CURRENT MACROECONOMIC AND FISCAL DEVELOPMENTS

In the period March-May, a state of emergency was declared in Serbia and a restriction of movement was introduced as a measure to combat the Covid-19 virus pandemic, and restrictions of various types and intensities continued in the following months, which caused disturbances in all spheres of social and economic life. The total amount of funds, which was made available to the economy and the population in 2020 through economic assistance measures, reached 12.7% of GDP. In addition to a set of economic measures, the Government of the Republic of Serbia also made decisions related to assistance to the health sector and pensioners, and the National Bank of Serbia adopted measures within its competence. In the coming period, the focus of fiscal policy will be ensuring of people's health and lives, and the second priority is supporting employment and liquidity of the economy.

1. Current macroeconomic developments

1.1. Economic activity

Gross domestic products. In the third quarter of 2020, gross domestic product (GDP) recorded a year-on-year decline of 1.4%. Data on economic growth in the first two quarters were corrected by 0.1 pp upwards. Observed from the production side, the most significant negative impact of 1.2 pp gives construction, due to last year's high base. Negative is the impact of the wholesale and retail trade and repair of motor vehicles, transport and storage and accommodation and food services and the sector of professional, scientific, innovative and technical activities and administrative and ancillary services with a contribution of -1.3 pp. Industrial production had a positive impact on GDP growth of 0.6 pp, and agricultural production had a positive impact with 0.3 pp.

Observed by expenditure aggregates, a real decline was recorded in all components. The largest negative impact on GDP of -2.8 pp gave net exports. Investments were negative with 1.3 pp. Household final consumption expenditure made a negative contribution to the growth of 0.7 pp and government final consumption expenditure -0.2 pp. Excluding the influence of the season, the value of GDP in the third quarter of 2020 is higher by 7.4% compared to the previous quarter.

Industrial production. According to the Statistical Office of the Republic of Serbia (SORS) data, industrial production in October 2020 has increased annually by 1.9%, while compared to the average industrial production in 2019 increased by 12.7%. The largest influence on industrial production growth in October 2020 compared to October 2019 had the divisions of: electricity, gas, steam and air conditioning supply, manufacture of electrical equipment, manufacture of food products, manufacture of rubber and plastic products, as well as manufacture of fabricated metal products, except machinery and equipment.

Observed by NACE Rev. 2, in October 2020, annual increase of 18.9% and 0.6% was registered in electricity, gas, steam and air conditioning supply and section of mining and quarrying, respectively, while the decrease was recorded in manufacturing of 0.9%. The largest increase in production was recorded in manufacture of computer, electronic and optical products (45.8%), while manufacture of basic metals has decreased the most (-38.8%).

The industrial production volume in October 2020, in comparison to the same month in 2019, recorded an increase within 12 divisions, which accounts for 59% of the total industrial production, while a decrease in 17 divisions, which accounts for 41% of the total industrial production.

Observed by the **Main industrial groupings (MIGs)**, in October 2020, compared to October 2019, an increase in the production was recorded in the production of durable consumer goods (25.5%), energy (8.1%) and capital goods (0.7%), while a decrease was recorded in the production of intermediate goods, except energy (-2.3%) and non-durable consumer goods (-0.8%).

In the first ten months of 2020 it was recorded an increase of industrial production of 0.3%. Observed by MIGs, the main contribution to the increase of industrial production came from the production of energy (2.5%), due to the increase in manufacture of coke and refined petroleum products. The production of non-durable consumer goods increased by 1.3%, due to the growth in production of pharmaceutical and food industry, while higher production of electrical equipment influenced the growth of durable consumer goods of 6.6%. A decrease in production of manufacture of basic metals and manufacture of rubber and plastic products has influenced in a 1.6% fall of intermediate goods, except energy. Production of capital goods decreased by 5.2%, due to the decrease in production of motor vehicles, trailers and semi-trailers.

The seasonal adjustment of the industrial production index for October 2020, compared to September 2020, indicates an increase of 0.3% of the overall industrial production and a decrease of 0.5% of manufacturing.

According to the SORS data, in October 2020 stocks increased by 3.0% compared to October 2019. The largest annual decrease in stocks in October was recorded in the stocks of manufacture of textiles (-55.2%), while the largest growth was in the stocks of manufacture of machinery and equipment n.e.c. (192.7%).

Retail trade turnover. Annual growth of the retail trade turnover in October 2020 increased by 5.9% in nominal and by 6.3% in real terms, compared to October 2019. Also, in October, turnover in real terms, increased by 15.4% compared to the average monthly retail trade turnover in 2019, while compared to the previous month, increased by 5.1%.

