Secretariat of the Republic of Serbia, Human Resource Service of the Government
	Improving the methodology of the program budget and preparation of the new guidelines in accordance with the recommendations	2nd quarter 2016	<i>IV: % to be determined after adoption of Guidelines</i> <i>TV: To be determined</i>	partially completed		Further consultations on the development of a module for reporting on program budgeting	A module for reporting on program budgeting developed	3rd quarter 2016		

MEASURE 3										
TO FURTHER IMPLEMENT MULTI-ANNUAL PROGRAM BUDGETING ACROSS ALL LEVELS OF GOVERNMENT										
RESULT	ACTIVITY	TIMEFRAME	INDICATORS	ACTIVITY STATUS	Achievement by the activity, along with a link to a document / attached document	IF THE ACTIVITY IS NOT COMPLETED IN PRESCRIBED TIMEFRAME, OR IT WAS STARTED			LEADING INSTITUTION	PARTNER INSTITUTION
				completed		The reasons of discrepancies from the plan	Key milestones to implement the activity, with the recommendation	Expected time of implementation of activities		
				partially completed						
				not completed						
Continuation 3.1 Improved process of program budgeting	Conducting training for civil servants to improve the program budget	2nd quarter 2016.	Percentage of compliance of program structures of budget users with Guidelines for the preparation of the Program Budget IV: % to be determined after adoption of Guidelines TV: To be determined	not completed		Improved methodology for program budgeting not completed	Improved methodology for program budgeting completed	3rd quarter 2016	MoF/Budget Department	General Secretariat of the Government, Public Policy Secretariat of the Republic of Serbia, Human Resource Service of the Government
	Implementation of the budget cycle for 2017 in line with the improved methodology	2nd quarter 2016.		partially completed		The spring part of the budget cycle has not been implemented according to the updated methodology because the improved methodology still not completed. The autumn budget cycle will be implemented under the new methodology.	Improved methodology for program budgeting completed	3rd quarter 2016		

MEASURE 4										
TO IMPROVE PUBLIC INVESTMENT PLANNING										
RESULT	ACTIVITY	TIMEFRAME	INDICATORS	ACTIVITY STATUS	Achievement by the activity, along with a link to a document / attached document	IF THE ACTIVITY IS NOT COMPLETED IN PRESCRIBED TIMEFRAME, OR IT WAS STARTED			LEADING INSTITUTION	PARTNER INSTITUTION
				completed		The reasons of discrepancies from the plan	Key milestones to implement the activity, with the recommendation	Expected time of implementation of activities
