CURRENT MACROECONOMIC AND FISCAL DEVELOPMENTS

1. Current macroeconomic developments

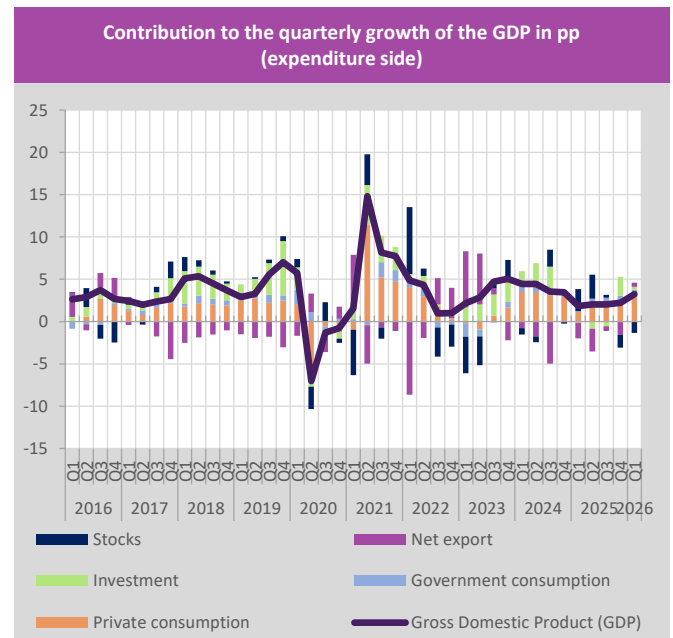

1.1. Economic activity

Gross domestic products. In the first quarter of 2026, gross domestic product (GDP) recorded a real year-on-year growth of 3.2%, which is 0.2 percentage points higher compared to the flash estimate.

Observed from the production side, in the first quarter, the most significant positive contribution originated from service activities, namely the sector of wholesale and retail trade, transportation and storage, and accommodation and food service activities (0.7 p.p.), the sector of professional, scientific, technical, administrative and other support service activities, and the sector of public administration, defence, education and activities within health and social protection, with a positive contribution of 0.5 p.p. each. A positive contribution originated from net taxes (0.7 p.p.), while agricultural production gave a slight positive contribution of 0.2 p.p. On the other hand, a negative contribution originated from construction (-0.2 p.p.) and industrial production (-0.1 p.p.).

Observed by expenditure aggregates, private consumption was the dominant driver of growth in the first quarter, contributing 2.9 p.p., followed by government consumption with a contribution of 0.9 p.p. and net exports with a contribution of 0.5 p.p. Investments recorded a slight positive contribution of 0.3 p.p.

In the first quarter of 2026, seasonally adjusted GDP increased by 0.2% in comparison with the previous quarter.

Industrial production. According to the Statistical Office of the Republic of Serbia (SORS) data, industrial production in April 2026 has increased annually by 3.4%, while compared to the average industrial production in 2025 increased by 1.7%. The largest influence on industrial production growth in April 2026 compared to April 2025 had the divisions of: manufacture of motor vehicles, trailers and semi-trailers, manufacture of coke and refined petroleum products, manufacture of basic pharmaceutical products and pharmaceutical preparations, manufacture of chemicals and chemical products, as well as manufacture of beverages.

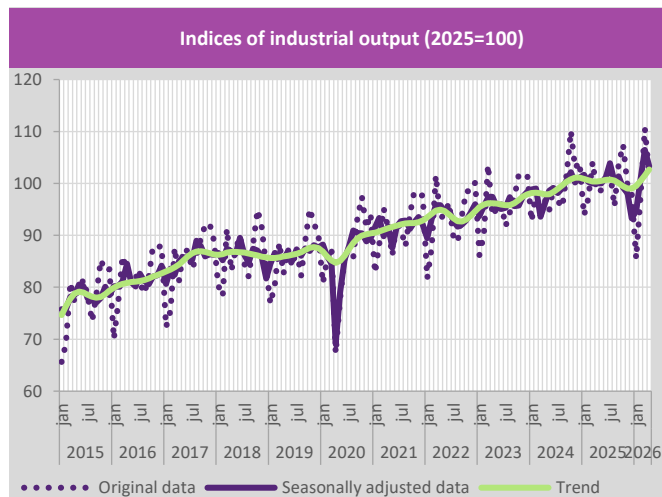

Observed by NACE Rev. 2 sections, in April 2026, annual growth was recorded in manufacturing industry (5.3%) and mining (4.8%), while in electricity, gas and steam supply a decline of 7.7% was recorded. Observed by NACE Rev. 2 divisions, the largest increase in production was recorded in manufacture of motor vehicles, trailers and semi-trailers (52.2%), while manufacture of other transport equipment has decreased the most (-75.0%).

The industrial production volume in April 2026, in comparison to the same month in 2025, was recorded an increase within 16 divisions, which accounts for 49% of the total industrial production, while a decrease was recorded in 13 divisions, which accounts for 51% of the total industrial production.

Observed by (Main industrial groupings) MIGs in April 2026, compared to April 2025, a growth occurred in production of capital goods (11.8%), energy production (3.8%), intermediate goods, except energy (2.9%), non-durable consumer goods (1.2%), while a decrease was recorded in the durable consumer goods (-19.7%).

In the first fourth months, a year-on-year growth in industrial production of 0.2% was recorded. Observed by purpose, the growth was contributed to the most by the

growth in the production of capital goods of 12.9%, as a result of the growth in the production of motor vehicles and trailers. The production of intermediate goods recorded growth of 1.3%, largely due to the growth in the production of rubber and plastic products. On the other hand, energy production recorded a decline of 4.7%, due to a decline in the production of coke and refined petroleum products. The production of durable consumer goods recorded a decline of 13.8%, as a result of a decline in the production of computers, electronic and optical products. In addition, the production of non-durable goods recorded a decline of 0.6%, due to a decline in the production of wearing apparel.