Annual growth of the category food, beverages and tobacco was 5.2% in nominal terms, while in real terms increased by 1.4%. Category non-food products, except automotive fuel increased in nominal and real terms by 16.3% and 15.3%, respectively. Motor fuel's turnover decreased by 10.1% in nominal terms and increased by 1.1% in real terms.

Increase in the retail trade turnover in nominal terms was observed in all the regions: Srbija – Sever by 5.1%, Region Vojvodine by 5.3% and Srbija – Jug by 7.0%, y-o-y. Observed in real terms, growth in the turnover was

registered in all the regions, and the biggest increase of 8.3% y-o-y was recorded in the Srbija – Jug region.

In the period January–October 2020, compared with the same period of 2019, the retail trade turnover increased by 4.8% in nominal and by 5.2% in real terms.

Tourism. Annual fall in the number of tourists' visits was registered in October 2020 (-49.3%). At the same time, the number of overnight stays decreased by 37.5% compared to the same month of the previous year. The number of domestic tourists' visits decreased by 20.7%, while the number of their overnight stays decreased by 14.9%, compared to the same month in 2019. At the same time, the number of foreign tourists' visits declined by 75.0%, while their overnight stays decreased by 66.2%. Share of the foreign tourists' visits and their overnight stays was 25.9% and 23.8%, respectively.

Most of the tourists in October 2020 originated from Israel, Bosnia and Herzegovina, Turkey, Montenegro and Germany (47.3% of the total number of foreign tourists' visits and 48.9% of the total overnight stays), while the largest annual growth was registered in the tourists' visits from Israel. In October, spas had the largest number of tourist arrivals and overnight stays (28.6% of the total number of arrivals and 37.7% of the total number of overnight stays). A higher number of domestic tourists compared to foreign tourists was recorded in all places, except in the city of Belgrade, where most of the tourists were foreigners (66.1% of the total number of visits).

In the period January–October 2020, the number of tourists and their overnight stays totalled 1,633,161 and 5,581,391, respectively. The number of tourists' visits decreased by 48.4%, while the number of their overnight stays decreased by 36.2%, compared to the same period of 2019. Also, it was registered decrease in the number of foreign tourists' visits and their overnight stays by 74.8% and 67.8%, respectively. At the same time, the number of domestic tourists' visits decreased by 22.2%, while their overnight stays decreased by 15.9%.

1.2. External Trade and Balance of Payments

External trade. In October 2020, it was exported EUR 1,656.4 million of goods, which is higher by 2.3% compared to October 2019. The biggest contribution to the growth of exports came from the exports of crop and animal products (2.1 pp), electrical equipment (2.0 pp) and export of metal oresium (1.9 pp). Import of goods amounted to EUR 2,090.9 mill, which is less by 2.7% compared to the same month in previous year.

Foreign trade deficit amounted to EUR 434.6 million, which is less by 17.9% compared to the same month in previous year, while 79.2% of the exports was covered by the imports.

Seasonally adjusted series shows that in October 2020 in comparison to the previous month, export increased by 3.7% and import decreased by 1.2%.

In the period January–October of 2020, exports and imports amounted to EUR 13,859.5 million and 18,613.2 million, respectively, which is less by 5.2% and 4.5%, compared to the same period of previous year. During the observed period, trade deficit amounted to EUR 4,753.7 million which is lower by EUR 126.4 mill. compared to the same period year before.

According to the SITC sections, in the period January–October of 2020, the largest share in the exports came from the export of electrical machinery and apparatus (12.1%). Significant share in the exports also came from vegetables and fruit, cereals and cereal preparations, power-generating machinery and rubber products, which including electrical machinery amounted for 31.4% of total exports. In observed period, 25.3% of total imports came from import of electrical machinery and apparatus, road vehicles, general industrial machinery and equipment, medicinal and pharmaceutical products and petroleum and petroleum products.

In observed period, positive trade balance (EUR 1,487.8 million) was achieved by the following sectors: food and livestock, miscellaneous manufactured products, beverages and tobacco and animal and vegetable oil.

In the period January–October 2020, largest external trade partners were EU countries on which related 64.6% of total exports and 58.6% of the total imports. In observed period 39.6% of the total exports were related to the trade with: Germany, Italy, Bosnia and Herzegovina, Romania and Russian Federation. Imports from Germany, China, Italy, Russian Federation and Hungary accounted for 45.4% of the total imports. Surplus of EUR 2,164.4 million was achieved in external trade with Bosnia and Herzegovina, Montenegro, North Macedonia, Romania, Bulgaria, Czech Republic, Croatia, Slovakia, United Kingdom, Sweden and Moldova. The largest deficit was achieved in external trade with China (due to imports of

telephones for network stations and laptops), Germany and Turkey.

