CURRENT MACROECONOMIC AND FISCAL DEVELOPMENTS

1. Current macroeconomic developments

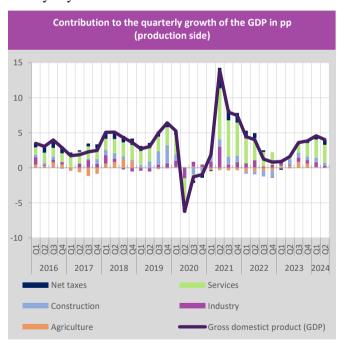

1.1. Economic activity

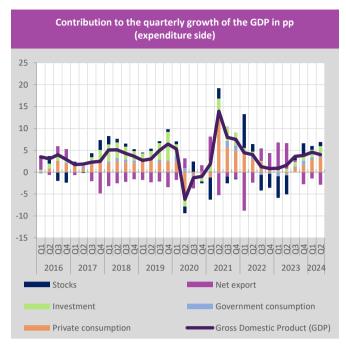

Gross domestic products. In the second quarter of 2024, gross domestic product (GDP) recorded a real year-on year growth of 4.0%, which is a decrease of 0.2 pp compared to the flash estimate.

Observed from the production side, in the second quarter, the most significant positive impact comes from service activities, namely the wholesale and retail trade and repair of motor vehicles, transportation and storage and accommodation and food services section (1.1 pp), sector of public administration and defence, compulsory social security, education and human health and social work activities (0.5 pp), sector of professional, scientific and technical activities, administrative and support service activities (0.4 pp), as well as information and communication sector (0.3 pp).

Observed by expenditure aggregates, private consumption was the dominant driver of growth in the second quarter with a contribution of 3.3 pp as well as investment with a contribution of 1.9 pp. On the other hand, net export recorded negative contribution (-2.9 pp) due to the faster growth of imports than exports.

In the second quarter of 2024, seasonally adjusted GDP increased by 0.8% in comparison with the previous quarter. In the first half of 2024, real GDP growth was 4.3% y-o-y.

Industrial production. According to the Statistical Office of the Republic of Serbia (SORS) data, industrial production in August 2024 has increased annually by 0.9%, while compared to the average industrial production in 2023 decreased by 0.8%. The largest influence on industrial production growth in August 2024 compared to August 2023 had the divisions of: manufacture of rubber and plastic products, manufacture of basic metals, manufacture of computer, electronic and optical products, mining of metal ores, manufacture of food products, manufacture of fabricated metal products, except machinery and equipment.

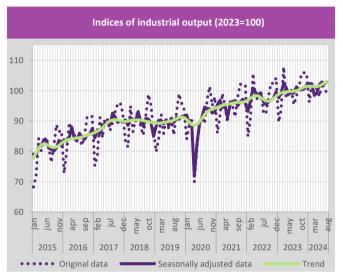

Observed by NACE Rev. 2 sections, in August 2024, annual increase was recorded in manufacturing of 5.0%, while a decrease was recorded electricity, gas, steam and air conditioning supply of 16,4% and mining and quarrying of 5.0%. Observed by NACE Rev. 2 divisions, the largest increase in production was recorded in manufacture of computer, electronic and optical products (86.7%), while mining of coal and lignite has decreased the most (19.1%).

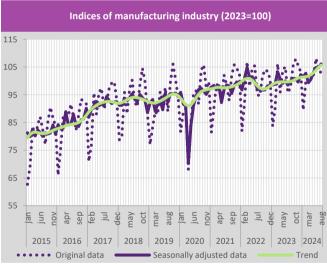

The industrial production volume in August 2024, in comparison to the same month in 2023, was recorded an increase within 13 divisions, which accounts for 57% of the total industrial production, while a decrease was recorded in 16 divisions, which accounts for 43% of the total industrial production.

Observed by Main industrial groupings (MIGs), in August 2024, compared to August 2023, an increase was recorded in the production of capital goods (18.0%), intermediate goods except energy (6.4%), non-durable consumer goods (0.5%), while a decrease was recorded in production of energy (-11.8%) and durable consumer goods (-4.6%).

In the first eight months it was recorded an increase of industrial production of 2.6% y-o-y. Observed by MIGs,

the main contribution to the increase of industrial production came from the production of intermediate goods, except energy of 11.3%, mostly as the result of the growth of manufacture of basic metals. The production of capital goods increased by 9.7%, mostly due to the growth of manufacture of computer, electronic and optical products. Manufacture of food products had the most significant positive contribution to the growth of non-durable consumer goods of 2.5%. On the other hand, the production of energy decreased by 9.6%, due to the decline in manufacture of coke and refined petroleum products. In addition, the decline of 5.9% was recorded in the production of durable consumer goods.

The seasonal adjustment of the industrial production index for August 2024, compared to July 2024, indicates that overall industrial production increased by 0.7%, and manufacturing recorded increase of 1.2%.

According to the SORS data, in August 2024 stocks decreased by 0.7% compared to August 2023. The largest growth was in the stocks of manufacture of basic pharmaceutical products and pharmaceutical preparations (43.6%), while the largest annual decrease in stocks in August was recorded in the mining of metal ores (-82.9%).