The seasonal adjustment of the industrial production index for April 2026, compared to March 2026, indicates that overall industrial production decreased by 3.2%, while the manufacturing recorded decrease of 3.7%.

According to the SORS data, in April 2026 stocks increased by 13.7% compared to April 2025. The largest growth was in mining of metal ores (242.1%), while the largest annual decrease in stocks in April was recorded in manufacture of computer, electronic and optical products (-55.8%).

Retail trade turnover. Retail trade turnover in April 2026 increased by 8.3% in nominal terms, while in real terms turnover it recorded an increase of 5.6% in comparison with April 2025. Compared to the average monthly retail trade turnover in 2025, the retail trade turnover in April 2026 increased by 6.0% in real terms.

Compared with the previous month, retail turnover in real terms registered a decrease of 1.8%.

Annual growth of the category food, beverages and tobacco in April was 5.8% in nominal terms, while in real terms it registered an increase of 5.6%. Category non-food products, except automotive fuel increased in nominal terms by 6.9% and increased by 4.4% in real terms. Motor fuel's turnover increased by 18.6% in nominal terms and increased by 8.7% in real terms.

Year-on-year increase in the retail trade turnover in April in nominal terms was observed in all the regions: Srbija – Sever by 8.7% (Region Vojvodina by 8.4%) and Srbija – Jug by 7.8%. Observed in real terms, an increase in Region Vojvodina (an increase of 5.8%), Region Srbija- Sever (5.8%) and Region Srbija - jug by 5.4%.

In the first four months of 2026 in comparison with the same period of the previous year, the retail turnover increased by 9.0% in nominal terms, whereas in real terms is registered an increase of 7.9%.

Tourism. Annual increase in the number of tourists' visits was registered at 8.6% in April 2026. In the same time, the number of overnight stays increased by 3.8% compared to the same month of the previous year. The number of foreign tourists' visits increased by 2.0%, while the number of their overnight stays decreased by 0.2%. Share of the foreign tourists' visits amounted to 48.9% and their overnight stays by 50.0%. The number of domestic tourists' visits increased by 15.7%. Also, the number of domestic tourists' overnight increased by 8.2% compared to the same month in 2025.

Most of the tourists in April 2026 originated from Russia, Bosnia and Herzegovina, Turkey, Bulgaria and N. Macedonia (37.9% of the total number of foreign tourists' visits and 37.9% of their total overnight stays). City of Belgrade had the largest number of tourist arrivals (32.6% of the total number of arrivals). A higher number of domestic tourists compared to number of foreign tourists was recorded in spas and mountain resorts, whereas in the other places most of the tourists were foreigners with share of 68.1% in the total number of arrivals (of which, foreign tourists share in the city of Belgrade was 85.0%).

In the first four months of 2026, the number of tourists and their overnight stays totalled 1,244,729 and 3,634,456, respectively. The number of tourists' visits increased by 8.0%, while the number of their overnight stays increased by 5.8%, compared to the same period of 2025. The number of foreign tourists' visits increased by 5.7%, while their overnight stays increased by 4.8%. In the same time, the number of domestic tourists' visits increased by 10.4%, while their overnight stays increased by 6.8%.

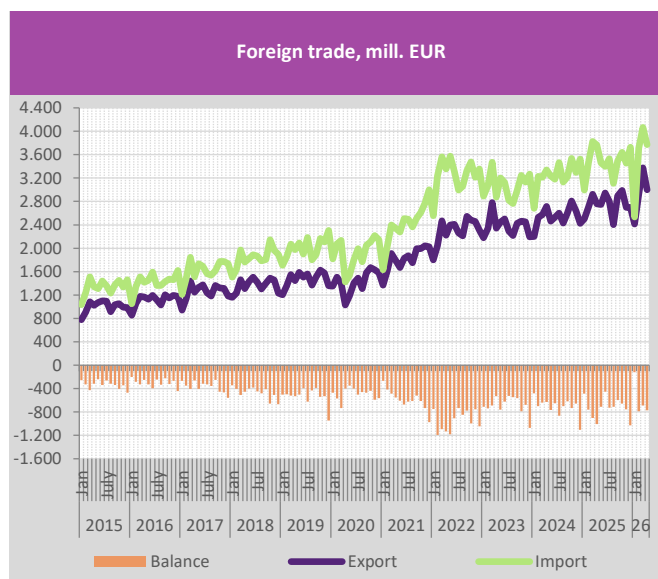

1.2. External Trade and Balance of Payments

External trade. In April 2026, it was exported EUR 2,999.1 million of goods, which is higher by 8.7% compared to the April 2025. This growth is primarily the result of higher exports of the manufacturing industry, which recorded growth of 10.0%, that is, by 244.4 million

euros. Import of goods amounted to EUR 3,772.0 mill., which is higher by 0.2% compared to the same month in previous year.

Foreign trade deficit amounted to EUR 772.9 million, which is lower by 23.0% compared to the same month in previous year, while 79.5% of the imports was covered by the exports.

Seasonally adjusted series shows that in April 2026 in comparison to the previous month, export decreased by 5.2%, while imports recorded a decline of 1.2%.

In the period January–April of 2026, exports amounted to EUR 11,784.6 million, which is higher by 8.2%, while imports amounted to EUR 14,112.8 million, which is higher by 0.5%, compared to the same period of previous year. During the observed period, trade deficit amounted to EUR 2,328.2 million, which is lower by 26.1%, compared to the same period of previous year.

According to the SITC sections, in period January-April 2026, the largest share in the exports came from the export of electrical machinery and apparatus (10.5%). Significant share in the exports also came from road vehicles, metal ores and residues, non-ferrous metals, rubber products, which including electrical machinery and apparatus amounted for 40.3% of total exports. In observed period, 27.1% of total imports came from electrical machines and apparatus, oil and oil derivatives, road vehicles, medical and pharmaceutical products, as well as non-ferrous metals.