Balance of payments¹. In September 2020, the current account recorded a deficit of EUR 162.9 million, which is higher by EUR 26.4 million compared to the same month of the previous year. Higher current account deficit was due to higher goods deficit, which is higher by EUR 69.1 mill, while on the services account is recorded a surplus amounted to EUR 73.3 mill.

In September 2020, net inflow of foreign direct investments amounted to EUR 36.4 million, which is lower by EUR 207.4 mill, compared to the same month in previous year.

In the period January-September 2020 the current account deficit amounted to EUR 1,713.9 million and it was lower by EUR 300.1 million compared to the same period of previous year, due to lower deficit on goods and services account and lower primary income deficit. The trade deficit increased by EUR 31.2 million, while the surplus in the services trade increased by EUR 119.3 million. The primary income deficit decreased by EUR 635.1 mill, mainly due to lower outflows of investment income. The secondary income surplus is lower by EUR 423.2 million compared to the same period of previous year and amounted to EUR 2,432.4 million.

¹ Since April 2014, Balance of Payments of the Republic of Serbia is being presented according to the Balance of Payments Manual and Public Finance Bulletin, October 2020

In the observed period, net inflow of foreign direct investments amounted to EUR 1,727.8 million, which is lower by EUR 856.6 mill. compared to the same period of previous year. Portfolio investments recorded net inflow of EUR 1,327.3 mill, mostly due to fact that Government issued 7Y Eurobonds worth 2 billion euros, while other investments recorded net outflow of EUR 1,185.4 million.

1.3. Inflation

Under negative effects of coronavirus annual inflation in October 2020 totalled 1.8%. The biggest impact on inflation in September was due to the increase in the prices of fruit, vegetables, tobacco, meat products, telephone services, energy and travel arrangements. Strong impact in the opposite direction came from the oil derivatives price drop.

Consumer prices in October 2020 increased slightly by 0.1% compared to previous month.

Core inflation, measured by the increase of the consumer prices from which is excluded the increase of energy, food, alcohol and tobacco in October increased by 0.4%, while increased by 1.9%, y-o-y.

1.4. Labor market

According to data from Labor Force Survey in third quarter of 2020, unemployment rate totalled 9.0% which is decrease of 0.5 percentage points y-o-y. At the same time employment rate of 49.9% represents increase by 0.2 percentage points.

According to data from the CROSO registry average number of formally employed in October 2020 increased by 3.4%, y-o-y, which is almost entirely the result of growth in employment in the private sector (4.5%), while in the public sector there was increased of

0.5%. At the same time, most significant growth in employment was recorded in manufacturing industry, trade and construction.

According to the National employment agency data (NEA) at the end of October, number of unemployed persons actively seeking employment totalled 495 thousands, which is compared to the same month of the previous year decrease of 1.0%.

Salaries. In September 2020, the average net salary increased by 9.2%, y-o-y, in real terms, with increase of salaries at the same time in private and in public sector. Observed by activities, the most significant increase in salaries was recorded in the manufacturing industry, health care and trade.

Pensions. Average paid pension in October 2020 increased in real terms compared to the same month of previous year by 3.5%.

1.5. Monetary developments

In October 2020, NBS kept its key interest rate to the level of 1.25%.

Through October, banks as largest single investors in state treasury bills increased their invested funds on that basis by RSD 10.7 billion. Compared to the same month in 2019 banks increased their invested funds by RSD 143.6 billion.

At the end of October 2020, compared to same month of 2019 bank loans to economy registered increased by 12.9%, while loans to households increased by 13.1%. At the same time bank deposits registered growth of 16.7%. In structure of loans to economy by destination biggest share had loans for current assets and investment loans (41.5%, each), with yearly increase of loans for current assets by 23.0% and increase of investment loans by 10.5%. At the same time at loans landed to households, biggest share had cash loans (44.2%) with yearly growth of 18.0% and housing loans (35.6%), with yearly growth of 12.2%.

In structure of bank sources of funds dominant share had borrowed sources. At the end of October 2020 in total fund sources borrowed sources share was 85.6%, which is an increase of 2.0 pp y-o-y, while in comparison to the previous month remained unchanged. In currency structure of funds, foreign currency sources share was 50.4%, and compared to previous month increased by 0.2 pp, while compared to the same month of previous year decreased by 1.7 pp.