Retail trade turnover. Retail trade turnover in August 2024 increased by 8.2% in nominal terms, while in real

terms turnover registered an increase of 5.3% in comparison with August 2023. Compared to the average monthly retail trade turnover in 2023, the retail trade turnover in August 2024 increased by 10% in real terms. Compared with the previous month, retail turnover in real terms registered the same level of turnover.

Annual growth of the category food, beverages and tobacco in August was 10.5% in nominal terms, while in real terms is registered an increase of 6.4%. Category non-food products, except automotive fuel increased in nominal terms by 8.4% and increased by 5.8% in real terms. Motor fuel's turnover increased by 2.9% in nominal terms and by 2.5% in real terms.

Year-on-year increase in the retail trade turnover in August in nominal terms was observed in all the regions: Srbija – Sever by 8.9% (Region Vojvodina by 11%) and Srbija – Jug by 7.2%. Observed in real terms, an increase in the retail trade turnover was registered in all regions and the highest real increase was observed in Region Vojvodina by 8.5%.

In the period January-August of 2024 in comparison with the same period of the previous year, the retail turnover increased by 11.6% in nominal terms, while in real terms is registered an increase of 7.1%.

Tourism. Annual growth in the number of tourists' visits was registered at 2% in August 2024. In the same time, the number of overnight stays decreased by 5.2% compared to the same month of the previous year. The number of foreign tourists' visits increased by 11.6%, while the number of their overnight stays increased by 10.6%. Share of the foreign tourists' visits and their overnight stays is 56.9% and 45.2%, respectively. The number of domestic tourists' visits decreased by 8.5%. Also, the number of domestic tourists' overnight stays decreased by 15.1%, compared to the same month in 2023.

Most of the tourists in August 2024 originated from Türkiye, Germany, Romania, Russia and China including Hong Kong (39.3% of the total number of foreign tourists' visits and 36.9% of their total overnight stays). In August, city of Belgrade had the largest number of tourist arrivals (32% of the total number of arrivals). A higher number of domestic tourists compared to number of foreign tourists was recorded in spas and mountain resorts, whereas in the other places most of the tourists were foreigners with share of 73.5% in the total number of arrivals (of which, foreign tourists share in the city of Belgrade was 90.8%).

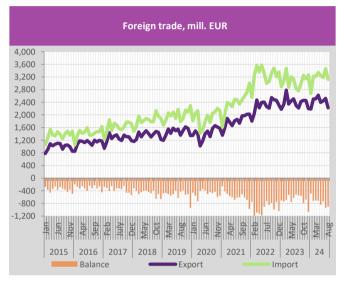

In the period January-August of 2024, the number of tourists and their overnight stays totalled 2,992,977 and 8,809,085, respectively. The number of tourists' visits increased by 7.3%, while the number of their overnight stays increased by 3.4%, compared to the same period of 2023. The number of foreign tourists' visits increased by 13.7%, while their overnight stays increased by 10.1%. In the same time, the number of domestic tourists' visits increased by 0.9%, while their overnight stays decreased by 1.8%.

1.2. External Trade and Balance of Payments

External trade. In August 2024, it was exported EUR 2,222.3 million of goods, which is higher by 0.4% compared to the August 2023. A positive contribution to export growth came from agriculture and the manufacturing industry, while on the other hand, a negative contribution was recorded in the export of mining and electricity. Import of goods amounted to EUR 3,124.4 mill., which is higher by 13.1% compared to the same month in previous year.

Foreign trade deficit amounted to EUR 902.1 million, which is higher by 64.8% compared to the same month in previous year, while 71.1% of the imports was covered by the exports.

Seasonally adjusted series shows that in August 2024 in comparison to the previous month, export decreased by 1.6%, while import increased by 2.5%.

In the period January–August of 2024, exports amounted to EUR 19,393.5 million, which is higher by 1.5%, while imports amounted to EUR 25,457.1 million, which is higher by 5.1%, compared to the same period of previous year. During the observed period, trade deficit amounted to EUR 6,063.6 million, which is higher by 18.3%, compared to the same period of previous year.

According to the SITC sections, in the eight months of the 2024, the largest share in the exports came from the export of electrical machinery and apparatus (12.1%). Significant share in the exports also came from nonferrous metals, metal ores and residues, power engines and motors, rubber products, n.e.c., which including electrical machinery amounted for 34.5% of total exports. In observed period, 25.8% of total imports came from electrical machines and apparatus, oil and oil derivatives, road vehicles, general industrial machinery and medical and pharmaceutical products.

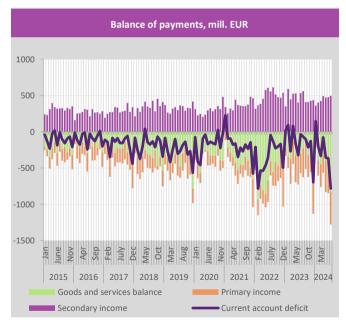

In observed period, positive trade balance (EUR 1,865.1 million) was achieved by the following sectors: crude materials, food and live animals, beverages and tobacco,

miscellaneous manufactured articles as well as animal and vegetable oils.