In observed period, positive trade balance (EUR 1,656.9 million) was achieved by the following sectors: crude materials, machinery and transport equipment, manufactured goods classified chiefly by material, beverages and tobacco, miscellaneous manufactured articles, food and live animals as well as animal and vegetable oils.

In the first four months in 2026, the largest external trade partners were EU countries on which related 63.1% of total exports and 55.5% of the total imports. In

observed period, 40.5% of the total exports were related to the trade with: Germany, Italy, China, Bosnia and Herzegovina and Hungary. Imports from China, Germany, Italy, Türkiye and Hungary accounted for 43.4% of the total imports. Surplus of EUR 1,733.0 million was achieved in external trade with Montenegro, Bosnia and Herzegovina, North Macedonia, Czech Republic, Germany, Slovakia, Bulgaria, Italy, Sweden, United Kingdom, Ukraine, Croatia, Greece, Moldova and Spain. The largest deficit was achieved in external trade with China, Türkiye and Russian Federation.

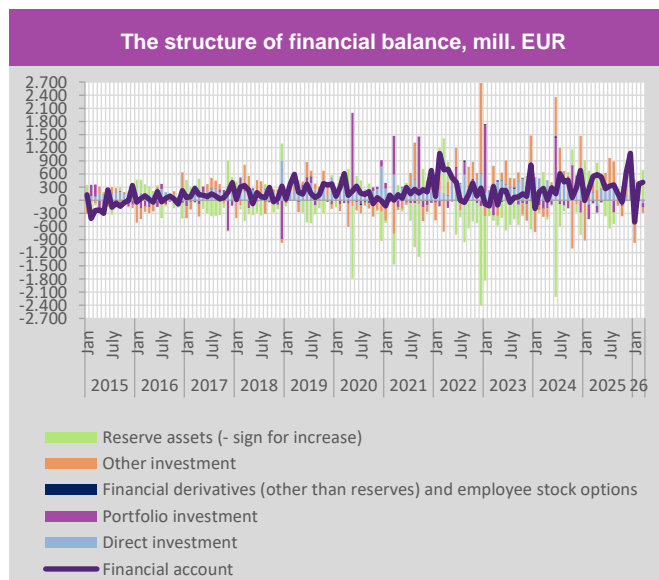

Balance of payments¹. In March 2026, the current account recorded a deficit of EUR 353.0 million, which is lower to EUR 160.8 million, compared to the same month of previous year. The lower current account deficit is a consequence of the lower deficit on the goods and services account, as well as the higher surplus on the secondary income account. The goods account recorded a deficit, which is lower by 20.9% compared to the same month of previous year, while the services account recorded a surplus, which amounted to EUR 206.3 million.

In March 2026, net outflow of foreign direct investments amounted to EUR 64.8 million.

During the first three months of 2026, a deficit in the amount of EUR 179.3 million was recorded on the current account, which is lower by EUR 471.9 million than in the same period of the previous year. The trade deficit is lower by EUR 307.2 million, while surplus in the services account increased by EUR 113.1 million and amounted to EUR 778.2 million. In the observed period, the primary income deficit increased by EUR 101.3 million or 11.7%, while the surplus of secondary income is higher by 13.4%, compared to the same period of previous year and amounted to EUR 1,297.1 million.

¹ Since April 2014, Balance of Payments of the Republic of Serbia is being presented according to the Balance of Payments Manual and international investment position, VI edition of the International Monetary Fund (BPM6).

In observed period, the net inflow of foreign direct investments amounted to EUR 192.4 million, which represents an decrease of 39.5% compared to the same period of the previous year. Also, at the same time, a net outflow of portfolio investments was recorded in the amount of EUR 76.3 million.

1.3. Inflation

Year-on-year inflation accelerated to 3.3% in April 2026, while core inflation stood at 4.4%, with its movement still being largely determined by the relatively high growth in service prices. The acceleration of inflation was primarily a consequence of the increase in global oil prices and the resulting rise in petroleum product prices on the domestic market. As for food and non-alcoholic beverage prices, they decreased by 1.1% year-on-year in April. The year-on-year increase in prices in April was driven primarily by the increase in the prices of electricity, petroleum products, utility services, tobacco, and fruit.

On a monthly basis, consumer prices increased by 0.8% in April 2026. During this period, the largest price increase was recorded in the unprocessed food category.

By division, the largest increases were recorded in clothing and footwear, and transport.

1.4. Labour market

According to data from the Central Registry of Compulsory Social Insurance, the number of formally employed persons in April 2026 decreased by 0.4% year-on-year. At the same time, employment in the public sector remained unchanged, while employment in the private sector declined by 0.5%. The decrease in employment was primarily driven by a decline in manufacturing and trade.

According to the results of the Labour Force Survey, the unemployment rate in the first quarter of 2026 stood at 8.9%, which was 0.2 percentage points lower than in the same period of the previous year, while the employment rate decreased by 0.7 percentage points, to 50.7%. The activity rate declined by 0.9 percentage points year-on-year and amounted to 55.7%, while the share of the population outside the labour force increased by 0.9 percentage points, to 44.3%, indicating somewhat lower labour market participation in the first quarter. Among young people, the unemployment rate decreased by 1.0 percentage point and stood at 23.1%. At the same time, the informal employment rate amounted to 11.3% and was 0.2 percentage points lower year-on-year, while the long-term unemployment rate decreased by 0.4 percentage points and stood at 3.3%.

According to data from the National Employment Service (NES), at the end of April the number of unemployed persons actively seeking employment amounted to 342.5 thousand, which was 3.9% lower than in the same month of the previous year.