NBS foreign exchange reserves increased by EUR 19.8 million compared to previous month, while compared to the same month of previous year decreased by EUR 448.8 million and totaled EUR 13.1 billion at the end of September 2020. FX reserves increased in October owing to inflows on account of efficient FX reserves management, banks' FX reserve requirements due to their regular activities, grants and other sources. Level of NBS foreign exchange reserves was sufficient for coverage of 137% of M1 monetary aggregate and for coverage of more than five months of imports of goods and services.

Household foreign currency savings at the end of October 2020 compared to previous month increased by EUR 100.4 million and totaled EUR 11.3 billion. Compared to same month of previous year foreign currency savings increased by EUR 595.2 million.

Developments on the foreign exchange market in October 2020 compared to previous month were characterized by real appreciation of dinar against Euro of 0.1%, while remained unchanged in nominal terms. In comparison to the same month of 2019, foreign exchange rate recorded real appreciation of 2.1%, while in nominal terms remained unchanged. In order to mitigate extensive daily oscillations of exchange rate, NBS throughout October intervened on the foreign exchange market by net selling EUR 100 million.

1.6. Financial markets

In October 2020 Belgrade stock exchange registered total turnover of securities in amount of RSD 2,948.2 million, from which turnover of shares and Republic of Serbia bonds (RS bonds) totaled RSD 244.7 million and RSD 2,703.4 million, respectively. In comparison to the same month of previous year, total turnover increased by 52.1%. Total number of transactions decreased from 3,532 in October 2019 to 1,463 in the same month of 2020.

Total market capitalization at the end of October 2020 amounted to RSD 490.3 billion and increased by 0.4% compared to previous month, while compared to same month of previous year decreased by 12.3%.

In October 2020 foreign investors share in total turnover accounted for 19.24% and increased by 4.75 pp in comparison to same month of 2019. Share of foreign investors in turnover of shares decreased by 2.46 pp and amounted to 22.70%, while the share of foreign investors in turnover of RS bonds amounted to 18.92%, which represents an increase of 12.10 pp compared to same month in 2019.

During October 2020 on Belgrade stock exchange index BELEXline registered increase in value of 0.2% and totaled 1,506.77 index points, while the value of BELEX15 index increased by 1.3% and totaled 701.76 index points. Compared to same month of 2019, index BELEXline decreased by 6.4% and index BELEX15 also decreased by 6.4%.

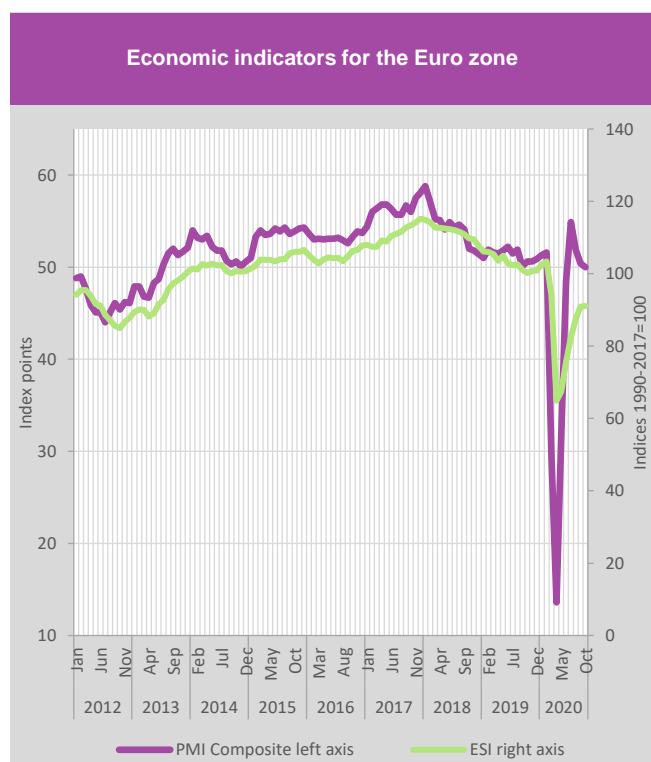

1.7. International environment

According to the preliminary flash Eurostat's estimation, GDP growth in Q3 2020 in the euro area and the EU decreased by 4.3% and 3.9%, respectively, compared to Q3 2019, while comparing to the previous quarter decreased by 12.7% and 12.1%, respectively. According to the EC outlook, the projected growth in the near medium-term period will amount to negative 8.0% in 2020, and it will recover in 2021 and 2022 to 5.0% and 3.2%, respectively, while the average yearly inflation will mildly grow from 0.3% in 2020 to 1.3% in 2022. Growth forecast is takes into consideration uncertainties caused by pandemic in the future period, as well as following downside risks and global uncertainties.