In the first eight months in 2024, the largest external trade partners were EU countries on which related 62.0% of total exports and 56.6% of the total imports. In observed period, 38.3% of the total exports were related to the trade with: Germany, Bosnia and Herzegovina, China, Italy and Hungary. Imports from Germany, China, Italy, Türkiye and Hungary accounted for 43.3% of the total imports. Surplus of EUR 2,731.9 million was achieved in external trade with Montenegro, Bosnia and Herzegovina, North Macedonia, Romania, Slovakia, Bulgaria, Czech Republic, Sweden and Croatia. The largest deficit was achieved in external trade with China (due to imports of telephones for network stations and laptops), Türkiye and Italy.

Balance of payments¹. In July 2024, the current account recorded a deficit of EUR 782.4 million. Compared to July of the previous year, the increase in the deficit was largely contributed by the growth of the deficit in the goods and services account and the increase in the deficit of primary income, but also the decrease in the secondary income surplus. The goods account recorded a deficit, which is higher by 107.7% compared to the same month of previous year, while the services account recorded a surplus, which amounted to EUR 3.1 million.

In July 2024, net inflow of foreign direct investments amounted to EUR 471.0 million. The total inflow based on FDI amounted to EUR 504.3 million.

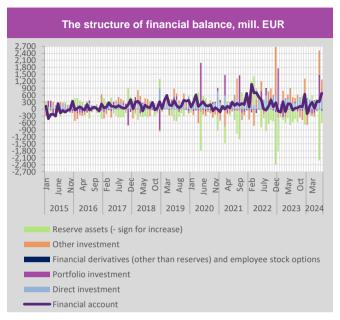

In the first seven months of 2024, the current account recorded a deficit of EUR 1,968.1 million, which is higher by EUR 1,368.1 million compared to the same period of the previous year. The growth of the current account deficit was contributed by the growth in the deficit of goods and services account, the increase in the deficit of primary income, as well as the decrease in the surplus of secondary income. The trade deficit is higher by EUR

Public Finance Bulletin, August 2024

Ministry of Finance

¹ Since April 2014, Balance of Payments of the Republic of Serbia is being presented according to the Balance of Payments Manual and international investment position, VI edition of the International Monetary Fund (BPM6).

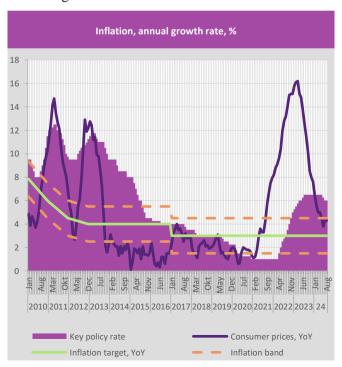

551.9 million, while surplus in the services account decreased by EUR 246.3 million and amounted to EUR 1,468.8 million. In the observed period, the primary income deficit increased by EUR 317.9 million or 15.8%, while the surplus of secondary income is lower by 7.4%, compared to the same period of previous year and amounted to EUR 3,136.3 million.

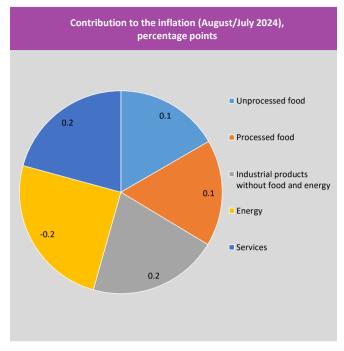

In observed period, the net inflow of foreign direct investments amounted to EUR 2,479.6 million, which represents an increase of 7.7% compared to the same period of the previous year. Also, at the same time, a net inflow of portfolio investments was recorded in the amount of EUR 378.3 million.

1.3. Inflation

In August 2024, a year-on-year increase in consumer prices of 4.3% was recorded. The largest price growth during this period was observed in the categories of restaurants and hotels, as well as alcoholic beverages. At the same time, core inflation was slightly higher, amounting to 5.2%.

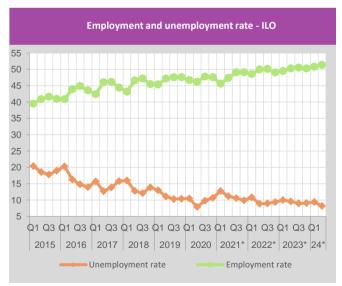

On a monthly basis, consumer prices in August 2024 increased by 0.4%. During this period, the largest growth was recorded in the categories of alcoholic beverages and recreation and culture.

1.4. Labour market

According to data from the Central Register of Mandatory Social Insurance, the average number of formally employed in August 2024 increased by 0.9% year-on-year.

According to data from the Labour Force Survey in the second quarter of 2024, there was a year-on-year increase in the employment rate by 1.1 pp to 51.4%, while the unemployment rate decreased by 1.4 pp and totalled 8.2%.