Wages. In March 2026, the average net wage recorded a nominal year-on-year increase of 12.6%, while real wage growth amounted to 9.5%. The average net wage in March stood at RSD 121,650 (EUR 1,036). Real wage growth in the public sector amounted to 9.8%, while in the private sector it stood at 9.5%. By activity, the largest contribution to wage growth in the private sector came from manufacturing and trade. Within manufacturing, the most significant contribution to wage growth was recorded in the production of food products, fabricated metal products, motor vehicles, and wearing apparel. A positive contribution to wage dynamics came from the effects of the wage tax relief policy implemented in the previous period, which was accompanied by an increase in the minimum hourly wage rate from RSD 337.0 to RSD 371.0 as of January 2026.

Pensions. The average pension paid in April 2026 increased in real terms by 8.6% compared with the same month of the previous year and amounted to RSD 56,848.

1.5. Monetary developments

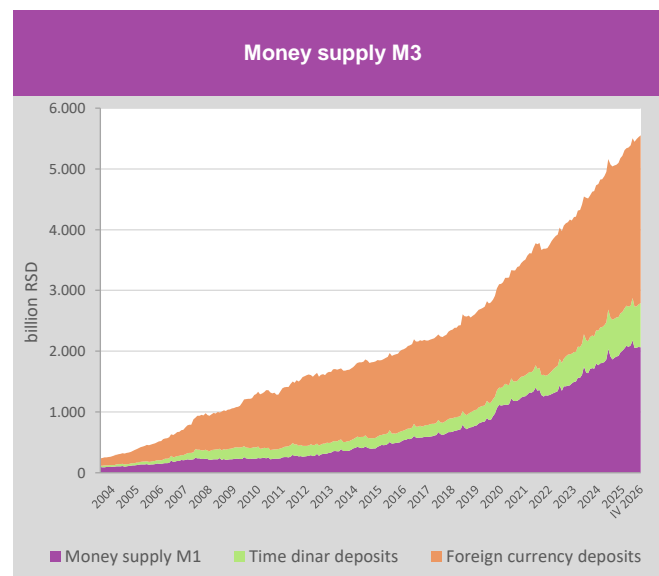

In April 2026, NBS kept its key interest rate to the level of 5.75%.

Through April, banks as largest single investors in state treasury bills kept unchanged their invested funds on that basis. Compared to the same month in the previous year, banks decreased their invested funds by RSD 107.7 billion.

At the end of April 2026, compared to same month of the previous year, bank loans to economy registered increase of 12.8%, while loans to households increased by 21.1%. At the same time, bank deposits registered growth of 9.5%. In structure of loans to economy by destination, biggest share had loans for current assets and investment loans (44.7% and 41.7%, respectively), with yearly

increase of loans for current assets by 11.2% and increase of investment loans by 15.4%. At the same time at loans landed to households, biggest share had cash loans (47.6%) with yearly growth of 24.0% and housing loans (37.9%), which increased by 20.6% yearly.

In structure of bank sources of funds, dominant share had borrowed sources. At the end of April 2026, in total fund sources borrowed sources share was 89.2%, which is an increase of 0.4 pp y-o-y, while in comparison to the previous month decreased by 0.3 pp. In currency structure of funds, foreign currency sources share was 47.4%, and compared to the same month of previous year increased by 0.6 pp, while compared to the previous month remained unchanged.

NBS foreign exchange reserves decreased by EUR 329.5 million compared to previous month, while compared to the same month of previous year increased by EUR 450.9 million and totalled EUR 28.2 billion at the end of April 2026. Main outflows from FX reserves were driven by the net credit repayment and payment of other government FX liabilities and NBS interventions in the domestic IFEM. Level of NBS foreign exchange reserves was sufficient for coverage of 159.7% of M1 monetary aggregate and for coverage of around 6.5 months of imports of goods and services.

Household foreign currency savings at the end of March 2026 compared to previous month increased by EUR 64.8 million and totalled EUR 16.5 billion. Compared to same month of the previous year foreign currency savings increased by EUR 905.8 million.

Developments on the foreign exchange market in April 2026 compared to previous month were characterized by real depreciation of 0.2% of dinar against Euro, while in nominal terms no change was recorded. In comparison to the same month of the previous year, foreign exchange rate recorded nominal depreciation of 0.2% and a real appreciation of 0.1%. In order to mitigate extensive daily oscillations of exchange rate, NBS throughout April intervened on the foreign exchange market by net buying EUR 15 million.

1.6. Financial markets

In April 2026 Belgrade stock exchange registered total turnover of securities in amount of RSD 1,397.7 million, from which turnover of shares and Republic of Serbia bonds (RS bonds) totalled RSD 114.9 million and RSD 1,282.9 million, respectively. In comparison to the same month of previous year, total turnover decreased by 46.0%. Total number of transactions decreased from 1,320 in April 2025 to 880 in the same month of 2026.

Total market capitalization at the end of April 2026 amounted to RSD 492.8 billion and increased by 0.2% compared to previous month, while compared to same month of previous year increased by 2.9%.

In April 2026 foreign investors share in total turnover accounted for 0.33% and decreased by 6.26 pp in comparison to same month of the previous year. Share of foreign investors in turnover of shares decreased by 37.46 pp and amounted to 1.84%, while the share of foreign investors turnover in RS bonds amounted to 0.19%, which represents a decrease of 0.68 pp compared to same month in the previous year.

During April 2026 on Belgrade stock exchange index BELEXline registered 0.4% increase in value and totalled 2,772.51 index points, while the value of BELEX15 index increased by 0.1% and totalled 1,228.38 index points. Compared to the same month of the previous year, index BELEXline increased by 8.4% and index BELEX15 increased by 7.5%.