Average **prices of agriculture products** have increased by 5.5% in October compared to the previous month,

while the **food prices** increased by 3.0%. Average **base metals prices** decreased by 0.7% compared to previous month, while the price of iron ore recorded a decrease of 3.0%, and copper price increased by 0.1%. According to the World Steel Association, world production of steel in October 2020 increased annually by 7.0%, while in China increased by 12.7% (which is somewhat more than a half of World production). In the group of **precious metals**, the price of gold has decreased by 1.1%, while the price of silver decreased by 6.3%.

Value of the Composite PMI index in October amounted to 50.0 ip (down by 0.4 ip compared to previous month), due to the decrease of services sector output. Economic Sentiment Indicator (ESI) increased by 0.2 ip in the EU27 (90.2 ip) while in the euro area increased by 0.2 ip (91.1 ip), compared to previous month.

At the end of October 2020, the unemployment rate in the euro area amounted to 8.4%. At the same time, unemployment rate in Germany was 4.5% and in EU27 and Italy it was 7.6 and 9.8%, respectively. At the same time, according to the data of the Russian Statistical Office, in the Russian Federation the unemployment rate was 6.3%.

Trend of inflation during October stagnated, when the euro area registered negative inflation of 0.3%, and the EU27 registered an inflation of 0.3%. At the same time in Germany and Italy was observed a deflation of 0.5% and 0.6%, respectively. Observed by categories the largest increase was in the prices of: food, alcohol and tobacco and services. In Russia, the annual inflation reached 4.0%.

In October, ECB decided to keep the interest rate at record low level of 0%, and continue a temporary long-term refinancing operations with favorable conditions. FED kept key interest rate to an interval of 0.00% to 0.25%.

According to the OPEC data, the price of oil type Urals has amounted to 40.26 \$/barrel in October (down by 1.5% compared to previous month). Since the beginning of the year, oil price decreased by 36.3% compared to the same period previous year, to 40.84 \$/barrel.

¹ Since September 2010 methodology for the external debt statistics has been changed so that the external public debt includes obligations under the IMF SDR allocation, which was used in December 2009, as well as capitalized interest to Paris Club creditors, while the loans concluded before December 20, 2000, under which the payments have not been effected, are excluded from the external debt of the private sector.² NBS has revised the data to the external debt since 2009. ³ On October 1, 2020, the Statistical Office of the Republic of Serbia released the preliminary results of the annual GDP calculations for 2019, as well as the final data for 2018, and the data series from 2015 to 2017 were made compliant with the results of the Supply and Use Tables.

¹ New methodology for salaries, which is applied from 2009. as SORS extended coverage of observation units. In calculation of average salaries, beside salaries paid to employees in enterprises, institutions and organizations, into account are taken also salaries paid to entrepreneurs, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ² Every year in Health and social work section half of salary is paid in December and another half in January. ³ Since 2012 with professional army servicemen.

* Adjusted contracted amounts include changes that occurred during the implementation of financed projects, determined by the final calculation at the handover of the performed works, due to deficiencies in relation to the contracted quantities of works and realized savings, etc. Also, deviations may occur by automatic cancellation of unused funds when the loan availability period expires or at the request of the borrower. The adjusted contractual amounts represent the principal to be repaid.

METHODOLOGICAL EXPLANATIONS

IV

ECONOMIC, FISCAL AND STATISTICS OF PUBLIC DEBT

1. Economic statistics (tables in Chapter I, Macroeconomic Developments) are based primarily on the statistical methodology and data provided by the Statistics Office of the Republic of Serbia, National Bank of Serbia, National Employment Agency, Privatization Agency, Belgrade Stock Exchange, Pension and Disability Insurance Fund of the Republic of Serbia etc.