* ILO data from 2021 are provided according to the new methodology.

According to the National employment agency data at the end of August, number of unemployed persons actively seeking employment totalled 360.5 thousand, which is a decline compared to the same month of the previous year by 8.3%.

Salaries. In July 2024, the average net salary increased by 12.0%, y-o-y, in real terms. Observed by activities, the most significant real wage growth was recorded in manufacturing, trade and education.

Pensions. Average paid pension in August 2024 increased compared to the same month of previous year by 16.0%, in real terms, and amounted to RSD 45,703.

1.5. Monetary developments

In August 2024, NBS kept its key interest rate at the level of 6.00%.

Through August, banks as largest single investors in state treasury bills kept their invested funds on that unchanged. Compared to the same month in the previous year, banks increased their invested funds by RSD 82.7 billion.

At the end of August 2024, compared to same month of the previous year, bank loans to economy registered increase of 5.2%, while loans to households increased by 6.5%. At the same time, bank deposits registered growth of 14.2%. In structure of loans to economy by destination, biggest share had loans for current assets and investment loans (45.4% and 38.9%, respectively), with yearly increase of loans for current assets by 8.7% and increase of investment loans by 1.7%. At the same time at loans landed to households, biggest share had cash loans (45.5%) with yearly growth of 10.3% and housing loans (38.3%), which increased by 3.0% yearly.

In structure of bank sources of funds, dominant share had borrowed sources. At the end of August 2024, in total fund sources borrowed sources share was 87.3%, which is a decrease of 0.3% y-o-y, while in comparison to the previous month decreased by 0.2%. In currency structure of funds, foreign currency sources share was 47.6%, and compared to the same month of previous year decreased by 2.3 pp, while compared to the previous month decreased by 0.3 pp.

NBS foreign exchange reserves increased by EUR 111.7 million compared to previous month, while compared to the same month of previous year increased by EUR 4.6

billion and totalled EUR 28.2 billion at the end of August 2024. The largest inflow to FX reserves originated from NBS interventions in the local FX market, as well as from FX reserves management, grants and other sources. Level of NBS foreign exchange reserves was sufficient for coverage of 182.2% of M1 monetary aggregate and for coverage of around 7.4 months of imports of goods and services.

Household foreign currency savings at the end of August 2024 compared to previous month increased by EUR 57.4 million and totalled EUR 15.1 billion. Compared to same month of the previous year foreign currency savings increased by EUR 1.1 billion.

Developments on the foreign exchange market in August 2024 compared to previous month were characterized by no real or nominal changes. In comparison to the same month of the previous year, foreign exchange rate recorded nominal and real appreciation of 0.2% and 2.2%, respectively. In order to mitigate extensive daily oscillations of exchange rate, NBS throughout August intervened on the foreign exchange market by net buying EUR 280 million.

1.6. Financial markets

In August 2024 Belgrade stock exchange registered total turnover of securities in amount of RSD 1,836.2 million, from which turnover of shares and Republic of Serbia bonds (RS bonds) totalled RSD 212.1 million and RSD 1,624.2 million, respectively. In comparison to the same month of previous year, total turnover increased by 82.2%. Total number of transactions decreased from 1,736 in August 2023 to 1,163 in the same month of 2024.

Total market capitalization at the end of August 2024 amounted to RSD 470.6 billion and increased by 3.0% compared to previous month, while compared to same month of previous year increased by 12.5%.

In August 2024 foreign investors share in total turnover accounted for 2.35% and decreased by 8.29 pp in comparison to same month of the previous year. Share of foreign investors in turnover of shares increased by 18.75 pp and amounted to 20.23%, while the share of foreign investors turnover in RS bonds amounted to 0.02%, which represents a decrease of 12.22 pp compared to same month in the previous year.

During August 2024 on Belgrade stock exchange index BELEXline registered an increase in value of 4.5% and totalled 2,372.81 index points, while the value of BELEX15 index increased by 6.2% and totalled 1,085.42 index points. Compared to the same month of the previous year, index BELEXline increased by 30.6% and index BELEX15 increased by 22.7%.

1.7. International environment

According to the Eurostat's estimation, GDP growth in Q2 2024 in the euro area and the EU27 increased by 0.8% and 1,0%, respectively compared to the same quarter 2023, while comparing to the previous quarter, both

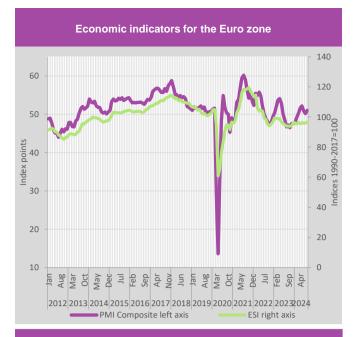

increased by 0.2%. According to the Spring EC outlook, the projected growth will amount to 0.8% in 2024, with mild growth increase to 1.4% in 2025, while the average yearly inflation will slow from 5.4% in 2023 to 2.1% in 2025. Uncertainty and risks to the projection are still pronounced and related to the further course of the conflict in Ukraine and the Middle East, the potential disruption of supply chains and energy markets, as well as climate change.