1.7. International environment

According to the Eurostat's estimation, GDP growth in Q1 2026 in the euro area and the EU27 increased by 0.3% and 0.6%, respectively compared to the same quarter previous year, while comparing to the previous quarter, decreased by 0.2% and 0.1%, respectively. According to the Spring EC outlook, the projected growth will amount to 0.9% in 2026, with mild growth increase to 1.2% in 2027, while the average yearly inflation will slow from 3.0% to 2.3% in the same period. Uncertainty and risks to the projection are still pronounced and related to the further course of the conflict in Ukraine and especially in the Middle East, further oil and gas prices, intensified trade tensions, the potential disruption of supply chains, as well as climate change.

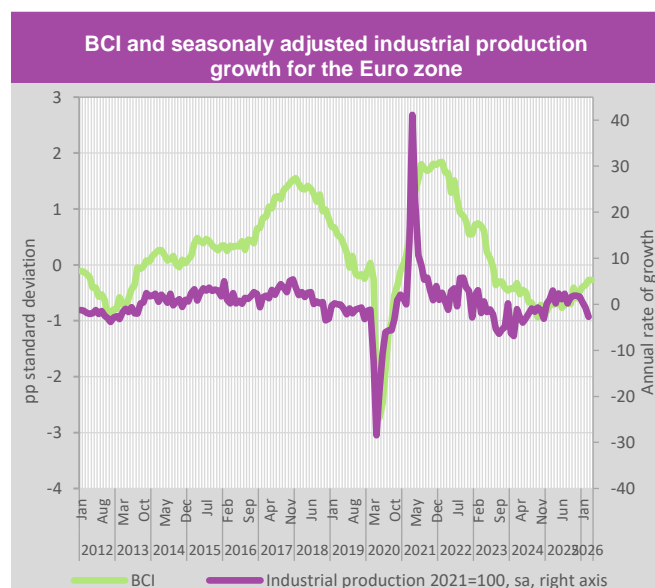

Average prices of agriculture products increased by 4.0% in April 2026 compared to the previous month, while food prices increased by 0.5%. Base metal prices increased by 2.9%, compared to the previous month, while the price of iron ore increased by 1.7%, cooper prices increased by 2.9%. According to the World Steel Association, world production of steel decreased by 1.9% y-o-y, while in China decreased by 2.8%, y-o-y (which is somewhat more than a half of World production). In the group of precious metals, the price of gold decreased by 2.9%, while the price of silver decreased by 4.0%.

Value of the Composite PMI index in April amounted to 48.8 ip (down by 1.9 ip compared to previous month),

due to deterioration of manufacturing and service sector output. Economic Sentiment Indicator (ESI) decreased by 2.9 ip in the EU27 (93.4 ip), while in the euro area decreased by 3.1 ip (93.2 ip), compared to previous month.

At the end of April 2026, the unemployment rate in the euro area and EU27 amounted to 6.3% and 6.0%, respectively. At the same time, unemployment rate in Germany and Italy was 3.8% and 5.1%, respectively. At the same time, according to the data of the Russian Statistical Office, in the Russian Federation the unemployment rate was 2.2%.

Trend of inflation during April accelerated, when inflation of 3.0% was registered in the euro area, while inflation of 3.2% was recorded in the EU27. At the same time, inflation of 2.9% and 2.8% was registered in Germany and Italy, respectively. Observed by categories the increase in the prices was recorded in services, energy, food, alcohol and tobacco and non-energy industrial goods. In Russia, the annual inflation reached 5.6%.

In April, ECB decided to keep the interest rate at the level of 2.15%. Also, PEPP and APP programmes will

be gradually reduced and long-term refinancing operation of banks was ended in the end of 2024. In April, FED kept its key interest rate to an interval of 3.50% to 3.75%.

According to the OPEC data, the price of oil type Urals has amounted to 95.61 \$/barrel in April, which is 29.5% higher compared to the previous month. Since the beginning of 2026, the price increased by 4.0%, compared to the same period in 2025, to 62.4 \$/barrel.

¹ From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. ² Including turnover generated by legal entities and entrepreneurs. ³ Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products.

⁴ Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. ⁵ Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. ⁶ Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. ⁷ GFS-1986 methodology. ⁸ Data on foreign currency savings since December 2012 according to new methodology of NBS. ⁹ SORS changed data for employment. Without registered individual agricultural workers. ¹⁰ Population aged 15 and above. ¹¹ New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ¹² Since 2012 with professional army servicemen.

¹SORS estimation. ² MoF estimation. ³ From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes.

⁴ Including turnover generated by legal entities and entrepreneurs. ⁵ From 2022, data on tourist traffic (number of tourist arrivals and overnight stays) and accommodation capacities are published on the basis of statistical processing of data taken from the administrative source, the Central Information System in Catering trade and Tourism (eTourist). ⁶ Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products. ⁷ Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. ⁸ Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. ⁹ Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. ¹⁰ GFS-1986 methodology. ¹¹ Data on foreign currency savings since December 2012 according to new methodology of NBS. ¹² SORS changed data for employment. Without registered individual agricultural workers. ¹³ Data from 2010, given according to the new methodology, which has been in use since 2021, refers to the population aged 15 and over. The data for 2025 refers to the average of four quarters. ¹⁴ New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ¹⁵ Since 2012 with professional army servicemen. ¹⁶ Data refers to period January- March.

¹ New methodology for salaries, which is applied from 2009 as SORS extended coverage of observation units. In calculation of average salaries, beside salaries paid to employees in enterprises, institutions and organizations, into account are taken also salaries paid to entrepreneurs, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ² Every year in Health and social work section half of salary is paid in December and another half in January. ³ Since 2012 with professional army servicemen.

* Column Republic budget in accordance with the Budget of the Republic of Serbia from 2017 includes expenditures financed from project loans disbursed by institutions that belong to the Republican level** PE Roads of Serbia, Corridors of Serbia LTD, Institutes, Agencies. The Budget System Law envisages the dynamics of the inclusion of entities in order to achieve a comprehensive coverage of the general government sector, in accordance with international standards. According to the predicted dynamics from January 2024 public agencies and scientific institutes are included in general government reports*** not including activated guarantees for PE Roads of Serbia, which are included in debt repayment to foreign creditors**** primary balance: interest collected is excluded from the total revenues, interest paid is excluded from the total expenditures

Note: in column no. 12 displayed are the results of transfers from and to other government levels. The result is corrective factor for other current expenditures. *****Including airport Nikola Tesla super-dividend in amount of RSD 42.2 bln (April 2019).