Economic Statistics contained in the Chapter I includes: main indicators of macroeconomic developments in the annual and monthly dynamics for the current year; gross domestic product (GDP) in constant prices and its growth rates by quarters and usage of GDP; trends in physical volume of industrial production in monthly dynamics (total, by sections and economic purpose); consumer prices trends in annual and monthly dynamics; developments of overall consumer prices (in total and by components) in monthly dynamics for current year; producer prices of industrial products for domestic market and for export in annual and monthly dynamics; developments of exports in monthly dynamics; prices of external trade in annual, quarterly and monthly dynamics; developments in Foreign direct investments in quarterly dynamics; external debt in annual dynamics and in last month of current year; balance of payments in annual and monthly dynamics; monetary survey by years; main monetary indicators, household savings and foreign exchange reserves, total number of employed and unemployed and average net salaries and pension benefits (in dinars and annual real growth rates) in annual and monthly dynamics; an overview of privatization results in annual dynamics and for a specific period of the current year for which there are available data; an overview of trends of indices; market capitalization and foreign investors participation in total turnover on Belgrade Stock Exchange; an overview of turnover of securities on the Belgrade Stock Exchange; an overview of auctions of Republic of Serbia treasury bills in annual dynamics and on daily basis.

2. Fiscal statistics (tables in Chapter II Fiscal Developments) is based on the GFS methodology and data of the Ministry of Finance, Treasury Administration and Public Debt Administration.

Starting from Memorandum on the Budget and Economic and Fiscal Policy for 2009 with projections for 2010 and 2011, IMF methodology – Government Finance Statistics is used to present and create projections for fiscal aggregates. All data in this bulletin have been computed by using the same methodology basis.

The main objectives of alignment with methodology of Government Finance Statistics is the possibility to perceive macroeconomic implications of fiscal policy. It is particularly important to perceive the influence of fiscal policy on domestic demand, hence every item of revenues and expenditures is considered from its aspect, regardless of its classification in accounting.

Here is a comparative overview of the previous and the new methodology of government finance statistics.

1. The level of observation is consolidated government sector that comprises the following levels of government: the central government – budget of the Republic of Serbia and Social Security Organizations; local government – budget of the Autonomous Province of Vojvodina and budgets of municipalities and towns; public road company Putevi Srbije and Koridori Srbije Ltd.

2. Coverage of data: beside budget resources, application of this methodology in computation of fiscal aggregates includes other sources of financing – a part of own resources of government bodies, donations, loans and privatization receipts. The previous coverage included only budget resources and expenditure financed from budget resources.

3. The method of computation of results: The deficit or surplus of consolidated government sector is the difference between revenues and overall expense plus net budget borrowing. The category of net lending is treated as an expense in cases when the purpose of the spending is implementation of a government policy, while if expense is made in order to manage liquidity, it becomes a financing item, without any influence on the government's result.

4. The difference in accounting and statistical coverage of particular items of expenditure: in view of the primary objective – gaining insight into macroeconomic implications of the fiscal policy, particular items of the expenditure, e.g. repayment of debt to pensioners, which is treated in accounting as a part of repayment of debt – without influence on the result, statistically is treated as transfer to citizens and on ground influences increase in domestic demand. Mobile telephony license, treated in accounting as current non-tax revenue, in view of its one-time character is now treated as part of financing.

With advancement of accounting base – i.e. with transition to accrual basis in recording government transactions – conditions will be created for further enhancement of government finance statistics methodology and for alignment with the EU (ESA 95).

The Ministry of Finance is responsible for collection and processing of fiscal data. Fiscal statistics includes: consolidated balance of the general government sector and particular balances, i.e. budget of the Republic of Serbia (central government), budget of AP Vojvodina, budget of local authorities, financial plans of social security organizations, public road company Putevi Srbije and Koridori Srbije Ltd.

General government. General government sector comprises all the levels of government in the country. Subsectors that form general government include: central government – budget of the Republic of Serbia, provincial government – AP Vojvodina, local government – municipalities, towns, social security funds, public road company Putevi Srbije and Koridori Srbije Ltd. Fiscal statistics, with regard to the individual state subsectors, is especially significant for the understanding of interrelation between different governmental levels, separation of functions as well as division of revenues. It is important to determine the amounts and the flow of transfers between governmental levels, which is achievable only owing to the individual and separate balances of all governmental levels. However, only the data presenting the entire general government may provide the information concerning the amount of fiscal operations of the state, consumption of the state and its influence on aggregate demand and total macroeconomic stability, reallocation of collected funds originating from other economic sectors, burden of taxation of the economy, tax structure etc.

Central government – budget of the RoS. Central government comprises all the ministries, agencies, and other special organizations defined as direct or indirect public budget beneficiaries.² The Government may define and achieve set goals concerning economic policy at the level of the entire country, primarily through the implementation of certain measures and programmes by the means of the budget of central government. Other governmental levels do not economic policies concerning the national level. The more centralized is the country, the more significant are the data related to this level of government³.