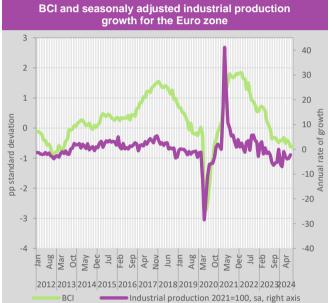

Average prices of agriculture products have increased by 3.2% in August 2024 compared to the previous month, while food prices decreased by 0.3%. Base metal prices decreased by 3.6%, compared to the previous month, while the price of iron ore decreased by 6.0%, cooper prices decreased by 4.3%. According to the World Steel Association, world production of steel decreased by 6.5% y-o-y, while in China decreased by 10.4% y-o-y (which is somewhat more than a half of World production). In the group of precious metals, the price of gold increased by 3.1%, while the price of silver decreased by 4.0%.

Value of the Composite PMI index in August amounted to 51.0 ip (up by 0.8 ip compared to previous month), due to the mild recovery of services sector output. Economic Sentiment Indicator (ESI) increased by 0.3 ip in the EU27 (96.7 ip), while in the euro area increased by 0.5 ip (96.5 ip), compared to previous month.

At the end of August 2024, the unemployment rate in the euro area and EU27 amounted to 6.4% and 5.9%, respectively. At the same time, unemployment rate in Germany and Italy was 3.5% and 6.2%, respectively. At the same time, according to the data of the Russian Statistical Office, in the Russian Federation the unemployment rate was 2.4%.

Trend of inflation during August decelerated, when inflation of 2.2% was registered in the euro area, while inflation of 2.4% was recorded in the EU27. At the same time, inflation of 2.0% and 1.2% was registered in Germany and Italy, respectively. Observed by categories the increase in the prices was recorded in services, food, alcohol and tobacco and non-energy industrial goods, while energy prices decreased. In Russia, the annual inflation reached 9.1%.

In September, ECB decided to lower the interest rate to the level of 3.65%. Also, in the second half of the year, PEPP and APP programmes will be gradually reduced and monitoring of refinancing operation of banks will be continued to assess their contribution to monetary policy stance. In September, FED lowered key interest rate to an interval of 4.75% to 5.00%.

According to the OPEC data, the price of oil type Urals has amounted to 68.17 \$/barrel in August, which is 5.5% lower compared to the previous month. Since the beginning of 2024, the price increased by 27.7%, compared to the same period in 2023, to 67.95 \$/barrel.

1 From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. 2 Including turnover generated by legal entities and entrepreneurs. 3 Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products. 4 Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. 5 Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. 6 Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. 7 GFS-1986 methodology. 8 Data on foreign currency savings since December 2012 according to new methodology of NBS. 9 SORS changed data for employment. Without registered individual agricultural workers. 40 Population aged 15 and above. 41 New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. 12 Since 2012 with professional army servicemen.

* Preliminary annual data. ** SORS calculation based on quarterly data. *** MoF estimation. ¹ The data refers to the period January–June 2024 (the same period of the previous year=100). ² From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. 3 Including turnover generated by legal entities and entrepreneurs. 4 From 2022, data on tourist traffic (number of tourist arrivals and overnight stays) and accommodation capacities are published on the basis of statistical processing of data taken from the administrative source, the Central Information System in Catering trade and Tourism (eTourist). Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price Index for industrial products. ⁶ Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. ⁷ Since April of 2014 Balance according to new methodology. ⁸ Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. ⁸ Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. ⁹ GFS-1986 methodology. ¹⁰ Data on foreign currency savings since December 2012 according to new methodology of NBS. ¹¹ SORS changed data for employment. Without registered individual agricultural workers. ¹² Data from 2010, given according to the new methodology, which has been in use since 2021, refers to the population aged 15 and over. ¹³ New methodology for salaries, SORS applied from January 2008, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ¹⁴ Since 2012 with professional army servicemen. ¹⁵ Data was calculated on the basis of demographic estimates for 2022, according to 2022 Population Census, and are not comparable with previous data. Data for 2024 refers to the period January—June. ¹⁶ Data refers to period January—July.

¹ New methodology for salaries, which is applied from 2009 as SORS extended coverage of observation units. In calculation of average salaries, beside salaries paid to employees in enterprises, institutions and organizations, into account are taken also salaries paid to entrepreneurs, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ² Every year in Health and social work section half of salary is paid in December and another half in January. ³ Since 2012 with professional army servicemen.

JSC EPS - Acceleration Program for Renewable Energies in Serbia (APRES), phase 1

TOTAL COMERCIAL BANK LOANS

^{*} Adjusted contracted amounts include changes that occurred during the implementation of financed projects, determined by the final calculation at the handover of the performed works, due to deficiencies in relation to the contracted quantities of works and realized savings, etc. Also, deviations may occur by automatic cancellation of unused funds when the loan availability period expires or at the request of the borrower. The adjusted contractual amounts represent the principal to be repaid.