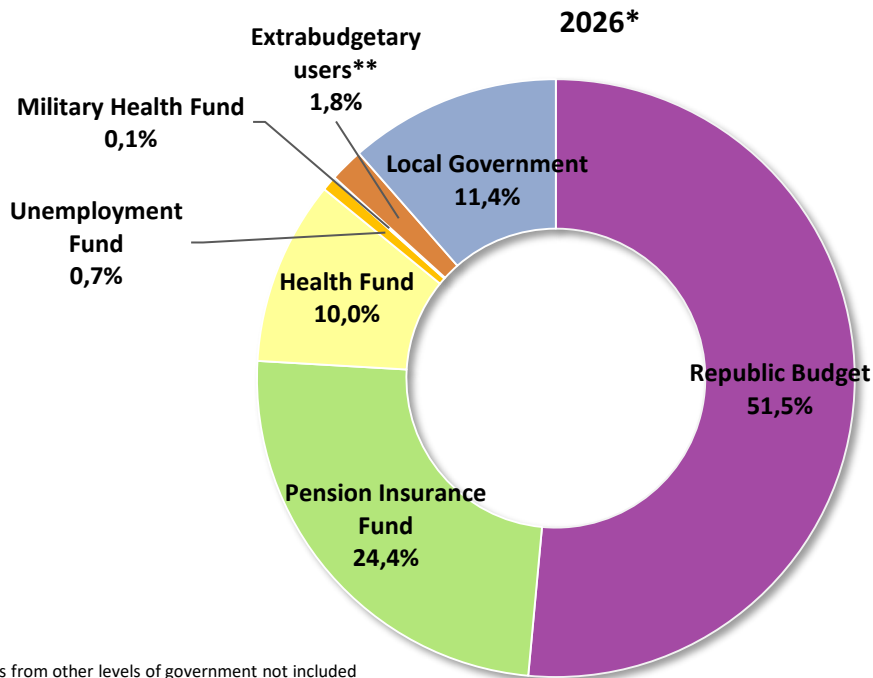

Structure of general government revenues, in Jan-Apr 2026

* Adjusted contracted amounts include changes that occurred during the implementation of financed projects, determined by the final calculation at the handover of the performed works, due to deficiencies in relation to the contracted quantities of works and realized savings, etc. Also, deviations may occur by automatic cancellation of unused funds when the loan availability period expires or at the request of the borrower. The adjusted contractual amounts represent the principal to be repaid.

***For the purpose of protection against foreign exchange and interest rate risk, a hedging transaction (interest rate and currency swap) was realized, by which the liabilities of the Republic of Serbia were converted and presented in euros, at a lower interest rate

***Hedging transaction (interest rate and currency swap) was realized _ original loan currency is shown in EUR

METHODOLOGICAL EXPLANATIONS

IV

ECONOMIC, FISCAL AND PUBLIC DEBT STATISTICS

1. Economic statistics (tables in Chapter I, Macroeconomic Developments) are based primarily on the statistical methodology and data provided by the Statistics Office of the Republic of Serbia, National Bank of Serbia, National Employment Agency, Privatization Agency, Belgrade Stock Exchange, Pension and Disability Insurance Fund of the Republic of Serbia etc.

Economic Statistics contained in the Chapter I includes: main indicators of macroeconomic developments in the annual and monthly dynamics for the current year; gross domestic product (GDP) in constant prices and its growth rates by quarters and usage of GDP; trends in physical volume of industrial production in monthly dynamics (total, by sections and economic purpose); consumer prices trends in annual and monthly dynamics; developments of overall consumer prices (in total and by components) in monthly dynamics for current year; producer prices of industrial products for domestic market and for export in annual and monthly dynamics; developments of exports in monthly dynamics; prices of external trade in annual, quarterly and monthly dynamics; developments in Foreign direct investments in quarterly dynamics; external debt in annual dynamics and in last month of current year; balance of payments in annual and monthly dynamics; monetary survey by years; main monetary indicators, household savings and foreign exchange reserves, total number of employed and unemployed and average net salaries and pension benefits (in dinars and annual real growth rates) in annual and monthly dynamics; an overview of privatization results in annual dynamics and for a specific period of the current year for which there are available data; an overview of trends of indices; market capitalization and foreign investors participation in total turnover on Belgrade Stock Exchange; an overview of turnover of securities on the Belgrade Stock Exchange; an overview of auctions of Republic of Serbia treasury bills in annual dynamics and on daily basis.

2. Fiscal statistics (tables in Chapter II Fiscal Developments) is based on the GFS methodology and data of the Ministry of Finance, Treasury Administration and Public Debt Administration.

Starting from Memorandum on the Budget and Economic and Fiscal Policy for 2009 with projections for 2010 and 2011, IMF methodology – Government Finance Statistics is used to present data and create projections for fiscal aggregates. All data in this bulletin have been computed by using the same methodology basis.

The main objectives of alignment with methodology of Government Finance Statistics is the possibility to perceive macroeconomic implications of fiscal policy. It is particularly important to perceive the influence of fiscal policy on domestic demand, hence every item of revenues and expenditures is considered from its aspect, regardless of its classification in accounting.

Here is a comparative overview of the previous and the new methodology of government finance statistics.

1. The level of observation is consolidated government sector that comprises the following levels of government: the central government – budget of the Republic of Serbia and Social Security Organizations; local government – budget of the Autonomous Province of Vojvodina and budgets of municipalities and towns; public road company Putevi Srbije and Koridori Srbije Ltd and other extrabudgetary units which belong to general government sector.