AP – Vojvodina. Budget of AP Vojvodina comprises all governmental authorities and other special organizations defined as AP Vojvodina budget beneficiaries.

Local self-government. Data concerning local self-government relate to the data collected in all cities and municipalities constituting the local self-government system. The coverage of data at the level of cities or municipalities relate to all direct or indirect budget beneficiaries of a city or a municipality. The budget beneficiary of a city or a municipality is an institution primarily financed from the funds originating from the local government. Local government controls its business activities and it performs certain functions through the institution⁴.

Social security organizations. Social security organizations include the Pension and Disability Insurance Fund, Republic Health Insurance Fund, Military Health Fund and National Employment Service.

Public road company Putevi Srbije. Revenues of Putevi Srbije have the character of public revenues (toll and transfers from republican budget), and repayment of a large part of the company's debt takes place from the Republic of Serbia budget, therefore the company is treated as a part of the general government sector.

Koridori Srbije LTD. are a Government owned company, responsible for investment in road infrastructure.

BASIC FISCAL AGGREGATES

Basic fiscal aggregates are total public revenues, total public expenditures, and the result of the difference between these two categories, which is defined as surplus or deficit in the consolidated balance of general government or balances of individual governmental levels.

Total public revenues are divided into two basic categories: current revenues and yield on capital.

Current revenues are divided into tax and non-tax revenues.

The basic characteristics of **tax revenues** is their mandatory nature and non-existence of any direct reciprocal service for the payment of taxes. The state collects taxes finances certain state functions from collected funds. The benefits related to certain

² Indirect public budget beneficiaries are primary and secondary schools, faculties, scientific institutes, social welfare institutions, cultural institutions and other institutions partly financed from the Republic budget.

³ The largest amount of tax revenues, apart from property taxes, pertains to the budget of the RS. Income tax is renounced in the legally defined percentage to the local self-government, whereas a part of the revenues collected from income taxes realised in the territory of Vojvodina pertains to the AP Vojvodina. This shows the importance of the central governmental level in the country.

⁴ Primary and secondary schools pertain to the central government as their financing is mostly provided from that level. A part of material expenses of schools is financed from local self-government funds but not in the extent sufficient for pertaining of these institutions to the local government. Pre-school institutions are local budget beneficiaries. When reviewing data regarding their revenues and expenditures, they are included in the local government level.

functions cannot be directly connected to an individual who paid the tax.

Income tax comprises wage tax, as well as taxes on other forms of earnings of individuals, beside the wages.

Corporate income tax comprises, in addition to corporate profit tax narrow meaning of the term, also tax on dividends paid to the residents and non-residents, as well as the tax on interests, royalties and capital incomes realized by non-residents.

VAT comprises national VAT, import VAT, and the arrears of turnover taxes from the previous years.

Excise duties present consumption taxes concerning specific products such as oil, tobacco, coffee, alcoholic beverages etc.

Customs duties and other import duties comprise revenues from duties paid for import of goods and services, with the exception of the VAT on imported goods that is included in VAT revenues.

Other tax revenues comprise taxes on use, ownership and carrying of goods, and other taxes. The property tax of local government is included in the category of other tax revenues in the general government consolidated balance.

Non-tax revenues are heterogenic category of revenues including property revenues (collected interest, rental fees) compensations, taxes, fines and other revenues that cannot be classified. As opposed to tax revenues, non-tax revenues imply the existence of reciprocal favor for the sum collected - e.g. the compensation for the usage of natural resources. However, there are revenues that may by their characteristics be classified as non-tax revenues, but without implying the reciprocal favor for the collection. Fines are a typical example of this sort of revenue.

Capital revenues comprise only revenues originating from the sale of capital goods, as well as the capital transfers from non-governmental institutions. The sale of capital goods imply the sale of non-financial assets, buildings, inventories and state-owned land.

Total expenditures in the Bulletin of Public Finance are presented according to the economic classification emphasizing the type of expenses, i.e. its economic characteristics and influence of state consumption on the market of goods and services, financial market and reallocation of income. In addition to the economic

classification of expenditure, there is also a functional classification emphasizing the function the state performs by using of funds for specific purposes⁵. The Bulletin of Public Finance does not contain expenditures classified in accordance with the functional classification.

Overall expenditure is divided into current expenses, capital expenses and net budget borrowing.

Current expenses present final budget outflows, and are not intended for the procurement of non-financial assets.