^{**}For the purpose of protection against foreign exchange and interest rate risk, a hedging transaction (interest rate and currency swap) was realized, by which the liabilities of the Republic of Serbia on the basis of a ten-year bond issued in the amount of USD 1.2 billion at a coupon rate of 2.125% were converted and presented in euros, at a significantly lower interest rate of 1.066%.

^{***} Hedging transaction (interest rate and currency swap) was realized _ original loan currency is shown in EUR

METHODOLOGICAL EXPLANATIONS

ECONOMIC, FISCAL AND PUBLIC DEBT STATISTICS

1. Economic statistics (tables in Chapter I, Macroeconomic Developments) are based primarily on the statistical methodology and data provided by the Statistics Office of the Republic of Serbia, National Bank of Serbia, National Employment Agency, Privatization Agency, Belgrade Stock Exchange, Pension and Disability Insurance Fund of the Republic of Serbia etc.

Economic Statistics contained in the Chapter I includes: main indicators of macroeconomic developments in the annual and monthly dynamics for the current year; gross domestic product (GDP) in constant prices and its growth rates by quarters and usage of GDP; trends in physical volume of industrial production in monthly dynamics (total, by sections and economic purpose); consumer prices trends in annual and monthly dynamics; developments of overall consumer prices (in total and by components) in monthly dynamics for current year; producer prices of industrial products for domestic market and for export in annual and monthly dynamics; developments of exports in monthly dynamics; prices of external trade in annual, quarterly and monthly dynamics; developments in Foreign direct investments in quarterly dynamics; external debt in annual dynamics and in last month of current year; balance of payments in annual and monthly dynamics; monetary survey by years; main monetary indicators, household savings and foreign exchange reserves, total number of employed and unemployed and average net salaries and pension benefits (in dinars and annual real growth rates) in annual and monthly dynamics; an overview of privatization results in annual dynamics and for a specific period of the current year for which there are available data; an overview of trends of indices; capitalization and foreign investors participation in total turnover on Belgrade Stock Exchange; an overview of turnover of securities on the Belgrade Stock Exchange; an overview of auctions of Republic of Serbia treasury bills in annual dynamics and on daily basis.

2. Fiscal statistics (tables in Chapter II Fiscal Developments) is based on the GFS methodology and data of the Ministry of Finance, Treasury Administration and Public Debt Administration.

Starting from Memorandum on the Budget and Economic and Fiscal Policy for 2009 with projections for 2010 and 2011, IMF methodology – Government Finance Statistics is used to present and create projections for fiscal aggregates. All data in this bulletin have been computed by using the same methodology basis.

The main objectives of alignment with methodology of Government Finance Statistics is the possibility to perceive macroeconomic implications of fiscal policy. It is particularly important to perceive the influence of fiscal policy on domestic demand, hence every item of revenues and expenditures is considered from its aspect, regardless of its classification in accounting.

Here is a comparative overview of the previous and the new methodology of government finance statistics.

- 1. The level of observation is consolidated government sector that comprises the following levels of government: the central government budget of the Republic of Serbia and Social Security Organizations; local government budget of the Autonomous Province of Vojvodina and budgets of municipalities and towns; public road company Putevi Srbije and Koridori Srbije Ltd.
- 2. Coverage of data: beside budget resources, application of this methodology in computation of fiscal aggregates includes other sources of financing a part of own resources of government bodies, donations, loans and privatization receipts. The previous coverage included only budget resources and expenditure financed from budget resources.
- 3. The method of computation of results: The deficit or surplus of consolidated government sector is the difference between revenues and overall expense plus net budget borrowing. The category of net landing is treated as an expense in cases when the purpose of the spending is implementation of a government policy, while if expense is made in order to manage liquidity, it becomes a financing item, without any influence on the government's result.
- 4. The difference in accounting and statistical coverage of particular items of expenditure: in view of the primary objective gaining insight into macroeconomic implications of the fiscal policy, particular items of the expenditure, e.g. repayment of debt to pensioners, which is treated in accounting as a part of repayment of debt without influence on the result, statistically is treated as transfer to citizens and on ground influences increase in domestic demand. Mobile telephony license, treated in accounting as current non-tax revenue, in view of its one-time character is now treated as part of financing.

With advancement of accounting base – i.e. with transition to accrual basis in recording government transactions – conditions will be created for further enhancement of government finance statistics methodology and for alignment with the EU (ESA 95).

The Ministry of Finance is responsible for collection and processing of fiscal data. Fiscal statistics includes: consolidated balance of the general government sector and particular balances, i.e. budget of the Republic of Serbia (central government), budget of AP Vojvodina, budget of local authorities, financial plans of social security organizations and off-budget users. Public road companany Putevi Srbije and Koridori Srbije Ltd. have been involved in reports since their foundation, and as of 2024, other extrabudgetary units such public agencies and institutes have been included, whose list is publicly available on the website of the Treasury Administration.