2. Coverage of data: beside budget resources, application of this methodology in computation of fiscal aggregates includes other sources of financing – a part of own resources of government bodies, donations, loans and privatization receipts. The previous coverage included only budget resources and expenditure financed from budget resources.

3. The method of computation of results: The deficit or surplus of consolidated government sector is the difference between revenues and overall expense plus net budget borrowing. The category of net landing is treated as an expense in cases when the purpose of the spending is implementation of a government policy, while if expense is made in order to manage liquidity, it becomes a financing item, without any influence on the government's result.

4. The difference in accounting and statistical coverage of particular items of expenditure: in view of the primary objective – gaining insight into macroeconomic implications of the fiscal policy, particular items of the expenditure, e.g. repayment of debt to pensioners, which is treated in accounting as a part of repayment of debt – without influence on the result, statistically is treated as transfer to citizens and on ground influences increase in domestic demand. Mobile network license, treated in accounting as current non-tax revenue, in view of its one-time character is now treated as part of financing.

With advancement of accounting base – i.e. with transition to accrual basis in recording government transactions – conditions will be created for further enhancement of government finance statistics

methodology and for alignment with the EU (ESA 2010).

The Ministry of Finance is responsible for collection and processing of fiscal data. Fiscal statistics includes consolidated balance of the general government sector and particular balances, i.e. budget of the Republic of Serbia (central government), budget of AP Vojvodina, budget of local authorities, financial plans of social security organizations and off-budget users. Public road company Putevi Srbije and Koridori Srbije Ltd. and other extrabudgetary units (such as public agencies and institutes), whose list is publicly available on the website of the Treasury Administration.

General government. General government sector comprises all the levels of government in the country. Subsectors that form general government include: central government – budget of the Republic of Serbia, provincial government – AP Vojvodina, local government – municipalities and towns, social security funds, public road company Putevi Srbije and Koridori Srbije Ltd. and other extrabudgetary units. Fiscal statistics, with regard to the individual state subsectors, is especially significant for the understanding of interrelation between different governmental levels, separation of functions as well as division of revenues. It is important to determine the amounts and the flow of transfers between governmental levels, which is achievable only owing to the individual and separate balances of all governmental levels. However, only the data presenting the entire general government may provide the information concerning the amount of fiscal operations of the state, consumption of the state and its influence on aggregate demand and total macroeconomic stability, reallocation of collected funds originating from other economic sectors, burden of taxation of the economy, tax structure etc.

Central government – budget of the RoS. Central government comprises all the ministries, agencies, and other special organizations defined as direct or indirect republic budget beneficiaries.² The Government may define and achieve set goals concerning economic policy at the level of the entire country, primarily through the implementation of certain measures and programmes by the means of the budget of central government. Other governmental levels do not economic policies concerning the national level. The more centralized is the country, the more significant are the data related to this level of government³.

AP – Vojvodina. Budget of AP Vojvodina comprises all governmental authorities and other special organizations defined as AP Vojvodina budget beneficiaries.

Local self-government. Data concerning local self-government relate to the data collected in all cities and municipalities constituting the local self-government system. The coverage of data at the level of cities or municipalities relate to all direct or indirect budget beneficiaries of a city or a municipality. The budget beneficiary of a city or a municipality is an institution primarily financed from the funds originating from the local government. Local government controls its business activities and it performs certain functions through the institution⁴.

Social security organizations. Social security organizations include the Pension and Disability Insurance Fund, Republic Health Insurance Fund, Military Health Fund and National Employment Service.

Other extrabudgetary units. Other extrabudgetary units refer to institutions and other legal entities that are formally not part of any level of government, but are subjected to significant state involvement in management, control and financing.

PE Putevi Srbije. Revenues of Putevi Srbije have the character of public revenues (toll and transfers from republican budget), and repayment of a large part of the company's debt takes place from the Republic of Serbia budget, therefore the company is treated as a part of the general government sector.

Koridori Srbije Ltd. are a Government owned company, responsible for investment in road infrastructure.

BASIC FISCAL AGGREGATES

Basic fiscal aggregates are total public revenues, total public expenditures, and the result of the difference between these two categories, which is defined as surplus or deficit in the consolidated balance of general government or balances of individual governmental levels.

Total public revenues are divided into two basic categories: current revenues and yield on capital.

² Indirect republic budget beneficiaries are primary and secondary schools, faculties, scientific institutes, social welfare institutions, cultural institutions and other institutions partly financed from the Republic budget.

³ The largest amount of tax revenues, apart from property taxes, pertains to the budget of the RS. Income tax is renounced in the legally defined percentage to the local self-government, whereas a part of the revenues collected from income taxes realised in the territory of Vojvodina pertains to the AP Vojvodina. This shows the importance of the central governmental level in the country.

⁴ Primary and secondary schools pertain to the central government as their financing is mostly provided from that level. A part of material expenses of schools is financed from local self-government funds but not in the extent sufficient for pertaining of these institutions to the local government. Pre-school institutions are local budget beneficiaries. When reviewing data regarding their revenues and expenditures, they are included in the local government level.

Current revenues are divided into tax and non-tax revenues.

The basic characteristics of **tax revenues** is their mandatory nature and non- existence of any direct reciprocal service for the payment of taxes. The state collects taxes finances certain state functions from collected funds. The benefits related to certain functions cannot be directly connected to an individual who paid the tax.

Personal income tax comprises wage tax, as well as taxes on other forms of earnings of individuals, beside the wages.

Corporate income tax comprises, in addition to corporate profit tax narrow meaning of the term, also tax on dividends paid to the residents and non-residents, as well as the tax on interests, royalties and capital incomes realized by non- residents.

VAT comprises national VAT, import VAT, and the arrears of turnover taxes from the previous years.

Excise duties present consumption taxes concerning specific products such as oil, tobacco, coffee, alcoholic beverages, electricity etc.