Compensation of employees comprise (net) salaries of employees including income tax and contributions paid by employees, contributions paid by employers, as well as other fringe benefits (transport allowance, sick leave allowance for the period up to 30 days etc.).

Procurement of goods and services comprise payments related with coverage of business expenses (electricity, phone bills etc.), business trips, services contracts, current maintenance and procurement of material.

Repayment of interests is divided into repayment of interests on domestic debt, interests on external debt, interests based on activated guarantees and accompanying borrowing expenses.

Subsidies comprise all the funds transferred to the economic sector (public enterprises, registered agricultural holdings etc.) for the coverage of running expenses or/and the grant intended for current business activities.

Social insurance and social welfare expenses include payments to person insured with social security organizations (pensions of beneficiaries of Pension and Disability Insurance Fund, sick leave benefits paid by the Republic Health Insurance Fund, unemployment benefits paid by the National Employment Service, Repayment of debt to pensioners, children and family benefits, benefits for war-disabled persons, pregnancy leave benefits, housing benefits, Military Health Fund expenditures etc.

Other current expenses include grants to non-governmental organizations, mandatory levies and penalties imposed by one governmental level to another, fines and penalties imposed by courts and judicial bodies, injury compensations or compensations for damages incurred by natural disasters, and damages incurred by the public bodies.

housing construction and municipal services, healthcare, recreation, culture and religion, education and social welfare.

⁵ Division of expenditures according to the functional classification is the following: general public services, defence, internal security, economic affairs, environmental protection,

Capital expenses comprise all the payments intended for the procurement of non-financial assets, construction of buildings and infrastructure, procurement of equipment and inventories and the purchase of land.

Net lending are expenses for purchase of financial assets whose objective is implementation of a particular government policy.

General government consolidated balance contains consolidated revenues and consolidated expenditure.

Consolidated revenues are aggregate revenues of individual governmental levels, but in the consolidation procedure, transfers received from other governmental levels are excluded. In the consolidation procedure, benefits paid by general government in the function of employer are excluded from the revenues of mandatory social insurance organizations.

Consolidated expenses present aggregate expenditures of individual governmental levels, while in the consolidation procedure, transfers provided from one governmental level to another are excluded. In the consolidation procedure, expenditures paid by general government in the function of employer are excluded from the expenditures.

Consolidated surplus / deficit is a difference between consolidated revenues and consolidated expenditure.

Balance surplus/ deficit of individual governmental levels is a difference between total revenues and total expenditures, at a particular governmental level.

Earnings not included in the revenues of general government present earnings based on domestic and external borrowing and earnings based on the privatization of state-owned enterprises.

Expenses that are not included in general government expenses are those for repayment of principal of national and foreign debt and expenses for purchase of financial assets that cannot be classified as net lending.

3. Public Debt Statistics (Tables in Chapter III – Public Debt) is based on the data of the Republic of Serbia Treasury Administration. The public debt of the Republic of Serbia consists of direct liabilities (received loans) and indirect liabilities (issued guarantees).

Direct Liabilities

Direct Liabilities of the RoS are those incurred on the basis of the loans taken. Direct liabilities, depending on the creditor, constitute the following: (1) domestic debt and (2) foreign debt.

Domestic Debt consists of liabilities carried over from the past, and liabilities stemming from short-term treasury notes. The largest share in the domestic debt is the one of the frozen foreign currency savings, which also constitutes the largest individual debt in the public debt of the RoS.

Foreign Debt consists of (1) rescheduled old debt and (2) new borrowing.

The rescheduled debt consists of: (1) the debt towards International Bank for Reconstruction and Development (IBRD, A, B, C), (2) debt towards the Paris Club of Creditors, (3) debt towards the London Club of Creditors, (4) debt towards Council of Europe Development Bank (CEB).

1. Indirect Liabilities

Indirect liabilities of the RoS are those incurred on the basis of the issued guaranties. Due to the fact that the guarantees that have been issued up to date were related with loans taken from foreign creditors, total indirect liabilities fall under the category of foreign debt.

Public Debt to Gross Domestic Product Ratio

Debt to GDP ratio is one of the most important indicators of the public debt sustainability and one of the convergence criteria for joining the EMU.

Structure of Interest Rates

The ratio between the fixed and variable interest rates in the public debt of Serbia is distinctly favorable. High share of the fixed interest rates provides high level of predictability of future liabilities arising from the interest and thus the Republic of Serbia is not exposed to the interest rate risk.

The Public Debt Currency Structure

The public debt consists of different currencies. The largest share, however, is the debt denominated in Euros and US Dollars.