General government. General government sector comprises all the levels of government in the country. Subsectors that form general government include: central government – budget of the Republic of Serbia, provincial government - AP Vojvodina, local government – municipalities, towns, social security funds, public road company Putevi Srbije and Koridori Srbije Ltd. Fiscal statistics, with regard to the individual state subsectors, is especially significant for the understanding of interrelation between different governmental levels, separation of functions as well as division of revenues. It is important to determine the amounts and the flow of transfers between governmental levels, which is achievable only owing to the individual and separate balances of all governmental levels. However, only the data presenting the entire general government may provide the information concerning the amount of fiscal operations of the state, consumption of the state and its aggregate demand influence macroeconomic stability, reallocation of collected funds originating from other economic sectors, burden of taxation of the economy, tax structure etc.

Central government – budget of the RoS. Central government comprises all the ministries, agencies, and other special organizations defined as direct or indirect republic budget beneficiaries.² The Government may define and achieve set goals concerning economic policy at the level of the entire country, primarily through the implementation of certain measures and programmes by the means of the budget of central government. Other governmental levels do not economic policies concerning the national level. The more centralized is the country, the more significant are the data related to this level of government³.

AP – **Vojvodina**. Budget of AP Vojvodina comprises all governmental authorities and other special organizations defined as AP Vojvodina budget beneficiaries.

Local self-government. Data concerning local self-government relate to the data collected in all cities and municipalities constituting the local self-government system. The coverage of data at the level of cities or municipalities relate to all direct or indirect budget beneficiaries of a city or a municipality. The budget beneficiary of a city or a municipality is an institution primarily financed from the funds originating from the local government. Local government controls its business activities and it performs certain functions through the institution⁴.

Social security organizations. Social security organizations include the Pension and Disability Insurance Fund, Republic Health Insurance Fund, Military Health Fund and National Employment Service.

Other extrabudgetary units. Other extrabudgetary units refer to institutions and other legal entities that are formally not part of any level of government, but are subjected to significant state involvement in management, control and financing.

Public road company Putevi Srbije. Revenues of Putevi Srbije have the character of public revenues (toll and transfers from republican budget), and repayment of a large part of the company's debt takes place from the Republic of Serbia budget, therefore the company is treated as a part of the general government sector.

Koridori Srbije LTD. are a Government owned company, responsible for investment in road infrastructure.

BASIC FISCAL AGGREGATES

Basic fiscal aggregates are total public revenues, total public expenditures, and the result of the difference between these two categories, which is defined as surplus or deficit in the consolidated balance of general government or balances of individual governmental levels.

93 Public Finance Bulletin, August 2024

² Indirect republic budget beneficiaries are primary and secondary schools, faculties, scientific institutes, social welfare institutions, cultural institutions and other institutions partly financed from the Republic budget.

³ The largest amount of tax revenues, apart from property taxes, pertains to the budget of the RS. Income tax is renounced in the legally defined percentage to the local self-government, whereas a part of the revenues collected from income taxes realised in the territory of Vojvodina pertains to the AP Vojvodina. This shows the importance of the central governmental level in the country.

⁴ Primary and secondary schools pertain to the central government as their financing is mostly provided from that level. A part of material expenses of schools is financed from local self-government funds but not in the extent sufficient for pertaining of these institutions to the local government. Pre-school institutions are local budget beneficiaries. When reviwing data regarding their revenues and expenditures, they are included in the local government level.

Total public revenues are divided into two basic categories: current revenues and yield on capital.

Current revenues are divided into tax and non-tax revenues.

The basic characteristics of **tax revenues** is their mandatory nature and non- existence of any direct reciprocal service for the payment of taxes. The state collects taxes finances certain state functions from collected funds. The benefits related to certain functions cannot be directly connected to an individual who paid the tax.

Income tax comprises wage tax, as well as taxes on other forms of earnings of individuals, beside the wages.

Corporate income tax comprises, in addition to corporate profit tax narrow meaning of the term, also tax on dividends paid to the residents and non-residents, as well as the tax on interests, royalties and capital incomes realized by non-residents.

VAT comprises national VAT, import VAT, and the arrears of turnover taxes from the previous years.

Excise duties present consumption taxes concerning specific products such as oil, tobacco, coffee, alcoholic beverages etc.

Customs duties and other import duties comprise revenues from duties paid for import of goods and services, with the exception of the VAT on imported goods that is included in VAT revenues.

Other tax revenues comprise taxes on use, ownership and carrying of goods, and other taxes. The property tax of local government is included in the category of other tax revenues in the general government consolidated balance.

Non-tax revenues are heterogenic category of revenues including property revenues (collected interest, rental fees) compensations, taxes, fines and other revenues that cannot be classified. As opposed to tax revenues, non-tax revenues imply the existence of reciprocal favour for the sum collected - e.g. the compensation for the usage of natural resources. However, there are revenues that may by their characteristics be classified as non-tax revenues, but without implying the reciprocal favour for the collection. Fines are a typical example of this sort of revenue.

Capital revenues comprise only revenues originating from the sale of capital goods, as well as the capital

transfers from non-governmental institutions. The sale of capital goods imply the sale of non-financial assets, buildings, inventories and state-owned land.