Customs duties and other import duties comprise revenues from duties paid for import of goods and services, with the exception of the VAT on imported goods that is included in VAT revenues and import excises.

Other tax revenues comprise taxes on use, ownership and carrying of goods, and other taxes. The property tax of local government is included in the category of other tax revenues in the general government consolidated balance.

Non-tax revenues are heterogenic category of revenues including property revenues (collected interest, rental fees) compensations, taxes, fines and other revenues that cannot be classified. As opposed to tax revenues, non-tax revenues imply the existence of reciprocal favour for the sum collected - e.g. the compensation for the usage of natural resources. However, there are revenues that may by their characteristics be classified as non-tax revenues, but without implying the reciprocal favour for the collection. Fines are a typical example of this sort of revenue.

Capital revenues comprise only revenues originating from the sale of capital goods, as well as the capital transfers from non-governmental institutions. The sale

of capital goods imply the sale of non-financial assets, buildings, inventories and state-owned land.

Total expenditures in the Bulletin of Public Finance are presented according to the economic classification emphasizing the type of expenses, i.e. its economic characteristics and influence of state consumption on the market of goods and services, financial market and reallocation of income. In addition to the economic classification of expenditure, there is also a functional classification emphasizing the function the state performs by using of funds for specific purposes⁵. The Bulletin of Public Finance does not contain expenditures classified in accordance with the functional classification.

Overall expenditure is divided into current expenses, capital expenses and net budget borrowing.

Current expenses present final budget outflows, and are not intended for the procurement of non-financial assets.

Compensation of employees comprise (net) salaries of employees including income tax and contributions paid by employees, contributions paid by employers, as well as other fringe benefits (transport allowance, sick leave allowance for the period up to 30 days etc.).

Procurement of goods and services comprise payments related with coverage of business expenses (electricity, phone bills etc.), business trips, services contracts, current maintenance and procurement of material.

Repayment of interests is divided into repayment of interests on domestic debt, interests on external debt, interests based on activated guarantees and accompanying borrowing expenses.

Subsidies comprise all the funds transferred to the economic sector (public enterprises, registered agricultural holdings etc.) for the coverage of running expenses or/and the grant intended for current business activities.

Social insurance and social welfare expenses include payments to person insured with social security organizations (pensions of beneficiaries of Pension and Disability Insurance Fund, sick leave benefits paid by the Republic Health Insurance Fund, unemployment benefits paid by the National Employment Service, Repayment of debt to pensioners, children and family benefits, benefits for war-disabled persons, pregnancy leave benefits, housing benefits, Military Health Fund expenditures etc.

⁵ Division of expenditures according to the functional classification is the following: general public services, defence, internal security, economic affairs, environmental protection, housing construction and municipal services, healthcare, recreation, culture and religion, education and social welfare.

Other current expenses include grants to non-governmental organizations, mandatory levies and penalties imposed by one governmental level to another, fines and penalties imposed by courts and judicial bodies, injury compensations or compensations for damages incurred by natural disasters, and damages incurred by the public bodies.

Capital expenses comprise all the payments intended for the procurement of non-financial assets, construction of buildings and infrastructure, procurement of equipment and inventories and the purchase of land.

Net lending are expenses for purchase of financial assets whose objective is implementation of a particular government policy.

General government consolidated balance contains consolidated revenues and consolidated expenditure.

Consolidated revenues are aggregate revenues of individual governmental levels, but in the consolidation procedure, transfers received from other governmental levels are excluded. In the consolidation procedure, benefits paid by general government in the function of employer are excluded from the revenues of mandatory social insurance organizations.

Consolidated expenses present aggregate expenditures of individual governmental levels, while in the consolidation procedure, transfers provided from one governmental level to another are excluded. In the consolidation procedure, expenditures paid by general government in the function of employer are excluded from the expenditures.

Consolidated surplus / deficit is a difference between consolidated revenues and consolidated expenditure.

Balance surplus/ deficit of individual governmental levels is a difference between total revenues and total expenditures, at a particular governmental level.

Earnings not included in the revenues of general government present earnings based on domestic and external borrowing and earnings based on the privatization of state-owned enterprises.

Expenses that are not included in general government expenses are those for repayment of principal of

national and foreign debt and expenses for purchase of financial assets that cannot be classified as net lending.

3. Public Debt Statistics (Tables in Chapter III – Public Debt) is based on the data of the Republic of Serbia Treasury Administration. The public debt of the Republic of Serbia consists of direct liabilities (received loans) and indirect liabilities (issued guarantees).

1. Direct Liabilities

Direct Liabilities of the RoS are those incurred on the basis of the loans taken. Direct liabilities, depending on the creditor, constitute the following: (1) domestic debt and (2) foreign debt.

Domestic Debt consists of assumed obligations from an earlier period, obligations arising from the issuance of securities, which make up its largest part, then loans from commercial banks, as well as obligations arising from restitution, old foreign-currency savings, etc.

External debt consists of obligations arising from the issuance of Eurobonds, new and reprogrammed loans from international financial institutions, loans from foreign governments, loans from foreign banks, etc.

2. Indirect Liabilities

Indirect liabilities of the Republic of Serbia are liabilities arising from issued guarantees for loans taken from international financial institutions, domestic and foreign commercial banks, etc.

Public Debt to Gross Domestic Product Ratio

Debt to GDP ratio is one of the most important indicators of the public debt sustainability and one of the convergence criteria for joining the EMU.

Structure of Interest Rates

The ratio between the fixed and variable interest rates in the public debt of Serbia is distinctly favourable. High share of the fixed interest rates provides high level of predictability of future liabilities arising from the interest and thus the Republic of Serbia is not exposed to the interest rate risk.

The Public Debt Currency Structure

The public debt consists of different currencies. The largest share, however, is the debt denominated in Euros and local currency - dinar.