Total expenditures in the Bulletin of Public Finance are presented according to the economic classification emphasizing the type of expenses, i.e. its economic characteristics and influence of state consumption on the market of goods and services, financial market and reallocation of income. In addition to the economic classification of expenditure, there is also a functional classification emphasizing the function the state performs by using of funds for specific purposes⁵. The Bulletin of Public Finance does not contain expenditures classified in accordance with the functional classification.

Overall expenditure is divided into current expenses, capital expenses and net budget borrowing.

Current expenses present final budget outflows, and are not intended for the procurement of non-financial assets.

Compensation of employees comprise (net) salaries of employees including income tax and contributions paid by employees, contributions paid by employers, as well as other fringe benefits (transport allowance, sick leave allowance for the period up to 30 days etc.).

Procurement of goods and services comprise payments related with coverage of business expenses (electricity, phone bills etc.), business trips, services contracts, current maintenance and procurement of material.

Repayment of interests is divided into repayment of interests on domestic debt, interests on external debt, interests based on activated guarantees and accompanying borrowing expenses.

Subsidies comprise all the funds transferred to the economic sector (public enterprises, registered agricultural holdings etc.) for the coverage of running expenses or/and the grant intended for current business activities.

Social insurance and social welfare expenses include payments to person insured with social security organizations (pensions of beneficiaries of Pension and Disability Insurance Fund, sick leave benefits paid by the Republic Health Insurance Fund, unemployment benefits paid by the National Employment Service, Repayment of debt to pensioners, children and family benefits, benefits for war-disabled persons, pregnancy leave benefits,

⁵ Division of expenditures according to the functional classification is the following: general public services, defence, internal security, economic affairs, environmental protection, housing construction and municipal services, healthcare, recreation, culture and religion, education and social welfare.

housing benefits, Military Health Fund expenditures etc.

Other current expenses include grants to non-governmental organizations, mandatory levies and penalties imposed by one governmental level to another, fines and penalties imposed by courts and judicial bodies, injury compensations or compensations for damages incurred by natural disasters, and damages incurred by the public bodies.

Capital expenses comprise all the payments intended for the procurement of non-financial assets, construction of buildings and infrastructure, procurement of equipment and inventories and the purchase of land.

Net lending are expenses for purchase of financial assets whose objective is implementation of a particular government policy.

General government consolidated balance contains consolidated revenues and consolidated expenditure.

Consolidated revenues are aggregate revenues of individual governmental levels, but in the consolidation procedure, transfers received from other governmental levels are excluded. In the consolidation procedure, benefits paid by general government in the function of employer are excluded from the revenues of mandatory social insurance organizations.

Consolidated expenses present aggregate expenditures of individual governmental levels, while in the consolidation procedure, transfers provided from one governmental level to another are excluded. In the consolidation procedure, expenditures paid by general government in the function of employer are excluded from the expenditures.

Consolidated surplus / deficit is a difference between consolidated revenues and consolidated expenditure.

Balance surplus/ deficit of individual governmental levels is a difference between total revenues and total expenditures, at a particular governmental level.

Earnings not included in the revenues of general government present earnings based on domestic and external borrowing and earnings based on the privatization of state-owned enterprises.

Expenses that are not included in general government expenses are those for repayment of principal of national and foreign debt and expenses for purchase of financial assets that cannot be classified as net lending.

3. Public Debt Statistics (Tables in Chapter III – Public Debt) is based on the data of the Republic of Serbia Treasury Administration. The public debt of the Republic of Serbia consists of direct liabilities (received loans) and indirect liabilities (issued guarantees).

1. Direct Liabilities

Direct Liabilities of the RoS are those incurred on the basis of the loans taken. Direct liabilities, depending on the creditor, constitute the following: (1) domestic debt and (2) foreign debt.

Domestic Debt consists of liabilities carried over from the past, and liabilities stemming from short-term treasury notes. The largest share in the domestic debt is the one of the frozen foreign currency savings, which also constitutes the largest individual debt in the public debt of the RoS.

Foreign Debt consists of (1) rescheduled old debt and (2) new borrowing.

The rescheduled debt consists of: (1) the debt towards International Bank for Reconstruction and Development (IBRD, A, B, C), (2) debt towards the Paris Club of Creditors, (3) debt towards the London Club of Creditors, (4) debt towards Council of Europe Development Bank (CEB).

2. Indirect Liabilities

Indirect liabilities of the RoS are those incurred on the basis of the issued guaranties. Due to the fact that the guarantees that have been issued up to date were related with loans taken from foreign creditors, total indirect liabilities fall under the category of foreign debt.

Public Debt to Gross Domestic Product Ratio

Debt to GDP ratio is one of the most important indicators of the public debt sustainability and one of the convergence criteria for joining the EMU.

Structure of Interest Rates

The ratio between the fixed and variable interest rates in the public debt of Serbia is distinctly favourable. High share of the fixed interest rates provides high level of predictability of future liabilities arising from the interest and thus the Republic of Serbia is not exposed to the interest rate risk.

The Public Debt Currency Structure

The public debt consists of different currencies. The largest share, however, is the debt denominated in Euros and US Dollars.
